Administrative Files System

SYSTEM LOCATION:

Naval Investigative Service (NIS) Headquarters PO Box 16230, Suitland, Md. 20746

Decentralized Segments - Naval Investigative Service Regional Offices (NISROs) retain duplicate copies of certain segments of the administrative files. Addresses of these offices are included in the directory of Department of the Navy mailing list.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Past and present civilian, military and foreign national personnel assigned world-wide NIS.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel Management System - an automated management information and statistical system containing all needed items of personnel information.

Special Agent Career Development Files - a compendium of Civil Service Performance Evaluation and Ratings and all correspondence unique to the NIS Special Agent, including annual physical examinations, which has a bearing on world-wide assignability, promotion and general career assessment.

Weapons Inventory File - an automated file containing the credential number, badge, weapons and handcuffs assigned to each NIS criminal investigator.

Personnel Security Clearance File - an automated file containing the classified material access level and date of last security clearance for assigned civilian and military personnel of NIS.

Personnel Utilization Data File - an automated file designed to provide statistical information regarding the manner by which available NIS manhours are expended in the execution of its assigned investigative and counterintelligence mission. The file is formed by the submission (monthly) of individual manhour diaries. All assigned personnel input to this system; their manhours are categorized by function.

Freedom of Information and Privacy Requests File. Records relating to requests for information pursuant to the Freedom of Information Act and the Privacy Act of 1974, and responses thereto.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; Departmental Regulations

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Personnel Management System is used in preparation of virtually all personnel documents and personnel statistical studies. It provides such information as the average grade, the total number and composition of personnel at each NIS component and the past assignments of personnel. It is used on a daily basis by personnel technicians and management level personnel in the formation and execution of staffing actions for the various NIS components, informal verification of employee's tenure and the compilation of necessary statistical studies.

Special Agent Career Development Files - The information in these files is used for within-agency decisions regarding reassignment, promotion, career training and long-range development. They form within-agency repository for both adverse and favorable documents regarding Special Agents. The files have a long-range fuction - that of forming the basis for law enforcement retirement service certification. Though part of the file is duplicated in the Official File maintained by the Civilian Personnel Office, the Special Agent Career Development file is considered priviledged information and its contents are not released outside NIS. Within NIS, the files are maintained and controlled exclusively within the Career Services Division, NIS Headquarters and by assigned personnel to that Division. The files are released for review only to senior management personnel of NIS.

Weapons Inventory File - used to identify and inventory credentials, weapons, badges and handcuffs issued to authorized NIS personnel.

Personnel Security Clearnace File - used to informally verify and authenticate security clearances issued to NIS personnel. The file has a daily working purpose of acting as a check sheet for the updating of security clearances. It further is the file referred to when the director, NIS, is required to certify th access level of certain assigned NIS personnel to other Navy commands as well as civilian contractors.

Personnel Utilization Data File - a statistical file from which an indepth analyses of manhour expenditures are surveyed. The file is highly automated and used exclusively within NIS. The various analyses drawn from the file are used to modify the staffing levels at various NIS components based on actual work level. It further provides a tool to NIS management to gauge the efficiency of all components by comparing their workload with the amount of manhours available.

The records in this system are referred, as appropriate to authorized governmental units, such as Office of Civilian Manpower Management and Civil Service Commission, making various personnel determinations, e.g., retirement, awards, disciplinary action; to law enforcement personnel conducting criminal or suitability investigations; to DoD components, other agencies or industrial firms requiring confirmation of security clearance level; to higher authority for statistical purposes; limited response to credit queries; and medical records to personal physicians.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The Personnel Management System, Weapons Inventory File, Personnel Security Clearance File and the Personnel Utilization Data File are stored on magnetic tape in an automated system. The Personnel Management System is composed of visible file cards and computer paper printouts; the Personnel Security Clearance File is composed of computer paper printouts and associated Department of Defense security certification documents, the latter being filed in individual file folders; the Weapons Inventory File and the Personnel Utilization Data File are composed of computer paper printouts only.

The Special Agent Career Development files are composed exclusively of paper records in file folders.

RETRIEVABILITY:

Information is accessed and retrieved by name only in the Special Agent Career Development File. The Weapons Inventory File is queried by either name only or by item number (i.e., badge, credential, weapon, handcuff serial number).

The Personnel Management System is accessed by name and SSAN; retrieval is by individual data characteristic such as GS-grade level, duty-station, special qualifications, language qualifications or it my be retrieved by name only or in conjuction with the SSAN.

The Personnel Utilization Data File is normally accessed and retrieved by location and functional category of employment (i.e., Special Agent, clerical, etc.). The capability exists, however, to retrieve by SSAN. The Personnel Security Classification File is a subordinate file to the Personnel Management System. Accession is by name and SSAN. Retrieval is accomplished by computer paper printout in both alphabetical and duty-station format.

SAFEGUARDS:

All files in this system are protected by limited, controlled access, safes, and locked cabinets and doors. Futher, visitor control and secure computer software measures (where applicable) are utilized.

RETENTION AND DISPOSAL:

Personnel indexed in the Personnel Management System and the Personnel Security Clearance File are deleted from the magnetic tape data storage upon termination of employment. Residual paper records are retained from two to five years.

Personnel indexed in the Weapons Inventory File are deleted at such time as assigned equipment is returned and accounted for. Residual paper printouts are destroyed at least semi-annually.

The Special Agent Career Development Files are semi-permanent and are retained, at least in essential skeletal format, indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Naval Investigative Service, P.O. Box 16230, Suitland, Md. 20746

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the System Manager, above. Individuals submitting requests should provide their full name, date of birth, SSAN and dates of employment or assignment with NIS.

In the case of personal visits, individuals requesting access to files in this system will be required to present reasonable proof of identity to minimally include a drivers' license or similar document at least one of which must bear a current photograph and be able to provide (orally) some element of unique identifying data such as name of spouse or a past duty-station with NIS.

RECORD ACCESS PROCEDURES:

Access to files in this system may be gained by written notification or personal visit to the Naval Investigative Service Headquarters at the location specified above. Requests should be directed to the Information and Privacy Coordinator.

CONTESTING RECORD PROCEDURES:

The agency's rule for access to records and for contesting contents and appealing initial determinations by the inividual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

In the case of Personnel Management System and the Personnel Utilization Data System, the individual employee is the prime source of information both for initial access to the files as well as periodic update. The Personnel Security Clearance File information is obtained as a sub-file to the Personnel Management System. The information for the Weapons Inventory File is obtained from personnel charged with the issuance of various items inventoried therein (with verification by the personnel to whom the items are issued.)

Information for the Special Agent Career Development File is recieved from the individuals supervisors, from various Naval Commands and other Federal and State agencies with whom the Special Agent has had professional contact and from the individual himself. Also, this file contains copies of each physical examination required annually of assigned civilian Special Agents.

CATEGORIES OF RECORDS IN THE SYSTEM:

Two disk files comprise the system of records. First master file contains instructor's name, functional group assignment code, projected date of departure; list of lectures instructor gives. Second master file contains lecture I.D., title, lecture primary, instructors giving the lecture. In addition to the items on disk, a manual file is maintained which is a record summary form containing the names of DODCI instructors and the number of lectures and/or laboratory hours they present in resident or on-site classes each quarter.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301 and 10 U.S.C. 5031

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Provides the ability for functional managers to generate a list of instructors along with the associated lectures in which they are proficient or to specify a lecture title and determine which instructors are capable of presentation. This provides assistance in assigning instructors to course schedules, teams for on-site course presentations, determining lectures which are critical in flexibility of assignment, planning instructor assignments in the order of lecture priority. The Records Summary Form is used to evaluate the instructors' workloads and to assist in preparing the performance evaluation reports.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on magnetic disks in a computer data base. The Record Summary Form is maintained in paper copy in file cabinets.

RETRIEVABILITY:

Instructor's last name, lecture ID number, or functional group code.

SAFEGUARDS:

This system of records is maintained on magnetic disks in the computer operations center which is kept locked. Only the manager and assistant manager of the Computer Support office have access to the center during normal working hours and the security watch has access after hours. The mode of access to the computer-based system is via remote terminal and special passwords are required. Appropriate data base language commands (available only to authorized DODCI staff members) must be invoked to gain access to information in the system. Portions of the system can only be accessed by functional managers via controlled key work commands. An accounting log is maintained of all accesses to the system which contains identification of the user, log-on and off, station number, and date/time of last access.

RETENTION AND DISPOSAL:

The system data base is retained indefinitely. Revisions are in continuous process, e.g., instructors' names being added upon arrival and deleted on departure, lecture titles added or deleted as they are developed or discontinued, lecture presentation capability expanded or deleted as appropriate. The Record Summary Form is retained for two years and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Manager, Computer Support Office, DOD Computer Institute, Building 175, Washington, D.C. 20374 for records maintained on magnetic disks. The Scheduling/Reproduction Officer, for the Record Summary Form.

NOTIFICATION PROCEDURE:

DODCI faculty members are informed of existence and purpose of system. Individual instructors can request printout of information in system which pertains to them.

RECORD ACCESS PROCEDURES:

The Institutes rules for access to records may be obtained from the Systems Manager.

CONTESTING RECORD PROCEDURES:

The Institute's rules for contesting contents and appealing initial determinations by the individual concerned can be obtained from the Systems Manager.

RECORD SOURCE CATEGORIES:

DODCI functional managers maintain system and periodically revise data base by entering new data and deleting discontinued information. Additionally, the Systems Manager can enter information affecting printout format and contents. The information contained in the Instruction Hour Records forms are extracted from teaching schedules prepared on each course of instruction.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title V, Public Law 92-129; Section 413; Public Law 92-255

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Blanket 'routine uses' identified in the yearly recompilation do not apply to this system of records.

Records of identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be client/patient, maintained in connection with the performance of any alcohol or drug abuse prevention and treatment function conducted, regulated, or directly or indirectly assisted by any department or agency of the United States, shall, except as provided therein, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized in Title 21 U.S.C. Section 1175, as amended by 88 Stat. 137, and Title 42 U.S.C., Section 4582, as amended by 88 Stat. 131. These statutes take precedence over the Privacy Act of 1974, in regard to accessibility of such records except to the individual to whom the record pertains.

Within the Armed Forces or within those components of the Veterans Administration furnishing health care to veterans or between such components and the Armed Forces.

To medical personnel outside the Armed Forces to the extent necessary to meet a bona fide medical emergency.

To Government personnel for the purpose of obtaining benefits to which the patient is entitled.

To qualified personnel for the purpose of conducting scientific research, management or financial audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report of such research, audit or evaluation, or otherwise disclose identities in any manner.

To a court of competent jurisdiction upon authorization by an appropriate order after showing good cause therefore. In assessing good cause, the court shall weigh the public interest and the need for disclosure against the injury to the patient, to the physician-patient relationship, and to the treatment services. Upon the granting of such order, the court, in determining the extent to which any disclosure of all or any part of any record is necessary, shall impose appropriate safeguards against unauthorized disclosure.

SYSTEM NAME:

NIS Investigative Files System

SYSTEM LOCATION:

Primary System-NIS Records Management Division Administration Department, NIS Headquarters, P.O. Box 16230, Suitland Md. 20746

Decentralized Segments - Naval Investigative Service Regional Offices (NISROs) retain copies of certain segments of the investigative files, and related documentation for up to one year. Addresses of these offices are included in the directory of Department of the Navy mailing addresses. Naval Investigative Service Resident Agencies retain copies of investigative reports during pendency and for 90 days thereafter. They also retain evidence custody cards on persons from whom evidence was seized. The number and location of these Resident Agencies are subject to change in order to meet the requirements of the Department of the Navy. Current location may be obtained from Naval Investigative Service Headquarters.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons in the following categories who require access to classified defense information prior to August 1972: Active and inactive members of the naval service, civilian personnel employed by the Department of the Navy (DoN), industrial and contractor personnel, civilian personnel being considered for sensitive positions, boards, conferences, etc., civilian personnel who worked or

resided overseas, Red Cross personnel. Civilian and military personnel accused, suspected or victims of felonious type offenses, or lesser offenses impacting on the good order, discipline, morale or security of the DoN. Civilian personnel seeking access to or seeking to conduct or operate any business or other function aboard a DoN installation, facility or ship. Civilian or military personnel involved in the loss, compromise or unauthorized disclosure of classified material/information. Civilian and military personnel who were of counterintelligence interest to the DoN.

CATEGORIES OF RECORDS IN THE SYSTEM:

Categories of records in the system: Official Reports of Investigation (ROI) prepared by NIS or other federal, state, local or foreign law enforcement or investigative body on either hard copy or microfilm. NIS operations reports (NORs) and their predecessor NIS information reports (NIRs). NORs and NIRs document information received by NIS which is of interest to the naval services or other law enforcement or investigative bodies. The information may be of criminal, counterintelligence or general investigative interest.

General Administration Reports (GEN). Although no longer used as such, the Investigative Purpose of the GEN was to report the results of pre-employment inquiries on applicants for positions as special agents with NIS. The official ROI (above) is now used for this purpose.

Action, Lead Sheets (ALS's), investigative summaries, memoranda for the files and correspondence relating to specific cases and contained in the individual dossier.

Polygraph Data. A listing of persons who submitted to polygraph examination by NIS examiners. The data includes the examinee's name, location and results of the examination and the identity of the examiner.

Case Control and Management documents which serve as the basis for controlling and guiding the investigative activity.

Records identifying confidential sources and contacts with them.

Index to persons reported by 'Name Only'.

Wiretap Data Records. Automated listing of persons who were subjects of wiretapping or eavesdropping operations.

Case Control and Narcotics Data Records. Automated records used only for statistical purposes in accounting for productivity, manhours expenditures; various statistical data concerning narcotics usage and used solely for statistical purposes.

Modus Operandi Files.

Commercial insurance companies in those instances in which they have a legitimate interest in the results of the investigation, but only to that extent and provided an unwarranted invasion of privacy is not involved. Victims of crimes to the extent necessary to pursue civil and criminal remedies.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, on cards and on microfilm. Automated records on magnetic tape.

RETRIEVABILITY:

NIS permanent files are filed by terminal digit number. In order to locate the file it is necessary to query the Defense Central Index of Investigations (DCII) computer using the name of the subject and at least one other personnel identifier such as date of birth, place of birth, social security number or military service number. Files may also be retrieved by a case control number assigned at the time the investigation is initiated. Copies of the files in the NISROs and Resident Agencies are retrieved by name.

SAFEGUARDS:

NIS investigative files (permanent and temporary) are maintained and stored in open shelves and filing cabinets located in secured areas accessible only to authorized personnel. Dated files are retired to the Washington National Records Center where retrieval is restricted to NIS authorized personnel.

RETENTION AND DISPOSAL:

Retention of completed NIS Investigative files on Personnel Security Investigations (PSI's) is authorized for 15 years unless adverse information is developed, in which case they may be retained for 25 years. PSI files on persons considered for affiliation with DOD will be destroyed within one year if the affiliation is not consummated. Special Agent applicant records are retained for one year if the applicant declines offer of employment and five years if the applicant is rejected for employment. Criminal files are retained for 25 years. Major investigations of a counterintelligence/security nature, of espionage or sabotage, may be retained permanently. Certain of the above records, when found to have possible historical value, may be offered to the National Archives for continued retention. Counterintelligence records on persons not affiliated with DOD must be destroyed within 90 days or one year under criteria set forth in DOD Directive 5200.27, unless retention is required by law or specifically approved by the Secretary of the Navy. Files retained in the NISO's and resident agencies are temporary and are destroyed after 90 days or one year, as appropriate.

SYSTEM MANAGER(S) AND ADDRESS:

The Director, Naval Investigative Service has ultimate responsibility for all NIS file holdings. Management of NIS permanent files is the direct responsibility of the Head Administration Department. NISRO Commanding Officers are responsible for files retained in their NISRO subordinate Resident Agencies.

NOTIFICATION PROCEDURE:

All requests relative to the retention and/or releasability of NIS investigative files should be addressed to the Director, Naval Investigative Service, P.O. Box 16230, Suitland, Md. 20764. Requests must contain the full name of the individual and at least one additional personal identifier such as date and place of birth, social security number or military service number. Personal visits by requesters should be confined to the Naval Investigative Service headquarters at the above address. It should be borne in mind that the vagaries of the automated indexing system might preclude a same day response. Persons submitting written requests must properly establish their identity to the satisfaction of the NIS. Where a question exists a signed, notarized statement or other certified form of identification will be required. Individuals appearing in person may present proof of identification in the form of military ID card, valid driver's license, or other suitable form of identification bearing a photograph and signature. Attorneys or other persons acting on behalf of a subject of a record must provide a notarized authorization from the subject of the record.

RECORD ACCESS PROCEDURES:

Individuals may make inquiries relative to NIS records maintained on them thru the NIS Information and Privacy Coordinator Naval Investigative Service Headquarters, at the address specified in the previous paragraph.

CONTESTING RECORD PROCEDURES:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the SYSMANAGER.

SYSTEM NAME:

Navy Central Clearance Group (NCCG) Records

SYSTEM LOCATION:

Naval Civilian Personnel Command, (Code 23), Department of the Navy, 800 N. Quincy St., Arlington, VA. 22302.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Incumbent and former civilian employees in and applicants for sensitive and nonsensitive postions at Department of the Navy appropriated fund activities.

CATAGORIES OF RECORDS IN THE SYSTEM:

The records are comprised of (1) reports and other investigative material and information developed by investigations conducted by Federal investigative agencies pursuant to statute and executive order; (2) reports of arrest, criminal activity and theirdisposition, (3) results of the review of the reports by the NCCG, including the security or suitability determination made on the case; (4) copies of correspondence regarding the case and/or reflecting the determination made by the NCCG; and (5) an index file card on each case.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(1) Executive Order 10450 (as amended), 'Security Requirements for Government Employment'. (2) 5 USC 7532, 'Suspension and Removal'.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are maintained (1) to meet the statutory requirements of 5 USC 7532 and E.O. 10450 which require the establishment and maintenance of an effective program to insure that the employment and retention in employment of any civilian officer or employee within the Department is clearly consistent with the interest of the national security and which require adjudication and readjudication of the information as appropriate, and (2) to have the material furnished by the Office of Personnel Management, readily available for return to the OPM upon request. Upon receipt of investigative reports and security information on civilian employees and applicants, the NCCG reviews the material. The Naval Civilian Personnel Command, Personnel Security Branch then transmits the material to the employing activity with a letter or

stamped endorsement apprising the command of the security determination made by the NCCG. During the period that the reports and documents are at an activity, the material is under the custody of the activity's Security Manager. Following the review of the material by the activity's commanding officer or his designee, the material is (1) returned to the source from which received, if required, (2) retained until the employee is separated, or (3) destroyed if it is of no further value. If the employing activity determines that an adverse action aganst the employee is warranted based on information in the report, appropriate action in accordance with Civil Service Commission suitability procedures is initiated by the activity. In some cases the NCCG will make a suitability determination. Other users of the records may include members of Security Hearing Boards and officials and employees of the Department of the Navy in performance of their official duties related to the Department of the Navy Civilian Personnel Security Program.

10 USC 5151

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by Navy patent personnel to determine rights of the Government and employees in employee inventions; to file and prosecute patent applications; to publish invention disclosures for public information and defensive purposes; to provide evidence and record of Government interest in or under patents or applications for patents; to provide evidence and record of patent and copyright licensing and assignment; to determine action or recommended action regarding disposition of claims or litigation; and to recommend Government employee incentive awards. Used by other Navy/Marine Corps commands to determine Government interest in inventions; to permit utilization of inventions; and to support employee incentive awards. Used by U.S. Patent and Trademark Office to determine respective rights of the Government and employee-inventors; by the Commissioner of Patents and Trademarks, as well as Navy patent personnel, to administer Patent Secrecy responsibilities; by Federal Council for Science and Technology as a source of statistical data for an annual report on Government patent policy; by the General Accounting Office to conduct audits and perform other statutory functions. Information is transmitted to the U.S. Patent and Trademark Office and appropriate foreign government offices for prosecution of patent applications; the U.S. Patent and Trademark Office and the U.S. Copyright Office to evidence legal interests in patent and copyright licenses and assignments; the National Technical Information Service for publication of inventions available for licensing; non-governmental personnel (including contractors and prospective contractors) having an identified interest in particular inventions and Government rights therein, in infringement of particular patents or copyrights, or in allowance of royalties on contracts; and the Congress in the form of reports on particular bills for private relief and reports of action on Congressional and constituent requests. Government agencies involved in claims or litigation, including the Department of Justice, have access to prosecute and defend cases. All Government agencies have access to license records. Parties involved in particular licensing arrangements have access to specific files involved.

To the American Red Cross, Navy Relief Society, or U.S.O. for personal service to the member or allotment recipient.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Personal Financial Records containing Leave and Earnings Statements, which are paper records, are stored in wooden or metal boxes or cabinets. Copies of Leave and Earnings Statements and supporting documents are stored in file folders and cabinets or on micro-film or microfiche. Automated records are stored on magnetic tapes, discs and punched cards.

RETRIEVABILITY:

Automated records are retrieved by Social Security Number and name. Documents are retrieved by ssn or by an assigned internal document control number.

SAFEGUARDS:

Outside of normal working hours Personal Financial Records with Leave and Earnings Statements are secured in safes, vaults or locked cabinets. Substantiating documents and microfilmed records are retained in unlocked cabinets. During non-working hours, offices where the above-mentioned records are stored are locked.

The safeguards in the on-line automated system include the following controls: a. Physical access to CRT data entry terminals is under supervisory control. b. Access to central computer main frame, other peripheral equipment and tape and disc storage is strictly controlled. Individuals must sign in and be authorized admittance before access. c. Individual user identification codes and passwords are used to control access to automated records. d. Reports are issued that are used to help monitor the system to determine individuals who are accessing data.

Access to microfiche and microfiche readers and the respective data are maintained by supervisory control.

RETENTION AND DISPOSAL:

Personal financial records containing the twelve most recent leave and earning statements are retained by the Personnel Support Detachment or disbursing office servicing the Command to which the member is assigned. Copies of originating documents are retained by the local command for one year after submission and then destroyed. Officials and employees of schools and other institutions engaged to provide training. Employee unions when unions are authorized to canvas employees or at the time of a union election. Designated contractors of the Department of the Navy in performance of their duties with respect to equipment and system design, development, test and maintenance.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on magnetic tape, disc, drum and punched cards and computer printouts. Manual records are stored in paper file folders.

RETRIEVABILITY:

Information is retrieved by Social Security Account Number (SSAN), name, or by specific employee characteristics such as date of birth, grade, occupation, employing organization, tickler dates; a combination of data elements contained in the Training Information Management System (TIMS), on apprentice program master files; academic specialty or education level. Specific sub-groups of employees may be identified through the use of computerized indices. Manual records are retrieved by name.

SAFEGUARDS:

The computer facility and terminal are accessible only to authorized persons that have been properly screened, cleared and trained. Manual and automated records and computer printouts are available only to authorized personnel having a need-to-know. In the case of EEO data, output from the Chief of Naval Operations (OP-16) is authorized only by the Department of the Navy Director of Equal Employment Opportunity or his Deputy. Output from the activity minority census files must be authorized in writing by either the head of the activity or the activity's deputy EEO officer.

RETENTION AND DISPOSAL:

For TIMS and the apprentice programs the computer magnetic tapes are permanent. Manual records are maintained on a fiscal year basis and are retained for varying periods from 1 to 5 fiscal years. For the Department of the Navy's centrally-administered programs, files on selected candidates are maintained for 5 years (from date selection process is completed). Records of non-selected candidates are retained only for that period of time sufficient to permit appropriate review (usually less than 60 days). For PADS, computer magnetic tapes are retained permanently. Magnetic discs are erased after use. Computer printouts are destroyed after 3 months. Input documents (NAVSO12280/11) are destroyed after data is converted to machine readable form. Input punch cards are retained for 2 weeks. For career management computer magnetic

tapes and discs are erased 5 years after they are created; manual records are destroyed 2 years after the employee has been dropped from the career inventory. Manual records are destroyed upon separation of the employee from the activity. For LAPIS, records are maintained in an active status until a separation action on an employee is completed. Historical records for LAPIS are maintained for a maximum of 5 years.

SYSTEM MANAGER(S) AND ADDRESS:

Chief of Naval Operations (OP-14), Department of the Navy and the commanding officers of the employee's activity.

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the SYSMANAGER or to the civilian personnel officer under his cognizance. Requests must be accompanied by the individual's full name, social security number and name of employing activity. Requesters may visit the civilian personnel office of the naval activity covered by the system to obtain information. In such case proof of identity will consist of full name, social security account number and a third positive identification such as driver's license, Navy building pass or identification badge, birth certificate, Medicare card, etc. Address of the activity is furnished in the Department of the Navy directory of mailing addresses published in the Federal Register.

DEFENSE CONTRACT AUDIT AGENCY

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required, to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established, that are applicable to every record system maintained within the Department of Defense, unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below, only once in the interest of simplicity, economy and to avoid redundancy, before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE - LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE - DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE - DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE - CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

ROUTINE USE WITHIN THE DEPARTMENT OF DEFENSE

A record from a system of records maintained by this component may be disclosed as a routine use to other components of the Department of Defense if necessary and relevant for the performance of a lawful function such as, but not limited to, personnel actions, personnel security actions and criminal investigations of the Component requesting the record.

ROUTINE USE - PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE - DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this Component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE - DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this Component may be disclosed to State and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S.Code, Sections 5516, 5517, 5520, and only to those State and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE - DISCLOSURE OF INFORMATION TO NARS (GSA)

A record from a system of records maintained by this component may be disclosed as a routine use to the National Archives and Records Service of the General Services Administration in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

ROUTINE USE - DISCLOSURE TO DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

All systems of records relating to compensation, employment or retirement, or extracts therefrom, maintained by this Component may be disclosed as a routine use to the Department of Health, Education, and Welfare for the purpose of comparing such record with records of programs administered by and in the possession of the Department of Health, Education, and Welfare in order to verify information where such verification is required by law or regulation or to identify violations or potential violations of law, whether criminal, civil, or regulatory, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto.

DEFENSE LOGISTICS AGENCY

HOW SYSTEMS OF RECORDS ARE ARRANGED. Defense Logistics Agency records are arranged by major functional categories. Systems of records notices are grouped similarly. For example, a system of records on personnel security clearances may be found in the 153 series and about military personnel in the 322 series. These numbers are part of the system identification which precedes the notices in the Federal Register and look like this: S322.01 DLA-K. The letter S means Defense Logistics Agency. The first digit represents the primary functional area, the next two digits represents the sub-functional category of the primary functional area and the last two digits represents the numerical listing within that category. The suffix letters are internal management accounting devices.

HOW TO USE THE INDEX GUIDE. As an aid in locating a particular system of records, first determine the numerical series by functional area as listed below. This list identifies each series in the order in which it appears in this issuance. Having done so, use the series number to locate the systems of records in which you are interested.

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required, to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established, that are applicable to every record system maintained within the Department of Defense, unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below, only once in the interest of simplicity, economy and to avoid redundancy, before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE - LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE - DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE - DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE - CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

ROUTINE USE WITHIN THE DEPARTMENT OF DEFENSE

A record from a system of records maintained by this component may be disclosed as a routine use to other components of the Department of Defense if necessary and relevant for the performance of a lawful function such as, but not limited to, personnel actions, personnel security actions and criminal investigations of the Component requesting the record.

ROUTINE USE - PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of

Defense published on or before August 22, 1975, will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE - DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this Component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE - DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this Component may be disclosed to State and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S.Code, Sections 5516, 5517, 5520, and only to those State and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE - DISCLOSURE OF INFORMATION TO NARS (GSA)

A record from a system of records maintained by this component may be disclosed as a routine use to the National Archives and Records Service of the General Services Administration in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

ROUTINE USE - DISCLOSURE TO DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

All systems of records relating to compensation, employment or retirement, or extracts therefrom, maintained by this Component may be disclosed as a routine use to the Department of Health, Education, and Welfare for the purpose of comparing such record with records of programs administered by and in the possession of the Department of Health, Education, and Welfare in order to verify information where such verification is required by law or regulation or to identify violations or potential violations of law, whether criminal, civil, or regulatory, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto.

DCASR Dallas Civilian Personnel who have been hired, separated or had an internal position change since 1 July 1973.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains a code for the type of personnel action; the name of the individual; the type of appointment on which the individual is serving; the month and year of the action; the series and grade from which the individual moved; the series and grade to which the individual moved; the year of birth; the organizations from which and to which the individual moved; the length of time taken to process the action in the Civilian Personnel Office; the number of months which the individual worked for DCASR Dallas (for separation actions only); and the supervisor's evaluation of the employee's overall effectiveness (for separation actions only).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. Sec. 301, 302, E.O. 10561, FPM Chapter 250, Subchapter 1-4.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The purpose of this system is to provide operating management with reliable summary data on which to base manpower planning. A secondary purpose is to provide information for related planning purposes such as Upward Mobility, Equal Employment Opportunity (EEO) and Labor Management Relations.

Some information is provided from the file (normally in highly summarized form) to authorized external investigators such as grievance examiners, EEO complaint investigators, DLA Inspector General Teams.

Internal DCASR Dallas management uses this information to forecast type and number of hires; to evaluate staffing performance by the Civilian Personnel Office; to gather historical data such as number and kinds of promotions or reassignments and internal movements of the clerical workforce. Users external to DCASR Dallas receive information from it which is directly related to such purposes as the resolution of EEO complaints or grievances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in the GE Mark III time-shared computer system, presumably on magnetic discs. Records for the second fiscal year preceding the current one are transferred to paper tape and stored in the DCASR Dallas Office of Civilian Personnel.

RETRIEVABILITY:

Information in the system may be retrieved using any data element contained in the system. While it is possible to retrieve all of the information on a specific individual, this is not normally done. Information identifiable to a specific individual is accessed by name.

SAFEGUARDS:

Records can be accessed only by individuals who know the files structure and are familiar with the software required. In addition, access to the system requires use of an access code and password known only to selected individuals in the Office of Civilian Personnel.

RETENTION AND DISPOSAL:

Records are retained in computer memory for no more than 24 months. Records from the second previous fiscal year and earlier are transferred to paper tape and stored in the Civilian Personnel Office. Records are destroyed when they pertain to the sixth previous fiscal year.

SYSTEM MANAGER(S) AND ADDRESS:

Civilian Personnel Officer, Office of Civilian Personnel, DCASR Dallas.

NOTIFICATION PROCEDURE:

Individuals who desire to know if the system contains information on them should contact the SYSMANAGER, and should provide last name, dates of employment with DCASR Dalls, title, series and grade of current (or last) position held. An individual may visit the Office of Civilian Personnel to obtain information on whether the system contains records pertaining to that person. For personal visits, a current employee of the DCASR need only verbally identify himself or herself. Former employees need to provide positive identification (such as a driver's license) and the last Standard Form 50 (Notification of Personnel Action) from their employment at the DCASR.

RECORD ACCESS PROCEDURES:

Individuals may determine how to gain access to records by contacting the Civilian Personnel Officer, DCASR Dallas at the mailing address listed in the Department of Defense Directory in the appendix to the DLA system of records notice.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determination by the individual concerned may be obtained from the SYSMANAGER.

RECORD SOURCE CATEGORIES:

All information in the system is taken from the employee's official personnel folder except that the appraisal of the value of employees separating from DCASR Dallas is provided by the immediate supervisor of the employee.

S335.01DLA-K

SYSTEM NAME:

335.01 Training and Employee Development Record Systems

SYSTEM LOCATION:

Headquarters, Defense Logistics Agency (DLA) and Primary Level Field Activities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Civilian employees, U.S. citizens and foreign national direct hires receiving training supported by the Federal Government, paid from appropriated funds. Department of Defense military personnel may be included in the automated training information system, and non-appropriated fund personnel may be included in some of the installation manual records.

CATEGORIES OF RECORDS IN THE SYSTEM:

Automated and non-automated records are maintained reflecting information pertaining to the employees' identification, social secutiry number, occupational status (series, grade level and supervisory status) course identification, course length, category and purpose of training received, date on which training was completed, associated costs, pre-post test results, et al. Input documents for the systems include, but are not limited to completed automated forms, training reports, authorization and record, key punched cards. The manual files are maintained in paper folders containing employees' registration and/or record of training documents. Apprentice, on-the-job training program, and similar trainee intake program manual and automated records are maintained, reflecting information pertaining to subject employee's identification, date of birth, entrance date of program, dates and nature of personnel actions which occurred during fiscal year, student progress, and statistical data which effects the numbers of apprentices in training as of a given date. At Headquarters level, nomination forms and documents (non-automated) for centrally-administered education and training programs are maintained. The manual files contain the candidate's nomination documents, training request, enrollment and registration and other documents related to training. Manual files are maintained at installations regarding courses conducted on their premises, or for which they sponsor, listing such things as completion dates and course participants. Additionally, manual files are typically found at the field activities containing information regarding an employee's supervisory status, an indication as to whether or not he/she has participated in supervisory training. Files are often maintained regarding an employee's certification/recertification or demonstrated proficiency in one or more skills areas; an activity-wide annual training plan should also be maintained, as well as individual training plans. Files are also maintained regarding professional licenses held by installation personnel.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 4103, 4118, AND 4115.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Officials and employees of the Department of Defense components in the performance of their official duties related to the management of the Defense components civilian employee training programs, the design, development, maintenance and operation of the manual and automated system of record keeping and reporting; the screening and selection of candidates for centrally administrated programs; and administration of grievance, appeals, complaints and litigation involving the disclosure of records of the training programs. Representatives of the United States Civil Service Commission on matters relating to the inspection, survey, audit or evaluation of Defense components civilian training programs, or such other matters under the jurisdiction of the Commission. The Comptroller General or any of his authorized representatives, in the course of the performance of duties of the General Accounting Office relating to the Defense components civilian training programs. The Attorney General of the United States or his authorized repre- sentatives in connection with litigation, law enforcement, or other matters under the direct jurisdiction of the Department of Justice or carried out as the legal representative of the Executive Branch agencies. Officials and employees of other Departments and agencies of the Executive Branch of Government upon request in the performance of their official duties related to the screening and selection of candidates for programs sponsored by their organization. Representatives of the United States Department of Labor on matters relating to the inspection, survey, audit or evaluation of the Defense components apprentice training programs or on other such matters under the jurisdiction of the Labor Department. Representatives of the Veterans Administration on matters relating to the inspection, survey, audit or evaluation of the Defense components apprentice and on-the-job training programs. The Computer-systems group contractor (or other such contractor) and its employees for the purpose of card punch recording of data from employee training documents. A duly appointed hearing examiner or arbitrator for the purpose of conducting a hearing in connection with an employee's grievance involving the disclosure of the records of the Defense Department's components training programs. An arbitrator who is given a contract pursuant to a negotiated labor agreement to hear an employee's grievance involving the disclosure of the records of the Defense component's training and employee development record system.

The Senate or the House of Representatives of the United States or any committee or sub-committee thereof, any joint committee of Congress or sub-committee, or joint committees on matters within their jurisdiction requiring disclosure of the files or records of the Defense Department's civilian training program.

Representatives of educational institutions which have been awarded contracts to conduct training for Defense components create and maintain individual training records of those who attend.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated records are stored on magnetic tapes, drums, computer printouts, and on punched cards. Manual records are stored in paper file folders.

RETRIEVABILITY:

Automated records are retrieved by SSN and name, or by one, or a combination of data elements contained in the program master files. Manual records are retrieved by employee last name, by course control information, or by training program title.

SAFEGUARDS:

The computer facilities are located in restricted areas accessible only to authorized persons that are properly screened, cleared and trained. Manual records and computer printouts are available only to authorized personnel having a need-to-know.

RETENTION AND DISPOSAL:

Manual records are maintained on a fiscal year basis and are retained for varying periods from one to five fiscal years. For centrally administered programs, files on selected candidates are maintained for five years (from date selection process is completed). Records of non-selected candidates are retained only for that period of time sufficient to permit appropriate review (usually less than 60 days). Some installation records are maintained for varying periods.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Purposes of this system are to prepare reports required by the Executive, Legislative and Judicial Branches of government, and to provide information to officials of DLA for effective personnel administration.

Information is used: To provide management data for use of HQ DLA and Field officials. For transfer of current data to the Civil Service Commission on a monthly basis for inclusion in their Central Personnel Data File.

For disclosures to members or committees of Congress with a stated valid need for the information in the performance of their official duties. To furnish or publish information on the DLA Civilian workforce to Federal Agencies, the Congress, or courts of law,

and other Freedom of Information Releases.

To provide information in litigation and other administrative review processes.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape and disc, computer paper printouts, microfiche.

RETRIEVABILITY:

Records identified to a specific civilian employee are accessed and retrieved by social security account number.

SAFEGUARDS:

Paper printouts or microfiche records which contain only statistical information are released to responsible persons whose stated needs are not in violation of Federal Statute.

Paper printouts or microfiche records which contain individually identifiable information are releasable only under conditions authorized by Federal Statute.

Records are secured in appropriate storage and/or file cabinets when not under the control of Personnel Office officials during duty hours.

During non-duty hours, records are secured in either locked storage and/or file cabinets. The area in which the records are secured is protected by a building security guard system.

Individually identifiable personnel documents will either be hand- carried or will be transmitted in envelopes addressed to a specific office or individual and marked to be opened by addressee only.

Magnetic tape and disc are kept in the computer room which is itself a security container with locked door and access limited to persons appropriately cleared and identified. Tapes and disc packs are stored in a tape library when not used in processing and are logged in and out only to cleared personnel with an official need. Tapes are transmitted to the Civil Service Commission by mail or courier. Reports with individual data are closely controlled. Personnel who process these reports are appropriately cleared and maintain continuous observation of reports during all processing phases. Reports are kept under appropriate physical safeguards when not being processed or used.

An individual requesting information in records must identify self and his relationship to the individual upon whom the record information is being requested.

An individual other than the individual of record must specify what information is requested and the purpose for which it would be used if disclosed. The SYSMANAGER or his delegated assistant determines if request is reasonable and consistent with provisions of the Freedom of Information Act and the Privacy Act of 1974.

Physical access, that is the ability to obtain the record, is limited to:

Personnel Office officials
Civil Service Commission officials
Data processing officials
Supervisors for those records which they are authorized to maintain

RETENTION AND DISPOSAL:

Printouts or microfiche reports are considered as working papers to support particular projects, inquiries, studies or administrative need. They will be retained until the purpose for which generated has been met. They will then be destroyed by shredding or burning.

Data maintained on magnetic tape or disc are to be retained for five years. They will then be degaussed.

SYSTEM NAME:

339.50 Supervisors' Personnel Records

SYSTEM LOCATION:

Office of supervisor or manager having supervision over the individual employee, at each Defense Logistics Agency, (DLA) activity.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

DLA civilian employees, full time and part time, paid from appropriated or nonappropriated funds.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of supervisors who are geographically accessible to their employees' Official Personnel Folders may contain Standard Forms 7A and 7B (Employee Record Card and continuation); Supervisor's copy of position description, performance evaluations, other evaluations for official purposes (such as promotion or for application for other positions); supervisor's notations of employee successes or short comings, for use in developing performance evaluations, for counseling employees and for basing disciplinary actions; records of training requested, scheduled or taken; printouts from automated personnel systems providing supervisors with day-to-day operating level information concerning their employees; letters, documents, notations or other information maintained only temporarily by the supervisor regarding an individual employee during the time some particular action relating to the employee is being planned or taken. Information in these records will be the

minimum essential to effective supervision. An operating or work personnel folder may be maintained by operating officials in field offices geographically remote from the personnel office, or by personnel or administrative offices of field installations that do not have full delegated personnel management authority (and their official personnel folders are maintained by higher echelon in another city or geographic location). In addition to the contents listed above, such records may contain information on employee experience, education, special qualifications and skills and conduct.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Supervisors, managers and other officials of the DLA in carrying out their official duties for supervision and counseling of civilian employees and the administration of employee evaluation, discipline and training.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual records in file folders or in card files. Records in this system will be kept at only one organizational level and not duplicated in other organizational levels.

RETRIEVABILITY:

By employee name or by organizational segment or, in some cases, by name within subject matter, such as training.

SAFEGUARDS:

All records are maintained under the strict control of the supervisor or other management official and are accessible only to authorized persons. They are retained in locked cabinets or in supervisors' locked desk drawers or in a secured room or area.

RETENTION AND DISPOSAL:

Records are maintained during the employee's tenure with the particular supervisor or organization and, after purging, are transferred to the employee's subsequent supervisor if in the same DLA activity. When an employee leaves the activity through transfer or other separation the records will be sent to the personnel office for comparison with the official personnel folder. The personnel office will screen the records to ensure that no documents are included which should be permanently filed in the official personnel folder and then destroy the remainder. Documents which are purged from the official personnel folder during employment are also purged from supervisor's records.

SYSTEM MANAGER(S) AND ADDRESS:

Civilian Personnel Officer servicing the DLA activity involved.

NOTIFICATION PROCEDURE:

Requests for information will normally be addressed to the employee's immediate supervisor or to a higher level supervisor. Request by correspondence should be addressed to the Civilian Personnel Officer of the particular activity where the individual is employed or was formerly employed. Mailing addresses are provided in the Department of Defense component directory published in the Federal Register. The letter should contain the full name of the requestor and his signature.

DEFENSE INVESTIGATIVE SERVICE

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required, to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established, that are applicable to every record system maintained within the Department of Defense, unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below, only once in the interest of simplicity, economy and to avoid redundancy, before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE - LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE - DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE - DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE - CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

ROUTINE USE WITHIN THE DEPARTMENT OF DEFENSE

A record from a system of records maintained by this component may be disclosed as a routine use to other components of the Department of Defense if necessary and relevant for the performance of a lawful function such as, but not limited to, personnel actions, personnel security actions and criminal investigations of the Component requesting the record.

ROUTINE USE - PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of Defense published on or before August

22, 1975, will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE - DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this Component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE - DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this Component may be disclosed to State and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S.Code, Sections 5516, 5517, 5520, and only to those State and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE - DISCLOSURE OF INFORMATION TO NARS (GSA)

A record from a system of records maintained by this component may be disclosed as a routine use to the National Archives and Records Service of the General Services Administration in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

ROUTINE USE - DISCLOSURE TO DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

All systems of records relating to compensation, employment or retirement, or extracts therefrom, maintained by this Component may be disclosed as a routine use to the Department of Health, Education, and Welfare for the purpose of comparing such record with records of programs administered by and in the possession of the Department of Health, Education, and Welfare in order to verify information where such verification is required by law or regulation or to identify violations or potential violations of law, whether criminal, civil, or regulatory, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To insure that the acceptance or retention of persons to sensitive DoD positions, or granting individuals access to classified information, including those employed in defense industry, is clearly consistent with national security;

For maintenance and use by the requesting activity when collected during reciprocal investigations conducted for other DoD and federal investigative elements;

For dissemination to appropriate federal agencies or other DoD components when information regarding personnel security matters is reported by ISR; and

To furnish orally or by letter criminal information which is received by DIS personnel in the course of their duties which is of direct interest to local law enforcement agencies.

Users of DIS investigative information are:

DIS personnel in the course of their official duties.

Other accredited DOD investigative components, DOD agencies, elements of the Military Departments designated by the departments and representatives of the Secretary of Defense and the Joint Chiefs of Staff.

Accredited Federal criminal and civil law enforcement and intelligence agencies.

State and local official criminal law enforcement agencies.

Other accredited federal agencies conducting investigations to evaluate suitability for employment or access to classified information.

Congressional committees and the Government Accounting Office.

Specific uses of DIS investigative records are:

To determine the loyalty, suitability, eligibility, and general trustworthiness of individuals for access to Defense information and facilities.

To determine the eligibility and suitability of individuals for entry into and retention in the Armed Forces.

To provide information pertinent to the protection of persons under the provisions of 18 U.S.C. 3056.

For use in criminal law enforcement investigations including statutory violations, counterintelligence, as well as counterespionage and other security matters.

In the event that records maintained in this system indicate a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

To provide information in judicial or adjudicative proceedings including litigation, or in accordance with a court order.

To make statistical evaluations of DIS investigative activities.

To respond to Freedom of Information and Privacy Act access requests.

To provide information in response to Inspector General, and EEO or other complaint investigations and Congressional inquiries.

To determine the eligibility and suitability of an individual for personnel actions in the Armed Forces of the United States, as deemed appropriate.

A record such as identification data, from this system of records may be disclosed as a routine use to a federal, state local or foreign agency maintaining relevant information or to business enterprises to obtain employment records if necessary to obtain information relevant to an assigned investigation.

A record from this system of records may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

To transfer information from this record system to other DoD components.

SYSTEM NAME:

V5-02 Defense Central Index of Investigations (DCII)

SYSTEM LOCATION:

Central Facility:

Information Services Division, Personnel Investigations Center, PO Box 1211, Baltimore, Maryland 21203.

Remote Terminal Locations:

Crime Records Directorate, US Army Criminal Investigations Command, 2301 Chesapeake Avenue, Baltimore, Maryland 21222 Air Force of Special Investigations, Bolling AFB, Washington, D. C. 20332.

Naval Investigative Service Headquarters, Hoffman Building #1, 2461 Eisenhower Avenue, ATTN: Code 30, Alexandria, Virginia 22331

Defense Industrial Security Clearance Office, P. O. Box 2499, Columbus, Ohio 43216 (DISCO)

US Army Investigative Records Repository, Building 4452, Fort Meade Maryland 20755 . DIS Personnel Investigations Center, P. O. Box 1211, Baltimore, MD 21203.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any person described as a subject, a victim, or a cross-reference in an investigation completed by or for a DOD investigative organization when that investigation is retained by the organization and the name is submitted for central indexing.

CATEGORIES OF RECORDS IN THE SYSTEM:

DCII MASTER INDEX

Composed of locator references to investigations conducted by or for DOD investigative organizations and retained by them. Index records contain the name and other personal identifying information on individuals who were indexed.

FILE TRACING

Reference to an investigation maintained by one of the investigative records repositories. It identifies the individual by name and personal identifiers, the custodian of the file, the year indexed and the number used by the repository to locate the file.

OPEN CASE TRACING

A record input by either Army investigative activities or DIS reflecting the existence of an investigation in progress. It identifies the subject individual by name and personal identifiers, the location of the open investigation, the year indexed and the number used to locate the investigative file.

NAC PENDING TRACING

Record of a National Agency Check (NAC) investigation in progress. It identifies the subject individual by name, personal identifiers, the case number, the category of the requester of the NAC, and the type of NAC being run.

NAC HISTORY TRACING

A record of completed favorable, or incomplete, national agency checks. It identifies the individual by name and personal identifiers, the date the NAC was completed and the agencies that were checked.

DCII NAME ONLY INDEX (NOI)

Composed of names of persons who are referenced but not fully identified in investigative files. A Name Only Index record identifies the individual by name and lists the custodian agency of the file, year indexed and the number used by the repository to locate the file. Positive identification is impossible from the index and may well be impossible from the case file itself. DIS has placed no records in this index.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301 Departmental Regulations

44U.S.C. 3101 Records Management

Memorandum, Secretary of Defense, May 27, 1965

Memorandum, Secretary of Defense, December 3, 1965, subject: Establishment of a Central Index of DOD Investigations.

DOD Directive No. 5105.42, April 18, 1972, subject: Charter for Defense Investigative Service (DIS).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

File tracing information is collected and maintained in the DCII so that authorized users may determine the existence and location of DOD investigative records.

NAC history information is maintained for authorized users in granting clearances, access to defense installations, entry into military service or employment in sensitive civilian positions.

Categories of users:

Components listed under the LOCATION caption are the principal users and (with the exception of DISCO) the file custodians. Listed terminal holders (with the exception of DISCO) may release general DCII information to users of their investigative records or listed in their investigative records systems descriptions in this register.

It should be noted that information contained in the system is regarded as the property of the submitting activities. DIS can neither monitor, nor assume responsibility for the propriety or accuracy of the data in the system, other than that portion belonging to DIS.

Transfer of information from this records system to other DOD components is a routine intra-agency use under the provisions of 5 U.S.C. 552a3(b)(1). The use of the DCII by terminal holders to advise requesters of the possible location of information, where there is no disclosure of personal information from the DCII, does not require an accounting.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Master Index data is maintained in direct access storage devices, disk and data cell. It is also contained on magnetic tape for continuity of operations purposes to permit processing at alternate locations in the event of computer failure.

Name Only Index data is maintained on magnetic tape and microfiche. Each contributor is provided his portion on a quarterly basis.

RETRIEVABILITY:

Master Index records are accessed through name and at least one personal identifier (PID). Personal identifiers are: date of birth, place of birth, social security number and the last four (4) digits of military service number. Inquiries may enter the system in card form or by being keyed in at remote terminals. A non-standard retrieval capability also exists which permits retrieval without PID, or on parts of a name, and produces references to all individuals by that name. It should be noted that in many cases, the subject's SSAN is necessary to make a positive identification.

Name Only Index records are accessed through the name or some portion thereof. Records are retrieved based on an exact match with the name submitted. Inquiries may enter the system only in card form.

SAFEGUARDS:

Generalized validation is provided in batch retrieval through program edits to prevent unauthorized access.

User terminals with access to the Master Index are located in controlled access areas. Access to the system is limited to specified time of the day. Terminals are connected via dedicated data circuits which prevent access from standard dial-up telephones.

Activities must be a part of DOD and accredited on the basis of authorized requirements before a new terminal is established or before batch requests will be honored and processed. Terminal holders, and organizations authorized access by other means, are responsible for insuring that individuals and organizations to whom they disclose index information have appropriate authority and need to know.

The computer room is located within a building controlled by security personnel at all times. Identification badges are required for entrance. Access to the computer room is controlled by a combination lock on the entrance. Critical backup files are stored in locked fireproof data safes.

RETENTION AND DISPOSAL:

Retained for as long as files are retained. When the record repository disposes of the file, they are responsible to delete all index tracings pertaining thereto, in accordance with established procedures. Processing of a deletion transaction flags the computer record which precludes it being given out thereafter. Such flagged records are eliminated from the system during periodic file restructuring procedures.

Open Case Tracings. Retained for as long as the investigation is open. When the investigation is completed, the contributor replaces the open case tracing with a file tracing as described above.

NAC History Tracings. Retained for a period of four (4) years from the date of completion and then automatically deleted unless specific action is sooner taken to delete the record. Should a subsequent favorable NAC be completed, the entering of a new history record will delete the first history record.

NAC Pending Tracings. Retained until completion of the NAC at which time they are replaced by a NAC History or file tracing, unless sooner deleted by the originator.

REQUESTING RECORDS

Records are retrieved by name or by some other personal identifier. It is therefore especially important for expeditious service when requesting a record that particular attention be provided to the Notification and/or Access Procedures of the particular record system involved so as to furnish the required personal identifiers, or any other pertinent personal information as may be required, to locate and retrieve the record.

BLANKET ROUTINE USES

Certain blanket 'routine uses' of the records have been established, that are applicable to every record system maintained within the Department of Defense, unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published below, only once in the interest of simplicity, economy and to avoid redundancy, before the individual record system notices begin rather than repeating them in every individual record system.

ROUTINE USE - LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE - DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

ROUTINE USE - DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE - CONGRESSIONAL INQUIRIES

Disclosure from a system of records maintained by this component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

ROUTINE USE WITHIN THE DEPARTMENT OF DEFENSE

A record from a system of records maintained by this component may be disclosed as a routine use to other components of the Department of Defense if necessary and relevant for the performance of a lawful function such as, but not limited to, personnel actions, personnel security actions and criminal investigations of the Component requesting the record.

ROUTINE USE - PRIVATE RELIEF LEGISLATION

Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

ROUTINE USE - DISCLOSURES REQUIRED BY INTERNATIONAL AGREEMENTS

A record from a system of records maintained by this Component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities in order to comply with requirements imposed by, or to claim rights conferred in international agreements and arrangements including those regulating the stationing and status in foreign countries of Department of Defense military and civilian personnel.

ROUTINE USE - DISCLOSURE TO STATE AND LOCAL TAXING AUTHORITIES

Any information normally contained in IRS Form W-2 which is maintained in a record from a system of records maintained by this Component may be disclosed to State and local taxing authorities with which the Secretary of the Treasury has entered into agreements pursuant to Title 5, U.S.Code, Sections 5516, 5517, 5520, and only to those State and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin Nr. 76-07.

ROUTINE USE - DISCLOSURE TO THE OFFICE OF PERSONNEL MANAGEMENT

A record from a system of records subject to the Privacy Act and maintained by this component may be disclosed to the Office of Personnel Management concerning information on pay and leave, benefits, retirement deductions, and any other information necessary for the Office of Personnel Management to carry out its legally authorized Government-wide personnel management functions and studies.

ROUTINE USE - DISCLOSURE OF INFORMATION TO NARS (GSA)

A record from a system of records maintained by this component may be disclosed as a routine use to the National Archives and Records Service of the General Services Administration in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

ROUTINE USE - DISCLOSURE TO DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

All systems of records relating to compensation, employment or retirement, or extracts therefrom, maintained by this Component may be disclosed as a routine use to the Department of Health, Education, and Welfare for the purpose of comparing such record with records of programs administered by and in the possession of the Department of Health, Education, and Welfare in order to verify information where such verification is required by law or regulation or to identify violations or potential violations of law, whether criminal, civil, or regulatory, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto.

WUSU01

SYSTEM NAME:

Uniformed Services University of the Health Sciences (USUHS) Personnel files.

SYSTEM LOCATION:

A central personnel record file will be maintained at USUHS Civilian Personnel/ Manpower Directorate, 4301 Jones Bridge Road, Bethesda, MD 20014. Copies of 171's and curriculum vitae's of applicants and employees will be maintained in the Civilian Personnel/ Manpower Directorate by the Dean of the School of Medicine, and by the Department Chairperson, having a need for the information. Limited hardcopy information files are maintained at the USUHS military personnel office. A supplemental file consisting of summary data on each civilian employee will be stored in the computer at Bolling Air Force Base (AFB), Washington, D.C. 20332; for military personnel assigned to USUHS: at Walter Reed Army Medical Center (WRAMC) military personnel office, Parklawn Bldg., Rockville, MD 20850. Biographical information on students to be maintained in the Commandant's office.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Records will be maintained on all personnel assigned to USUHS full-time and part-time.

CATEGORIES OF RECORDS IN THE SYSTEM:

The type of information which will be maintained on employees is as follows: Identity and demographic information (e.g., Social Security Number (SSN), name, sex, address, birth date, minority status, etc.); Academic and experience background data consisting of: (1) Schools attended; (2) Degrees earned; (3) Work experience, awards, etc.; (4) Letters of reference, performance evaluation, etc.; (5) Time and attendance cards; and (6) Biographical data file.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 10, United States Code, Section 136.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

INTERNAL USERS, USES, AND PURPOSES

The System will be used for documenting the work experience of applicants and USUHS personnel and for notification of key personnel in case of emergency during nonworking hours. Biographical data file will be used for providing background information on USUHS students to lecturers.

EXTERNAL USERS, USES, AND PURPOSES

See Office of the Secretary of Defense (OSD) Blanket Routine Uses at the head of this Component's published system notices.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Material stored in file folders at USUHS, supported by automated copies of pertinent data of each employee's folder which are maintained on magnetic tape and disk at USUHS Civilian Personnel/Manpower Directorate, Bethesda, MD 20014.

RETRIEVABILITY:

The system will be indexed by name and Social Security Number (SSN). Also, any combination of data in the file can be used to select individual data. Only Civilian Personnel/Manpower Directorate personnel will be provided with the password that allows access to the data, and those individuals are authorized access to all data in the file. Records will be available to: the individual concerned; employees of USUHS on a need-to-know basis; other agencies of the Government to satisfy requests for routine reports.

SAFEGUARDS:

The files will be maintained in securable file cabinets located in a limited access area at the University. The computer hardware, disks, tapes and other material are secured in locked cabinets in a controlled and guarded area. Access is via controlled dial-in and is password controlled.

Passwords are changed semiannually, or upon the departure of any person knowing the password.

The automated system is operated by USUHS Civilian Personnel/Manpower Directorate personnel and only those personnel will be given the password and user identification information needed to access the computer system. These persons are authorized access to all fields in the data base. While the file is primarily indexed on Social Security Numbers (SSN), and name, any combination of fields and data within fields can be used to select individual records.

RETENTION AND DISPOSAL:

Indefinite files that are retained while the individual is employed and then retired.

SYSTEM MANAGER(S) AND ADDRESS:

The personnel officer of the University will be the custodian of this file (business address: 4301 Jones Bridge Road, Bethesda, MD 20014, telephone: 202-295-3080).

NOTIFICATION PROCEDURE:

Inquiries regarding the personnel files should be directed to the System Manager.

RECORD ACCESS PROCEDURES:

Information on the procedures for gaining access to and contesting records will be furnished each employee by the Personnel Office upon entry on duty with USUHS.

CONTESTING RECORD PROCEDURES:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

RECORD SOURCE CATEGORIES:

Information contained in the file is furnished by the employee, supervisors and references supplied by the employee.

Records will be maintained on all students who martriculate to the University.

CATEGORIES OF RECORDS IN THE SYSTEM:

Grade reports and instructor evaluations of performance/ achievement; transcripts summarizing by course title, grade, and credit hours; records of awards, honors or distinctions earned by students; and data carried forward from the Applicant File System, which includes records containing personal data, e.g., name, rank, Social Security Number (SSN), undergraduate school, academic degree(s), current addresses, course grades, and grade point average from undergraduate work and other information as furnished by nonGovernment agencies such as the American Medical College Admission Service which certifies all information prior to being submitted to the University.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 92-426, Chapter 104, Section 2114.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

INTERNAL USERS, USES, AND PURPOSES

The system will be used for: recording internships, residencies, type of assignment and other career performance data on USUHS graduates; providing academic data to each student upon request, e.g., transcripts, individual course grades, grade point average, etc.; providing academic data within the Uniformed Services University of the Health Sciences for official use only purposes; and providing data to the respective Surgeons General when a specific and authorized need requires it.

EXTERNAL USERS, USES, AND PURPOSES

Academic data may be provided to other educational institutions upon the written request of a student.

For other external uses, see Uniformed Services University of the Health Sciences (USUHS) Blanket Routine Uses at the head of this Component's published system notices.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records infile folders are stored at USUHS, supported by automated copies of subsets of each student's folder, which are maintained on magnetic tape and disk at the Air Force Data Services Center (AFDSC) in the Pentagon, Washington, D.C.

RETRIEVABILITY:

The system will be indexed by name and Social Security Number (SSN). Also any combination of data in the file can be used to select individual records. Only personnel in the Office of the Registrar will be provided with the password that allows access to the data, and those individuals are authorized access to all data in the file.

SAFEGUARDS:

Current hardcopy records, prior to processing for computer storage are retained in a safe located in a limited access area at the University. The initial source of automated data on each student is transferred directly from the admission system, WUSU04, when each new class is admitted. Only data for enrolled students is transferred. Teaching facility, instructor, course, and grade information are entered by Registrar personnel as they are received. Transcripts, Course Rosters, and Grade reports are produced at the terminal upon request by the Registrar's personnel. Approved special requests for data can be supported by ad hoc inquiry. Any combinations of data can be used to select individual records for special processing.

The computer facility is operated by the Air Force Data Services Center, the Pentagon, Washington, D.C. The computer hardware, disks, tapes and other materials are secured in an alarmed controlled and guarded area. Access is via access list, escort, or controlled dial-in to the unclassified computers, located in the center. Dial-in access for all system users is password controlled.

All access to AFDSC computers is via user identification and sign-on password, whether from a hardwired terminal or dial-in terminal. Computer software ensures that only properly identified users can access the Privacy Act files on this system. Passwords are changed semiannually, or upon the departure of any person knowing the password.

Hardcopy files are stored at the University, and computer files are stored on magnetic tape and disc at the Air Force Data Services Center in the Pentagon, Washington, D.C. The remote terminal retains no data.

The automated system is operated by Data Base Management System. In addition to the sign-on password, this system allows a user to access only those specific files authoried that user. Only Registrar personnel will be given the password and identification information needed to access the fields in the data base. while the file is primarily indexed on Social Security Number (SSN), and name, any combination of fields and data within fields can be used to select individual records.

RETENTION AND DISPOSAL:

Records will be maintained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

The Registrar, USUHS, 4301 Jones Bridge Road, Bethesda, Maryland 20014.

Paper records in file folders are stored at Uniformed Services University of the Health Sciences (USUHS). These are supported by automated copies of subsets of each student's folder, which are maintained on magnetic tapes and disks at the Office of Computer Operations, USUHS, Bethesda, Maryland 20814.

RETRIEVABILITY:

The system is indexed by name and social security number (SSN). Also, any combination of data in the file can be used to select individual records. Only personnel in the Office of the Assistant Dean for Graduate and Continuing Education, USUHS, with an official need for the data are provided with the password that allows access.

SAFEGUARDS:

The files are maintained in secured file cabinets located in a limited access area of the University. The computer hardware, disks, tapes and other materials are secured in locked cabinets in a controlled and guarded area. Computer access is via controlled dial-in and is password controlled. Passwords are changed semiannually, or upon the departure of any person knowing the password.

The automated system is operated by Office of Computer Operations, USUHS, and only personnel with an official need to know are given the password and user identification information needed to access the computer system. While the file is primarily indexed by social security number (SSN) and name, any combination of fields and data can be used to select individual records.

RETENTION AND DISPOSAL:

Records on disenrolled and nonselected individuals are maintained for three years. Records on matriculated students will be maintained permanently.

SYSTEM MANAGER(S) AND ADDRESS:

The Assistant Dean for Graduate and Continuing Education, USUHS, 4301

Jones Bridge Road, Bethesda, Maryland 20814.

NOTIFICATION PROCEDURE:

Information may be obtained from: Assistant Dean for Graduate and Continuing Education, USUHS, 4301 Jones Bridge Road, Bethesda, Maryland 20814. Telephone: 202/295-3106.

RECORD ACCESS PROCEDURES:

Requests to review individual students' records should be made in writing to the Office of the Assistant Dean for Graduate and Continuing Education, USUHS, 4301 Jones Bridge Road, Bethesda, Maryland 20814. Written requests must include name, social security number and dates of attenndance or application.

CONTESTING RECORD PROCEDURES:

The rules for access to records and for contesting contents and appealing initial determination by the individual concerned are contained in 32 CFR 286b (See also OSD Administrative Instruction Number 81).

Rules and Regulations

Federal Register
Vol. 48. No. 110
Tuesday, June 7, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 581

Processing Garnishment Orders for Child Support and/or Alimony

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management revises its regulations concerning the processing of garnishment orders for child support and/or alimony. The revision clarifies the provision concerning the garnishment of payments disbursed by the Veterans Administration as compensation for a service-connected disability. The revision expressly provides that agencies will not be required to ascertain whether the court or other authority which issued the garnishment order had obtained personal jurisdiction over the obligor prior to its issuance of the order. In addition, Appendix A has been updated to include information concerning designated agents that OPM has received since December 30, 1980. There are also certain technical and typographical corrections.

EFFECTIVE DATE: July 7, 1983.

FOR FURTHER INFORMATION CONTACT: Murray M. Meeker, (202) 632–7600.

SUPPLEMENTARY INFORMATION: Proposed regulations were published in the **Federal Register** on January 7, 1983 (48 FR 811–812). A correction was published in the **Federal Register** on January 18, 1983 (48 FR 2130).

Analysis of Comments

The proposed regulations provided a 30-day period of public comment, during which time OPM received five written comments and several oral comments. The majority of the comments concerned the typographical error that appeared in 5 CFR 581.103(c)(4)(iv), but two commenters requested additional information concerning the substantive revision that was proposed for this section. As was explained in the Summary that preceded the proposed rule, the revision was suggested by the Veterans Administration to prevent possible misinterpretations in connection with the garnishment of disability compensation payments disbursed by the VA. OPM was advised that conflicting interpretations occurred when an individual waived all of his or her military retirement pay in order to receive VA compensation. In at least one instance, a court permitted the garnishment of disability compensation payments, notwithstanding the statutory provision that such payments are only subject to garnishment where the former member of the Armed Forces is *in receipt* of military retirement pay after having only *waived a portion* of his or her retirement pay. 42 U.S.C. 662(f)(2). The regulations now clarify that where the former member has waived the entire amount of his or her military retirement pay and is, therefore, no longer in receipt of retirement pay, that individual's disability compensation is *not* subject to garnishment.

Two Federal agencies submitted comments concerning the amendment to 5 CFR 581.305(f) which states that when a governmental entity receives legal process that appears to conform to the laws of the jurisdiction from which it was issued, the entity shall not be required to ascertain whether the authority which issued the legal process had obtained personal jurisdiction over the obligor. The amendment is consistent with the position that the Government has taken in litigation concerning this issue.

One commenter expressed the opinion that where an employee obligor dies, the checks for pay and allowances that were not received prior to the death should be subject to garnishment. In response to this suggestion we have amended the final rule to provide for the garnishment of several of the amounts listed in 5 U.S.C. 5581.

Noting that the proposed rule was intended to correct typographical errors, one individual commented that §§ 581.202(b) and 581.203(b) contained typographical errors. This final rule corrects those errors.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule as defined under Section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have significant economic impact on a substantial number of small entities because it applies only to the garnishment of remuneration for employment paid by the Federal Government.

Accordingly, OPM is amending 5 CFR Part 581 as set out below:

PART 581—PROCESSING GARNISHMENT ORDERS FOR CHILD SUPPORT AND/OR ALIMONY

1. In § 581.102, paragraph (f)(1)(ii) is revised to read as follows:

§ 581.102 Definitions.

* * * * *

(f) * * *

(1) * * *

(ii) A court of competent jurisdiction in any foreign country with which the United States has entered into an agreement that requires the United States to honor such process; or

* * * * *

2. In § 581.103, paragraphs (a)(23) (i)–(v) are added and paragraph (c)(4)(iv) is revised to read as follows:

§ 581.103 Moneys which are subject to garnishment.

(a) * * *

(23) Moneys due on account of the services of a deceased employee obligor, including: (i) Overtime or premium pay;

(ii) Amounts due as refunds of pay deductions for United States savings bonds;

(ii) Payments for accumulated and current accrued annual or vacation leave as provided for in section 5581 of title 5 of the United States Code;

(iv) Retroactive pay as provided for in section 5344(a)(2) of title 5 of the United States Code; and

(v) Amounts of checks drawn for moneys due which were not delivered by the governmental entity to the employee obligor prior to the employee obligor's death or which were not negotiated and returned to the governmental entity because of the death of the employee obligor, except those moneys due as set forth in § 581.104(i).

* * * * *

(c) * * *

(4) * * *

(iv) Any payments by the Veterans Administration as compensation for a service-connected disability or death, except any compensation paid by the Veterans Administration to a former member of the Armed Forces who is in receipt of retired or retainer pay if such former member has waived a portion of his/her retired pay in order to receive such compensation. In this case, only that part of the Veterans Administration payment which is in lieu of the waived retired/retainer pay is subject to garnishment. Payments of disability compensation by the Veterans Administration to an individual whose entitlement to disability compensation is greater than his/her entitlement to retired pay, and who has waived all of his/her retired pay in favor of disability compensation, are not subject to garnishment or other attachment under this part.

3. In § 581.104, the introductory text of paragraph (h) is revised, paragraphs (h)(2)(xiii) and (h)(2)(xiv) are revised, and paragraph (h)(2)(xv) and paragraph (i) are added to read as follows:

§ 581.104 Moneys which are not subject to garnishment.

* * * * *

(h) Reimbursement for expenses incurred by an individual in connection with his/her employment, or allowances in lieu thereof, and other payments and allowances, including, but not limited to:

* * * * *

(2) * * *

(xiii) Clothing allowances for enlisted personnel;

(xiv) Uniform allowances; and

(xv) Personal money allowances for General and Flag officers, and for the Surgeon General of the United States.

* * * * *

(i) Moneys due a deceased employee obligor where the amounts are:

(1) Reimbursement for expenses incurred by the deceased employee in connection with his/her employment, or allowances in lieu thereof, including: (i) Per diem instead of subsistence, mileage, and amounts due in reimbursement of travel expenses, including incidental and miscellaneous expenses in connection therewith;

(ii) Allowances on change of official station;

(iii) Quarters allowances; and

(iv) Cost-of-living allowances (COLA), when applicable as a result of the deceased employee obligor's having been in a foreign area or stationed outside of the continental United States or in Alaska.

(2) Amounts due for payment of cash awards for employees' suggestions.

4. In § 581.105, paragraph (f) is revised to read as follows:

§ 581.105 Exclusions.

* * * * *

(f) Are deducted as normal life insurance premiums from salary or other remuneration for employment, not including amounts deducted for supplementary coverage. Both Servicemen's Group Life Insurance and "Basic Life" Federal Employees' Group Life Insurance premiums are considered to be normal life insurance premiums; all optional Federal Employees' Group Life Insurance premiums and life insurance premiums paid for by allotment, such as National Service Life Insurance, are considered to be supplementary.

5. In § 581.202, paragraph (b) is revised to read as follows:

§ 581.202 Service of process.

* * * * *

(b) Service of legal process brought for the enforcement of an obligation to provide child support and/or alimony shall be accomplished by certified or registered mail, return receipt requested, or by personal service upon the appropriate agent designated in Appendix A to this part, or if no agent has been designated for the governmental entity having payment responsibility for the moneys involved, then upon the head of that governmental entity. The designated agent shall note the date and time of receipt on the legal process. The governmental entity shall make every reasonable effort to facilitate proper service of process on its designated agent(s). If legal process is not directed to any particular official within the entity, or if it is addressed to the wrong individual, the recipient shall, nonetheless, forward the legal process to the designated agent. However, valid service is not accomplished until the legal process is received in the office of the designated agent.

* * * * *

6. In § 581.203, paragraph (b) is revised to read as follows:

§ 581.203 Information minimally required to accompany legal process.

* * * * *

(b) If the information submitted is not sufficient to identify the obligor, the legal process shall be returned directly to the court, or other authority, with an explanation of the deficiency. However, prior to returning the legal process, if there is sufficient time, an attempt should be made to inform the party who caused the legal process to be served, or the party's representative, that it will not be honored unless adequate identifying information is supplied.

7. Section 581.301 is revised to read as follows:

§ 581.301 Suspension of payment.

Upon proper service of legal process, together with all supplementary documents and information as required by §§ 581.202 and 581.203, the head of the governmental entity, or his/her designee, shall identify the obligor to whom that governmental entity holds moneys due and payable as remuneration for employment and shall suspend, i.e., withhold, payment of such moneys for the amount necessary to permit compliance with the legal process in accordance with this part.

8. In § 581.304, paragraph (a) is revised to read as follows:

§ 581.304 Nonliability for disclosure.

(a) No Federal employee whose duties include responding to interrogatories pursuant to § 581.303(b), shall be subject to any disciplinary action or civil or criminal liability or penalty for any disclosure of information made by him/her in connection with the carrying out of any duties pertaining directly or indirectly to answering such interrogatories.

* * * * *

9. In § 581.305, paragraph (a)(6) is revised and paragraph (f) is added to read as follows:

§ 581.305 Honoring legal process.

(a) * * *

(6) Where notice is received that the obligor has appealed either the legal process or the underlying alimony and/or child support order, payment of moneys subject to the legal process shall be suspended until the governmental entity is ordered by the court, or other authority, to resume payments. However, no suspension action shall be taken where the applicable law of the jurisdiction wherein the appeal is filed requires compliance with the legal

process while an appeal is pending. Where the legal process has been issued by a court in the District of Columbia, a motion to quash shall be deemed equivalent to an appeal.

* * * * *

(f) If a governmental entity receives legal process which, on its face, appears to conform to the laws of the jurisdiction from which it was issued, the entity shall not be required to ascertain whether the authority which issued the legal process had obtained personal jurisdiction over the obligor.

10. In § 581.306, paragraph (a) is revised to read as follows:

§ 581.306 Lack of moneys due from, or payable by, a governmental entity served with legal process.

(a) When legal process is served on a governmental entity, and the individual identified in the legal process as the obligor is found not to be entitled to moneys (the entitlement to which is based upon remuneration for employment) due from, or payable by, the governmental entity, the entity shall follow the procedures set forth in the legal process for that contingency or, if no procedures are set forth therein, shall return the legal process to the court, or other authority from which it was issued, and advise the court, or other authority, that no moneys, the entitlement to which is based upon remuneration for employment, are due from, or payable by, the governmental entity to the named individual.

* * * * *

11. In § 581.402, paragraphs (a) and (b) are revised to read as folows:

§ 581.402 Maximum garnishment limitations.

* * * * *

(a) Fifty (50) percent of the obligor's aggregate disposable earnings for any workweek, where the obligor asserts by affidavit, or by other acceptable evidence, that he/she is supporting a spouse and/or dependent child, other than the former spouse and/or child for whose support such order is issued, except that an additional five (5) percent will apply if it appears on the face of the legal process, or from other evidence submitted in accordance with § 581.202(d), that such earnings are to enforce a support order for a period which is twelve (12) weeks prior to that workweek. An obligor shall be considered to be supporting a spouse and/or dependent child only if the obligor provides over half of the spouse's and/or dependent child's support.

(b) Sixty (60) percent of the obligor's aggregate disposable earnings for any workweek, where the obligor fails to assert by affidavit or establishes by other acceptable evidence, that he/she is supporting a spouse and/or dependent child, other than a former spouse and/or child with respect to whose support such order is issued, except that an additional five (5) percent will apply if it appears on the face of the legal process, or from other evidence submitted in accordance with § 581.202(d), that such earnings are to enforce a support order for a period which is twelve (12) weeks prior to that workweek.

* * * * *

12. Appendix A to Part 581 is revised to read as follows:

Veterans Administration

The fiscal officer at each VA facility shall be the designated agent for VA employee obligors at that facility. When a facility at which an individual is employed does not have a fiscal officer, the address and telephone number listed is for the fiscal officer servicing such a facility. In those limited cases where a portion of VA service-connected benefits may be subject to garnishment, service of process, unless otherwise indicated below, should be made at the regional office nearest the veteran obligor's permanent residence.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 354

[Docket No. 83–324]

Commuted Traveltime Allowances

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends administrative instructions prescribing commuted traveltime. These amendments change established commuted traveltime periods to reflect changes in the time necessarily spent in reporting to and returning from the place at which an employee of Plant Protection and Quarantine performs overtime or holiday duty when such travel is performed solely on account of such overtime or holiday duty. Such changes depend upon facts within the knowledge of the Animal and Plant Health Inspection Service.

EFFECTIVE DATE: June 7, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James R. Reynolds, Coordinator, National Administrative Planning Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 614 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7250.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final action has been reviewed under Executive Order 12291, and has been determined to be exempt from those requirements. Bert W. Hawkins, Administrator, Animal and Plant Health Inspection Service, has made this determination because commuted traveltime allowances are strictly a function of where the APHIS employee lives in relation to the place overtime or holiday duty is performed. As employees are transferred or change their residence or as the place of inspection changes, the number of hours of commuted traveltime allowed may change. These amendments merely reflect such changes and serve to notify the public of the new allowed hours.

It is to the benefit of the public that these instructions be made effective at the earliest practicable date. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

List of Subjects in 7 CFR Part 354

Agricultural commodities, Exports, Government employees, Imports, Plants (agriculture), Quarantine, Transportation.

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Plant Protection and Quarantine, by 7 CFR 354.1 of the regulations concerning overtime services relating to imports and exports, the administrative instructions appearing in 7 CFR 354.2, prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty are further amended by adding entries for Barksdale AFB, Shreveport, and England AFB, Alexandria, in Louisiana, and Ft. Hood in Texas, in appropriate alphabetical sequence to read as shown below:

§ 354.2 Administrative instructions prescribing commuted traveltime.

(64 Stat. 561 (7 U.S.C. 2260))

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the **Federal Register**.

Done at Washington, D.C., this 2d day of June 1983.

Harvey L. Ford,

Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 20 and 61

Low-Level Waste Licensing Branch Technical Position Papers on Radioactive Waste Classification and Waste Form; Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Rule-related notice.

SUMMARY: The NRC Low-Level Waste Licensing Branch, Division of Waste Management, has published technical position papers on radioactive waste classification and waste form. The technical position papers provide guidance to licensees regarding methods NRC staff consider acceptable for implementing the waste classification and waste form requirements in 10 CFR Part 61, "Licensing Requirements for Land Disposal of Radioactive Waste." The waste classification technical position paper describes overall procedures acceptable to NRC regulatory staff which may be used by licensees to determine the presence and concentrations of listed radionuclides. This technical position paper also provides guidance on the types of information which should be included in shipment manifests accompanying waste shipments to near-surface disposal facilities. The waste form technical position paper provides guidance to waste generators on test methods and results for waste forms meeting waste stability requirements. This technical position paper includes guidance on processing of waste into an acceptable stable form, designing acceptable high-integrity containers, packaging cartridge filters, and minimizing radiation effects on organic ion-exchange resins. The two technical position papers have been published in advance of formal regulatory guides, and should be useful to licensees in developing quality control programs to determine compliance with waste classification and waste form requirements as called for in the codified regulations.

ADDRESS: Copies of the technical position papers are available from Nancy Still, Licensing Process and Integration Branch, Division of Waste Management, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Mail Stop SS-623), telephone (301) 427-4087.

FOR FURTHER INFORMATION CONTACT: Low-Level Waste Licensing Branch, Division of Waste Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (Mail Stop SS-623), Attn: Paul H. Lohaus (301) 427-4500, G. W. Roles (301) 427-4593, or Timothy C. Johnson (301) 427-4697.

SUPPLEMENTARY INFORMATION: By **Federal Register** Notice dated December 27, 1982 (47 FR 57446), NRC amended its regulations to provide specific requirements for licensing facilities for the land disposal of low-level radioactive waste. The majority of these requirements are contained in a new Part 61 to Title 10 of the Code of Federal Regulations (10 CFR Part 61) entitled "Licensing Requirements for Land Disposal of Radioactive Waste." Some additional requirements governing waste generator activities such as certification and use of shipping manifests were concurrently published as a new § 20.311 of Part 20 ("Standards for Protection Against Radiation"). Other minor modifications, mostly of a procedural or administrative nature, were made to other parts of the Commission's regulations.

As noted in the December 27 **Federal Register** Notice, the effective date of 10 CFR Part 20, § 20.311 is December 27, 1983, while the effective date of 10 CFR Part 61 and all other amendments is January 26, 1983. Section 20.311 requires that any licensee who transfers radioactive waste to a land disposal facility or to a licensed waste collector or processor must classify the waste according to § 61.55 ("Waste Classification") of 10 CFR Part 61. Licensed waste processors who treat or repackage radioactive waste for disposal into a land disposal facility must also classify their waste according to § 61.55. This section of Part 61 defines radioactive waste suitable for disposal as falling into one of three classes (Class A, Class B, or Class C), and waste is determined to fall into one of the classes by comparison to limiting concentrations of some particular listed radionuclides. All classes of waste must meet certain minimum requirements while Class B and Class C waste must meet additional structural stability requirements as set forth in § 61.56 ("Waste Characteristics"). Section 20.311 also requires that waste generators record on shipment manifests a description of the transferred waste as well as a certification that the waste is properly classified and that the manifest is filled out correctly.

NRC staff recognizes that the new requirements may result in some modifications to existing licensee waste management practices, and furthermore believes that it will be useful to licensees to begin planning for implementation of the new requirements well in advance of the December 27, 1983 effective date. At this time NRC is preparing regulatory guides on both waste form and waste classification. To provide immediate guidance to licensees, however, the NRC Low-Level Waste Licensing Branch has prepared technical position papers on waste classification and waste form. Preparation and publication of these technical position papers are part of NRC staff's continuing efforts to work with vendors and individual licensees on acceptable procedures and processes for meeting the Part 61 requirements.

The waste classification technical position paper describes overall procedures acceptable to NRC staff which may be used by licensees to determine the presence and concentrations of the radionuclides listed in § 61.55, and thereby classifying waste for near-surface disposal. The technical position paper also provides guidance on the types of information which should be included in shipment manifests accompanying waste shipments to near-surface disposal facilities.

The technical position paper on waste form provides guidance to waste generators on test methods and results acceptable to NRC staff for implementing the 10 CFR Part 61 waste form requirements. It can be used as an acceptable approach for demonstrating compliance with the 10 CFR Part 61 waste structural stability criteria. This technical position paper includes guidance on processing of waste into an acceptable stable form, designing acceptable high-intergrity containers, packaging cartridge filters, and minimizing radiation effects on organic ion-exchange resins.

Previous draft versions of both technical position papers have been made available to interested members of the public. Comments received on these drafts have been considered during preparation of the technical position papers referenced by this Notice. Further public comment on these technical position papers is welcomed, and any such comment received will be considered as part of development of the waste form and waste classification regulatory guides. Comments on the technical position papers may be forwarded to Leo B. Higginbotham, Chief, Low-Level Waste Licensing Branch, Division of Waste Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555 (Mail Stop SS–623).

Copies of the waste form and waste classification technical position papers are being furnished to all NRC licensees. In addition, copies of the technical position papers are being furnished to all Agreement States for distribution to their licensees.

Dated at Silver Springs, Maryland, this 6th day of May 1983.

For the Nuclear Regulatory Commission.

Chief, Low-Level Waste Licensing Branch, Division of Waste Management.

BILLING CODE 7590–01–M

FEDERAL ELECTION COMMISSION

11 CFR Ch. I

Transfer of Funds; Collecting Agents, Joint Fundraising

AGENCY: Federal Election Commission.

ACTION: Transmittal of Regulations to Congress.

SUMMARY: FEC regulations at 11 CFR Part 102 have been revised and transmitted to Congress pursuant to 2 U.S.C. 438(d). These regulations govern transfers of funds between specified committees and establish procedures for joint fundraising by political committees. They also contain provisions which clarify the status of unregistered organizations that collect and transfer contributions on behalf of a connected separate segregated fund. Such unregistered organizations, termed "collecting agents", are distinguished from participants in a joint fundraiser. Further information on the revised regulations is provided in the supplementary information which follows.

EFFECTIVE DATE: Further action, including the announcement of an effective date, will be taken by the Commission after these regulations have been before the Congress 30 legislative days in accordance with 2 U.S.C. 438(d).

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 1325 K Street, NW, Washington, D.C. 20463, (202) 523–4143 or (800) 424–9530.

SUPPLEMENTARY INFORMATION: The revised regulations on joint fundraising and collecting agents are based upon public comment received in response to the Commission's Notice of Proposed Rulemaking (46 FR 48074; September 30, 1981). The title of current 11 CFR 102.6 has been changed to "Transfers of Funds; Collecting Agents" and corresponding revisions have been made to that section. In addition, a new section entitled "Joint Fundraising By Committees Other Than Separate Segregated Funds" has been included in the regulations, designated as 11 CFR 102.17. This section was designated as section 102.7 in the Commission's Notice of Proposed Rulemaking; however, it has been added as the last section in Part 102 to avoid changing the numerous citations throughout the Commission's regulations to current §§ 102.7 through 102.16.

2 U.S.C. 438(d) requires that any rule or regulation prescribed by the Commission to implement Title 2, United States Code, be transmitted to the Speaker of the House of Representatives and the President of the Senate prior to final promulgation. If neither House of Congress disapproves of the regulations within 30 legislative days of their transmittal, the Commission may prescribe the regulations in question. The following regulations were transmitted to Congress on June 2, 1983.

Explanation and Justification for 11 CFR 102.6 and 102.17

Section 102.6 Transfers of Funds; Collecting Agents

Section 102.6(a) Transfers of Funds; Registration and Reporting Required.

Following current section 102.6(a), subsections (a)(1)(i) and (a)(1)(ii) state that party committees of the same political party and affiliated committees may make unlimited transfers of funds. 2 U.S.C. §§ 441a(a)(4) and 441a(a)(5). Subsection (a)(1)(iii) incorporates 2 U.S.C. 441a(a)(5)(A) into the regulations by stating that participants in a joint fundraising activity conducted under § 102.17 may transfer joint fundraising proceeds without limit so long as no participant receives more than its allocated share of the funds raised. Subsection (a)(1)(iv) clarifies that transfers may only be made from funds which are permissible under the Act.

Subsection (a)(2) generally follows the provisions of current § 102.6(a) to state that transfers of funds count against the reporting thresholds and may trigger political committee status under the Act. Hence, an unregistered committee which makes or receives transfers for the purpose of influencing a federal election may be subject to the registration and reporting requirements of the Act.

Section 102.6(b) Fundraising by Collecting Agents; No Reporting Required.

This is a new section in the regulations which clarifies the application of the Act to fundraising on behalf of separate segregated funds. *See* Advisory Opinions 1982–61, 1982–55, 1982–11, 1981–4, 1979–19, 1978–98, and 1978–42. Subsection (b)(1) describes a collecting agent as an organization or committee that collects and transmits contributions to one or more separate segregated funds which are related to it. Generally, the collecting agent is an organization which is eligible to establish and administer a separate segregated fund under 11 CFR 114.5 such as a corporation or labor organization. *See* 11 CFR 100.6. Under this section, a collecting agent may be any of several types of entities. It may be a registered or unregistered affiliated committee or connected organization of the separate segregated fund. A collecting agent may also be a parent or subsidiary of the connected organization of a separate segregated fund. Moreover, a local, national or international union may act as a collecting agent for a separate segregated fund of any federation with which the union is affiliated.

The inclusion of this section is also intended to permit an unregistered organization to collect contributions on behalf of a connected separate segregated fund without triggering

political committee status under the Act. Transfers made by a collecting agent to a separate segregated fund in accordance with the requirements of subsection (c) do not trigger reporting requirements under the Act. Thus, subsection (b)(2) provides that unregistered organizations, such as a State PAC, union local or corporate subsidiary, which act as collecting agents following the procedures under subsection (c) need not register and report under the Act. This is consistent with the legislative history of the 1979 Amendments which indicates that Congress did not intend that reporting be required in this narrow circumstance. *See e.g.* 125 Cong. Rec. S19099 (daily ed. December 18, 1979) (statement of Sen. Pell) and 125 Cong. Rec. H12365 (daily ed December 20, 1979) (statements of Rep. Thompson and Rep. Frenzel).

Subsection (b)(3) specifies that neither commercial fundraising firms nor individuals who collect contributions for separate segregated funds will be considered collecting agents under this section. Rather, commercial fundraising firms will be considered the agent of the separate segregated fund or collecting agent. All persons who collect contributions are subject to the requirements of 11 CFR 102.8 and the provisions of 11 CFR Part 110.

Subsection (b)(4) clarifies that separate segregated funds are not required to utilize a collecting agent. While this section provides for the use of a collecting agent to solicit contributions, it does not prevent a separate segregated fund from soliciting and collecting contributions on its own.

Section 102.6(c) Procedures for Collecting Agents

This section describes the procedures to be followed by a collecting agent in soliciting and collecting contributions on behalf of a separate segregated fund. Subsection (c)(1) makes it clear that the separate segregated fund is responsible for the acts of the collecting agent and for ensuring that the recordkeeping, reporting and transmittal requirements of the Act are met. Inclusion of this provision is intended to encourage separate segregated funds to ensure that those collecting contributions on their behalf follow the Act and regulations.

Subsection (c)(2) provides that a solicitation for voluntary contributions to a separate segregated fund may be included in a bill for membership dues or other fees or in a solicitation for contributions to the collecting agent itself. *See* Advisory Opinions 1979–19 and 1978–42. Such solicitations may only be made to the solicitable class of the parent organization under 11 CFR Part 114, such as a corporation's stockholders and executive and administrative personnel, and must meet the requirements for a proper solicitation under 11 CFR 114.5. *See e.g. Federal Election Commission v. National Right To Work Committee*, — U.S. —, 103 S.Ct. 552 (Dec. 13, 1982). Subsection (c)(2)(i) states that the collecting agent may pay any or all of the costs of transmitting contributions as such payments are considered part of the establishment, administration and solicitation expenses permitted under 2 U.S.C. 441b(b)(2)(C). A provision has also been included in subsection (c)(2)(ii) which permits a collecting agent to reimburse its separate segregated fund for administrative expenses within 30 days after the separate segregated fund pays the expense if the expense could have been paid directly by the collecting agent under 2 U.S.C. 441b(b)(2)(C). A corresponding provision has been included in 11 CFR 114.5. It should be noted that an unregistered committee that is not a connected organization may trigger the registration and reporting requirements of the Act by making reimbursements under this section.

Subsection (c)(3) provides that a contributor may combine payment of dues or other fees with a contribution to the separate segregated fund in a single check. However, that subsection requires that the check be drawn on the contributor's personal checking account or on a non-repayable corporate drawing account of the individual contributor. *See also,* Advisory Opinions 1978–98, 1979–19 and 1978–42. Subsection (c)(3) also contains a provision which permits an employer to send a check to a union which includes payment of union dues or other employee deductions (such as vacation fund payments) and voluntary contributions from its employees to the union's separate segregated fund. Subsection (c)(3), thus, provides for combined payment of employee political contributions and other fees by an employer to a union or its agent. *See* Advisory Opinions 1982–55, 1982–11, 1981–4, and 1978–98. Contributions which may be so combined must be collected pursuant to a payroll deduction plan and are considered direct contributions from the individual employees.

One comment received by the Commission questioned the status of certain employee benefit plans, such as ERISA plans, under section 102.6. Under such plans, participants may designate a portion of the funds deposited with the plan on their behalf by their employer to be contributed to a separate segregated fund, such as their union PAC. The comment raised the issue of whether certain fiduciaries, such as ERISA plan administrators, should be considered collecting agents under this section. These fiduciaries, however, are considered agents of the plan's sponsor. As the sponsor is the employer or the union of the plan participants, a plan administrator or fiduciary is acting on behalf of a collecting agent. The Commission, therefore, found no need to refer specifically to this situation in the regulations.

Moreover, no special provision is needed to govern the timing of the transmittal of such contributions to the separate segregated fund. A contribution by the plan participant to the separate segregated fund results only when the participant designates a sum in writing to be contributed to the separate, segregated fund and that sum can be disbursed under the plan agreement, since that is the point at which the participant acquires the right to such funds. For example, under a vacation fund plan, vacation benefits are paid out at specified times of the year. Payments to third parties, such as separate segregated funds, may only be made at the same time that disbursements are made to plan beneficiaries under the plan agreement. *See* ERISA Interpretive Bulletin 78–1 (43 FR 68565 (December 15, 1978)). Under these circumstances, the time for transmitting a contribution to the separate segregated fund under § 102.6(c)(4) would not begin to run until the date on which disbursements can be made to the beneficiary.

Subsection (c)(4) clarifies that collecting agents must follow the requirements of 11 CFR 102.8 regarding the time for transmittal of contributions. Therefore, contributions of $50 or less collected by a collecting agent must be given to the separate segregated fund within 30 days after receipt. Contributions in excess of $50 must be forwarded to the separate segregated fund within 10 days of receipt.

This subsection also sets forth methods for transmitting contributions to a separate segregated fund. Pursuant to subsection (c)(4)(i), checks made out to the separate segregated fund must be transmitted by the collecting agent directly to the fund within the appropriate time period. Subsection (c)(4)(ii) establishes several options for transmittal of contributions in other forms. First, as under current § 102.6(b)(1), the collecting agent may choose to set up a transmittal account solely for the deposit and transmittal of funds collected on behalf of a separate segregated fund under subsection

(c)(4)(ii)(A). Funds deposited into this account are subject to the prohibitions and limitations of the Act. If an expenditure is made from funds in this account, other than a transfer of funds to an affiliated committee, the account will be considered a depository of the recipient committee and all activity of that account must be reported.

Alternatively, the collecting agent may deposit contributions collected into its own treasury account under subsection (c)(4)(ii)(B). If the collecting agent selects this method, it must keep separate records of all receipts and deposits which represent contributions to the separate segregated fund and make separate deposits of all cash contributions. *See e.g.* Advisory Opinion 1978–42.

Another method, stated in subsection (c)(4)(ii)(C), follows current § 102.6(b)(3). This subsection provides that the collecting agent may deposit contributions into an account maintained for State and local election activity. Under this option, the collecting agent must also keep separate records of all receipts and deposits which represent contributions to the separate segregated fund.

In addition to the other methods for transmitting contributions, subsection (c)(4)(ii)(D), permits the collecting agent to transmit cash contributions to the separate segregated fund in the form of money orders or cashiers checks. This provision generally follows current § 102.6(b)(2), although it is now limited to cash contributions.

Subsection (c)(5) requires that the collecting agent comply with the requirements of 11 CFR 102.8 in transmitting contributor information to a separate segregated fund. However, as under current § 102.6(b)(3), if contributions of $50 or less are received at a mass collection, the collecting agent must keep a record of the date, the total amount collected, and the name of the function at which the collection was made.

Finally, subsections (c)(6) and (c)(7) specify the recordkeeping and reporting responsibilities of collecting agents and separate segregated funds under this section. Pursuant to subsection (c)(6), a collecting agent is required to retain records of all contribution deposits and transmittals for three years and to make these records available to the Commission upon request. Similarly, the separate segregated fund must keep a record of all transmittals of contributions received from the collecting agent. It is not necessary that the separate segregated fund report contributions received from a collecting agent as transfers-in. Rather, under subsection (c)(7), the separate segregated fund is required to report each contribution received through the collecting agent as a contribution received from the original contributor as required by 11 CFR 104.3(a).

Section 102.17 Joint Fundraising By Committees Other Than Separate Segregated Funds.

(a) General. This subsection sets forth the basic rules for conducting joint fundraising activities. *See* Advisory Opinions 1979–75, 1979–35, 1979–12, 1979–6, 1977–61, 1977–23, 1977–14 and 1977–8. Subsection (a)(1)(i) states the general permission allowing political committees to engage in joint fundraising with other political committees or with unregistered committees or organizations. This subsection requires that the joint fundraising participants have a fundraising representative. The participants have the option of either establishing a separate political committee or selecting a participating political committee to act as the fundraising representative. Regardless of which method the participants select, the fundraising representative must be a reporting political committee under the Act and will be considered an authorized committee of each participating Federal candidate consistent with 2 U.S.C. 432(e)(3)(A)(ii). *See also* 11 CFR 102.13(c)(1). The participants may hire a commercial fundraising firm or other type of agent to assist in conducting the joint fundraiser. However, subsection (a)(1)(ii) makes it clear that participants hiring a commercial firm are still required to select or establish a fundraising representative.

Subsection (a)(2) describes the entities which may engage in joint fundraising and states that the procedures at subsection (c) govern all joint fundraising activities conducted under this section. The Commission notes that if all of the participants in a fundraising activity are party committees of the same political party, the participants will not have to adhere to the requirements of this section even though an agreement may have been reached as to the allocation of proceeds before the fundraiser takes place. Since the party committees could decide, after the fundraising was concluded, to transfer any amount of the proceeds among themselvces pursuant to 2 U.S.C. 441a(a)(4), the fact that an allocation formula had been previously agreed to would not trigger the joint fundraising requirements to provide notice of the recipients of the funds or to allocate contributions according to the prearranged formula, However, the party committees would have to follow the notice requirements of 11 CFR 102.5 if the activity is conducted in connection with both Federal and non-federal elections. In addition, if no notice is given regarding the intended allocation of contributions, the contributions received would count toward the contributor's limit for the party committee sponsoring the event, i.e., the national committee or State committee running the fundraiser.

Subsection (a)(3) distinguishes a joint fundraising representative conducting a joint fundraising activity from an unregistered organization acting as a collecting agent under 11 CFR 102.6(b). It also clarifies that the provisions of this section are inapplicable to a separate segregated fund or an unregistered organization operating as a collecting agent under § 102.6(b)

Section 102.17(b) Fundraising Representatives.

This section reiterates that participants in a joint fundraising activity must either establish a separate political committee or select a participating political committee to act as fundraising representative. In either case, the fundraising representative must be a political committee under 11 CFR 100.5. This section also describes the fundraising representative's responsibilities in conducting the joint fundraising activity. Specifically, the fundraising representative is responsible for collecting contributions, paying the costs of the fundraising effort, and disbursing the net proceeds to each participant.

Subsection (b)(3) specifies the amounts which may be advanced by each participant for start-up costs of the fundraiser. To avoid an in-kind contribution, subsection (b)(3)(i) provides that a participant may advance an amount in proportion to the allocation formula agreed upon under subsection (c)(1). A participant may advance more than its proportionate share of the fundraising costs under subsection (b)(3)(ii). However, the amount in excess of the proportionate share may not exceed the amount the participant could legally contribute to the other participants. Subsection (b)(3)(iii) provides that if all the joint fundraising participants are affiliated committees or party committees of the same political party, unlimited amounts may be advanced for fundraising costs since transfers among such committees are unlimited. *See* 11 CFR 110.3; 2 U.S.C. 441a(a)(4) and 441a(a)(5).

Section 102.17(c) Joint Fundraising Procedures.

This section sets forth the procedures for conducting joint fundraising activities. The first requirement, stated in subsection (c)(1), is that all the participants must enter into a written agreement which identifies the fundraising representative and states the formula for allocating the fundraising proceeds and expenses. The participants should make this agreement prior to engaging in any fundraising activity. The fundraising representative is required to retain this agreement for three years and make it available to the Commission upon request.

Furthermore, in addition to the disclaimer notice required by 11 CFR 110.11, subsection (c)(2) requires that each solicitation for contributions to a joint fundraiser contain a fundraising notice informing contributors of specific details of the fundraising activity. Subsections (c)(2)(i) (A) through (D) require that the fundraising notice contain the names of the participating committees, regardless of whether they are registered political committees; the allocation formula; a statement informing contributors that they may designate their contribution for a particular participant or participants; and a statement that the allocation formula may change if the contributor makes a contribution which exceeds the amount he or she could give to any participant. Subsection (c)(2)(ii) provides for special notices in two situations. For example, under subsection (c)(2)(ii)(A), if the participants are engaging in the joint fundraiser only to pay outstanding debts, the fundraising solicitation must state that the allocation formula may change if a participant receives enough funds to pay its debts. Subsection (c)(2)(ii)(B) requires that if any of the participants can lawfully receive contributions from sources prohibited under the Act, such as a State or local committee that can receive corporate contributions, the solicitations must state that any such contributions received will be given only to participants that can receive them.

Under the Commission's regulations, an agent or other person who receives a contribution on behalf of a political committee is required to forward that contribution to the committee treasurer within 10 or 30 days of receipt. 11 CFR 102.8. The contribution must then be deposited within 10 days in a designated committee depository. However, the Commission recognizes that, in the context of a joint fundraising event, it is common for the fundraising representative to receive contributions over an extended time period and retain them until all funds are received to ensure payment of expenses and proper distribution of proceeds.

Subsection (c)(3) is intended to address the aforementioned situation and resolve any possible conflict between the Commission's regulations and actual joint fundraising practices. Pursuant to subsection (c)(3)(i), the participants or joint fundraising representative are required to establish a separate account for the receipt and disbursement of joint fundraising proceeds. Under subsection (c)(3)(ii), contributions must be deposited into the separate account by the fundraising representative within 10 days of receipt as required by 11 CFR 103.3. The fundraising representative is not required, however, to distribute the proceeds to the participants until all contributions have been received and all expenses paid. Since each participating political committee must designate this account as an additional depository pursuant to subsection (c)(3)(i), such retention would not conflict with the Commission's regulations. Only funds permissible under the Act may be deposited into this joint fundraising account. If a participant can accept funds prohibited as to other participants under the Act, the fundraising representative or the participants may either establish another account for such contributions or transfer them directly to the participants that can accept them.

Furthermore, subsection (c)(3)(iii) requires that the fundraising representative report contributions in the reporting period in which they are received. This subsection also clarifies that, although distribution of proceeds may be delayed until expenses are paid, for contribution reporting and limitation purposes the date of receipt of a contribution by a participating political committee is the date that the contribution is received by the fundraising representative. Participating political committees are not required to report joint fundraising proceeds, however, until they receive the funds from the fundraising representative.

Moreover, subsection (c)(4) describes the recordkeeping responsibilities of the fundraising representative and participating committees. Under section (c)(4)(i), the fundraising representative and the participants are required to screen the contributions received to ensure that they are neither prohibited under the Act nor in excess of the contribution limitations. Participants must make their contributor records available to the fundraising representative to facilitate its screening of contributions. Subsection (c)(4)(ii) requires the fundraising representative to collect and retain contributor information in accordance with 11 CFR 102.8 and to forward such information to participating political committees. If necessary, the fundraising representative should also keep a record of the total amount of prohibited contributions received and of transfers of these contributions to any participants that may accept them. Furthermore, fundraising disbursement records required under 11 CFR 102.9 must be kept by the fundraising representative for three years pursuant to subsection (c)(4)(iii). That subsection also provides that commercial fundraising firms or agents must forward contributor information to the fundraising representative.

Subsection (c)(5) permits a contributor to make a donation to a joint fundraiser up to the total amount which he or she could give to all the participants subject to the contribution limitations of 2 U.S.C. 441a(a)(1). Hence, if five Federal candidates participated in a joint fundraiser and agreed to share proceeds equally, an individual could contribute up to $5,000, less any amount which had been previously contributed to any of the participants by that individual.

Subsection (c)(6) prescribes the manner in which gross proceeds from the joint fundraiser are to be allocated among the participants. Generally, as provided in subsection (c)(6)(i), the fundraising representative must allocate the proceeds according to the formula stated in the fundraising agreement. Changes in the agreed upon allocation formula are limited to two factual situations under this subsection. Excess funds may only be reallocated after distribution according to the preestablished formula has extinguished the debts of one or more participants or if distribution under the formula would result in a violation of the contribution limitations. Reallocation in either of these circumstances must be based on the remaining participants' proportionate shares under the allocation formula. If reallocation results in a contributor's exceeding the contribution limitations, the fundraising representative must return the amount of the contribution which exceeds the limit to the contributor pursuant to subsection (c)(6)(i). Since the participants are required to notify contributors before a contribution is made that reallocation may occur, there is no need to inform them of the results of such reallocation. Under subsection (c)(6)(ii), designated or earmarked

contributions which exceed the contributor's limit to the particular participant may not be reallocated without the written consent of the contributor. Subsection (c)(6)(iii) provides that prohibited contributions need not be distributed according to the allocation formula in the fundraising agreement if any participant may legally accept them.

Subsection (c)(7) governs the allocation of expenses and distribution of net proceeds. This subsection establishes different methods for calculating each participant's share of expenses and net proceeds based upon whether the participants were previously affiliated committees or are party committees of the same political party. For instance, subsection (c)(7)(i)(A) provides that if the participants are not affiliated committees or party committees of the same political party, the fundraising representative, after allocating gross proceeds, should calculate each participant's share of expenses based on the percentage of the total receipts each participant has been allocated. Prohibited contributions need not be included in the total receipts for the purpose of allocating expenses. Thus, under this subsection, the fundraising representative must subtract a participant's share of expenses from the amount it was allocated from gross proceeds to determine the amount of net proceeds each participant will receive. If each participant pays its own share of expenses calculated pursuant to this section, no contribution in-kind from one or more of the participants occurs. A participant may pay the expenses of another participant, but subsection (c)(7)(i)(B) points out that such payments are subject to the contribution limits of 11 CFR Part 110. Any funds advanced by one participant on behalf of another to pay the initial costs of the fundraising activity will also count against the contribution limits as provided under subsection (b)(3).

By contrast, since the Act permits unlimited transfers between committees which are affiliated or party committees of the same political party, no in-kind contribution results if one committee pays all expenses of a fundraising event. Thus, under subsection (c)(7)(ii) expenses need not be allocated if the participants are affiliated committees or are related party committees. This subsection also clarifies, however, that payment of such expenses by an unregistered Committee or organization on behalf of an affiliated political committee or related party political committee may trigger the registration and reporting requirements under the Act.

Two additional points should be noted. First, under subsection (c)(7)(i) "committees of the same political party" refers only to party committees and not to candidates of the same political party. Also, regardless of whether the participants are affiliated committees or party committees of the same political party, pursuant to subsection (c)(7)(iii), the fundraising representative may pay expenses from gross proceeds.

Finally, subsection (c)(8) explains when and how receipts and disbursements must be reported by the fundraising representative and participating political committees. Under subsection (c)(8)(i)(A), the fundraising representative is required to report all contributions in the reporting period in which they are received on FEC Schedule A, with a clear indication that these contributions represent joint fundraising proceeds. If any prohibited contributions are received during the reporting period, the fundraising representative should report the total amount of such contributions as a memo entry on Schedule A. Subsection (c)(8)(i)(B) provides that, after the distribution of net proceeds, each participant must report the amount it receives as a transfer-in from the joint fundraising representative. Each committee should also file a memo Schedule A containing an itemization of its share of gross receipts as contributions from the original contributors as required under 11 CFR 104.3(a). Pursuant to subsection (c)(8)(ii), the fundraising representative must report all disbursements in the reporting period in which they are made.

List of Subjects in 11 CFR Part 102

Campaign funds, Political candidates, Political committees and parties, Reporting requirements.

11 CFR Chapter I is amended as follows:

PART 102—[AMENDED]

In Part 102, § 102.6 is revised to read as follows:

§ 102.6 Transfers of funds; collecting agents.

(a) *Transfers of Funds; Registration and Reporting Required.* (1) *Who May Make Transfers Under This Section.*

(i) Transfers of funds may be made without limit on amount between affiliated committees whether or not they are political committees under 11 CFR 100.5.

(ii) Transfers of funds may be made without limit on amount between or among a national party committee, a State party committee and/or any subordinate party committee whether or not they are political committees under 11 CFR 100.5 and whether or not such committees are affiliated.

(iii) Transfers of joint fundraising proceeds may be made without limit on amount between organizations or committees participating in the joint fundraising activity provided that no participating committee or organization governed by 11 CFR 102.17 received more than its allocated share of the funds raised.

(iv) Transfers under subsections (i) through (iii) shall be made only from funds which are permissible under the Act. See 11 CFR Parts 110, 114 and 115.

(2) *When Registration and Reporting Required.* Except as provided in 11 CFR 102.6(b), organizations or committees making transfers under 11 CFR 102.6(a)(1) shall count such transfers against the reporting thresholds of the Act for determining whether an organization or committee is a political committee under 11 CFR 100.5.

(b) *Fundraising by Collecting Agents; No Reporting Required.* (1) *Definition of Collecting Agent.* A collecting agent is an organization or committee that collects and transmits contributions to one or more separate segregated funds to which the collecting agent is related. A collecting agent may be either:

(i) A committee, whether or not it is a political committee as defined in 11 CFR 100.5, affiliated with the separate segregated fund under 11 CFR 110.3; or

(ii) The connected organization of the separate segregated fund as defined in 11 CFR 100.6; or

(iii) A parent, subsidiary, branch, division, department, or local unit of the connected organization of the separate segregated fund; or

(iv) A local, national or international union collecting contributions on behalf of the separate segregated fund of any federation with which the local, national or international union is affiliated. *See* 11 CFR 114.1(e).

(2) *Collecting Agent Not Required To Report.* A collecting agent that is an unregistered organization and that follows the procedures of 11 CFR 102.6(c) is not required to register and report as a political committee under 11 CFR Parts 102 and 104, provided that the organization does not engage in other activities such as making contributions or expenditures for the purpose of influencing federal elections.

(3) *Who Is Not a Collecting Agent.* (i) *Commercial Fundraising Firm.* A separate segregated fund or a collecting agent may hire a commercial fundraising

firm to assist in fundraising; however, the commercial fundraising firm shall not be considered as a collecting agent for the purpose of this section. Rather, the commercial fundraising firm shall be considered to be the agent of the separate segregated fund or collecting agent.

(ii) *Individuals.* An individual who collects contributions for a separate segregated fund shall not be considered a collecting agent for the purpose of this section. Individuals who collect contributions are subject to the requirements of 11 CFR 102.8 and the provisions of 11 CFR Part 110.

(4) *Separate Segregated Fund May Collect Contributions.* Nothing in this section shall preclude a separate segregated fund from soliciting and collecting contributions on its own behalf.

(c) *Procedures for Collecting Agents.* (1) *Separate Segregated Fund Responsible for Acts of Collecting Agent.* The separate segregated fund shall be responsible for ensuring that the recordkeeping, reporting and transmittal requirements of this section are met.

(2) *Solicitation for Contributions.* A collecting agent may include a solicitation for voluntary contributions to a separate segregated fund in a bill for membership dues or other payments such as conference registration fees or a solicitation for contributions to the collecting agent. The collecting agent may only solicit contributions from those persons permitted to be solicited under 11 CFR Part 114. The solicitation for contributions must meet all of the requirements for proper solicitations under 11 CFR 114.5.

(i) The collecting agent may pay any or all of the costs incurred in soliciting and transmitting contributions to the separate segregated fund.

(ii) If the separate segregated fund pays any solicitation or other administrative expense from its own account, which expense could be paid for as an administrative expense by the collecting agent, the collecting agent may reimburse the separate segregated fund no later than 30 calendar days after the expense was paid by the separate segregated fund.

(3) *Checks Combining Contributions with Other Payments.* A contributor may write a check that represents both a contribution and payment of dues or other fees. The check must be drawn on the contributor's personal checking account or on a non-repayable corporate drawing account of the individual contributor. Under a payroll deduction plan, an employer may write a check on behalf of its employees to a union or its agent, which check represents a combined payment of voluntary contributions to the union's separate segregated fund and union dues or other employee deductions.

(4) *Transmittal of Contributions.* The full amount of each contribution collected by a collecting agent on behalf of a separate segregated fund shall be transmitted to that fund within 10 or 30 days as required by 11 CFR 102.8.

(i) Checks made payable to the separate segregated fund shall be transmitted by the collecting agent directly to the separate segregated fund in accordance with 11 CFR 102.8.

(ii) To transfer all other contributions, a collecting agent shall either:

(A) Establish a transmittal account to be used solely for the deposit and transmittal of funds collected on behalf of the separate segregated fund. Funds deposited into this account are subject to the prohibitions and limitations of the Act. If any expenditure is made from the account, other than a transfer of funds to an affiliated committee, the account shall be considered a depository of the recipient committee and all activity of that account shall be reported; or

(B) Deposit the contributions collected into the collecting agent's treasury account. The collecting agent shall keep separate records of all receipts and deposits that represent contributions to the separate segregated fund and, in the case of cash contributions, the collecting agent shall make separate deposits of such funds; or

(C) Deposit the contributions collected into an account otherwise established solely for State or local election activity. The collecting agent shall keep separate records of all receipts and deposits that represent contributions to the separate segregated fund; or

(D) In the case of cash contributions, transmit the contributions to the separate segregated fund in the form of money orders or cashier's checks.

(5) *Contributor Information.* The collecting agent shall comply with the requirements of 11 CFR 102.8 regarding transmittal of contributions and contributor information to the separate segregated fund, except that if contributions of $50 or less are received at a mass collection, a record shall be kept of the date, the total amount collected, and the name of the function at which the collection was made.

(6) *Retention of Records.* The collecting agent shall retain all records of contribution deposits and transmittals under this section for a period of three years and shall make these records available to the Commission on request. The separate segregated fund shall keep a record of all transmittals of contributions received from collecting agents under this section, and shall retain these records for a period of three years.

(7) *Reporting of Funds Received Through Collecting Agents.* A separate segregated fund receiving contributions collected by a collecting agent shall report the full amount of each contribution received as a contribution from the original contributor to the extent required by 11 CFR 104.3(a).

New § 102.17 is added as follows:

§ 102.17 Joint fundraising by committees other than separate segregated funds.

(a) *General.* (1)(i) Political committees may engage in joint fundraising with other political committees or with unregistered committees or organizations. The participants in a joint fundraising effort under this section shall either establish a separate committee or select a participating committee, to act as fundraising representative for all participants. The fundraising representative shall be a reporting political committee and an authorized committee of each candidate for federal office participating in the joint fundraising activity.

(ii) The participants may hire a commercial fundraising firm or other agent to assist in conducting the joint fundraising activity. In that case, however, the fundraising representative shall still be responsible for ensuring that the recordkeeping and reporting requirements set forth in this section are met.

(2) The procedures in 11 CFR 102.17(c) will govern all joint fundraising activity conducted under this section. The participants in joint fundraising activity may include political party committees (whether or not they are political committees under 11 CFR 100.5), candidate committees, multicandidate committees, and unregistered organizations which do not qualify as collecting agents under 11 CFR 102.6(b).

(3) A fundraising representative conducting joint fundraising under this section is distinguished from an unregistered organization acting as a collecting agent under 11 CFR 102.6(b). If a separate segregated fund or an unregistered organization qualifies and acts as a collecting agent under 11 CFR 102.6(b), the provisions of 11 CFR 102.17 will not apply to that fundraising activity.

(b) *Fundraising Representatives.* (1) *Separate Fundraising Committee as Fundraising Representative.* Participating committees may establish a separate political committee to act as fundraising representative for all participants. This separate committee

shall be a reporting political committee and shall collect contributions, pay fundraising costs from gross proceeds and from funds advanced by participants, and disburse net proceeds to each participant.

(2) *Participating Committee as Fundraising Representative.* All participating committees may select one participant to act as fundraising representative for all participants. The fundraising representative must be a political committee as defined in 11 CFR 100.5. The fundraising representative and any other participating committees may collect contributions; however, all contributions received by other participants shall be forwarded to the fundraising representative as required by 11 CFR 102.8. The fundraising representative shall pay fundraising costs from gross proceeds and from funds advanced by participants and shall disburse net proceeds to each participant.

(3) *Funds Advanced For Fundraising Costs.* (i) Except as provided in 11 CFR 102.17(b) (3)(ii) and (iii), the amount of funds advanced by each participant for fundraising costs shall be in proportion to the allocation formula agreed upon under 11 CFR 102.17 (c)(1).

(ii) A participant may advance more than its proportionate share of the fundraising costs, however, the amount advanced which is in excess of the participant's proportionate share shall not exceed the amount that participant could legally contribute to the remaining participants. *See* 11 CFR 102.12(c)(2) and Part 110.

(iii) If all the participants are affiliated under 11 CFR 110.3 or if the participants are all party committees of the same political party, there is no limit on the amount a participant may advance for fundraising costs on behalf of the other participants.

(c) *Joint Fundraising Procedures.* The requirements of 11 CFR 102.17(c)(1) through (8) shall govern joint fundraising activity conducted under this section.

(1) *Written Agreement.* The participants in a joint fundraising activity shall enter into a written agreement, whether or not all participants are political committees under 11 CFR 100.5. The written agreement shall identify the fundraising representative and shall state a formula for the allocation of fundraising proceeds. The participants shall also use the formula to allocate the expenses incurred for the fundraising activity. The fundraising representative shall retain the written agreement for a period of three years and shall make it available to the Commission on request.

(2) *Fundraising Notice.* In addition to any notice required under 11 CFR 110.11, a joint fundraising notice shall be included with every solicitation for contributions.

(i) This notice shall include the following information:

(A) The names of all committees participating in the joint fundraising activity whether or not such committees are political committees under 11 CFR 100.5; and

(B) The allocation formula to be used for distributing joint fundraising proceeds; and

(C) A statement informing contributors that, notwithstanding the stated allocation formula, they may designate their contributions for a particular participant or participants; and

(D) A statement informing contributors that the allocation formula may change if a contributor makes a contribution which would exceed the amount that contributor may give to any participant.

(ii) In the following situations, the notice shall include the following additional information:

(A) If one or more participants engage in the joint fundraising activity solely to satisfy outstanding debts, a statement informing contributors that the allocation formula may change if a participant receives sufficient funds to pay its outstanding debts; and

(B) If one or more participants can lawfully accept contributions that are prohibited under the Act, a statement informing contributors that contributions from prohibited sources will be distributed only to those participants that can accept them.

(3) *Separate Depository Account.* (i) The participants or the fundraising representative shall establish a separate depository account to be used solely for the receipt and disbursement of the joint fundraising proceeds. All contributions deposited into the separate depository account must be permissible under the Act. Each political committee shall amend its Statement of Organization to reflect the account as an additional depository. If one or more participants can lawfully accept contributions that are prohibited under the Act, the participants may either establish a second depository account for contributions received from prohibited sources or they may forward such contributions directly to the nonfederal participants.

(ii) The fundraising representative shall deposit all joint fundraising proceeds in the separate depository account within ten days of receipt as required by 11 CFR 103.3. The fundraising representative may delay distribution of the fundraising proceeds to the participants until all contributions are received and all expenses are paid.

(iii) For contribution reporting and limitation purposes, the date of receipt of a contribution by a participating political committee is the date that the contribution is received by the fundraising representative. The fundraising representative shall report contributions in the reporting period in which they are received. Participating political committees shall report joint fundraising proceeds in accordance with 11 CFR 102.17(c)(8) when such funds are received from the fundraising representative.

(4) *Recordkeeping Requirements.* (i) The fundraising representative and participating committees shall screen all contributions received to insure that the prohibitions and limitations of 11 CFR Parts 110 and 114 are observed. Participating political committees shall make their contributor records available to the fundraising representative to enable the fundraising representative to carry out its duty to screen contributions.

(ii) The fundraising representative shall collect and retain contributor information with regard to gross proceeds as required under 11 CFR 102.8 and shall also forward such information to participating political committees. The fundraising representative shall also keep a record of the total amount of contributions received from prohibited sources, if any, and of all transfers of prohibited contributions to participants that can accept them.

(iii) The fundraising representative shall retain the records required under 11 CFR 102.9 regarding fundraising disbursements for a period of three years. Commercial fundraising firms or agents shall forward such information to the fundraising representative.

(5) *Contribution limitations.* Except to the extent that the contributor has previously contributed to any of the participants, a contributor may make a contribution to the joint fundraising effort which contribution represents the total amount that the contributor could contribute to all of the participants under the applicable limits of 11 CFR 110.1 and 110.2.

(6) *Allocation of Gross Proceeds.* (i) The fundraising representative shall allocate proceeds according to the formula stated in the fundraising agreement. If distribution according to the allocation formula extinguishes the debts of one or more participants and results in a surplus for those participants or if distribution under the formula results in a violation of the contribution limits of 11 CFR 110.1(a), the fundraising representative may reallocate the exess funds. Reallocation shall be based upon the remaining participants' proportionate shares under the allocation formula. If reallocation results in a violation of a contributor's limit under 11 CFR 110.1, the fundraising representative shall return to the contributor the amount of the contribution that exceeds the limit.

(ii) Designated contributions which exceed the contributor's limit to the designated participant under 11 CFR Part 110 may not be reallocated by the fundraising representative absent the written permission of the contributor.

(iii) If any participants can lawfully accept contributions from sources prohibited under the Act, any such contributions that are received are not required to be distributed according to the allocation formula.

(7) *Allocation of Expenses and Distribution of Net Proceeds.* (i) If participating committees are not affiliated as defined in 11 CFR 110.3 prior to the joint fundraising activity and are not committees of the same political party;

(A) After gross contributions are allocated among the participants under 11 CFR 102.17(c)(6), the fundraising representative shall calculate each participant's share of expenses based on the percentage of the total receipts each participant had been allocated. If contributions from sources prohibited under the Act have been received and distributed under 11 CFR 102.17(c)(6)(iii), those contributions need not be included in the total receipts for the purpose of allocating expenses under this section. To calculate each participant's net proceeds, the fundraising representative shall subtract the participant's share of expenses from the amount that participant has been allocated from gross proceeds.

(B) A participant may only pay expenses on behalf of another participant subject to the contribution limits of 11 CFR Part 110.

(ii) If participating committees are affilated as defined in 11 CFR 110.3 prior to the joint fundraising activity or if participants are party committees of the same political party, expenses need not be allocated among those participants. Payment of such expenses by an unregistered committee or organization on behalf of an affiliated political committee may cause the unregistered organization to become a political committee.

(iii) Payment of expenses may be made from gross proceeds by the fundraising representative.

(8) *Reporting of Receipts and Disbursements.* (i) *Reporting Receipts.*

(A) The fundraising representative shall report all funds received in the reporting period in which they are received. The fundraising representative shall report the total amount of contributions received from prohibited sources during the reporting period, if any, as a memo entry. Each Schedule A filed by the fundraising representative under this section shall clearly indicate that the contributions reported on that schedule represent joint fundraising proceeds.

(B) After distribution of net proceeds, each participating political committee shall report its share of net proceeds received as a transfer-in from the fundraising representative. Each participating political committee shall also file a memo Schedule A itemizing its share of gross receipts as contributions from original contributors to the extent required under 11 CFR 104.3(a).

(ii) *Reporting Disbursements.* The fundraising representative shall report all disbursements in the reporting period in which they are made.

PART 114—[AMENDED]

11 CFR Part 114 is amended by adding new § 114.5(b)(3) as follows:

§ 114.5 Separate segregated funds.

* * * * *

(b) * * *

(3) If the separate segregated fund pays any solicitation or other administrative expense from its own account, which expense could be paid for as an administrative expense by the collecting agent, the collecting agent may reimburse the separate segregated fund no later than 30 calendar days after the expense was paid by the separate segregated fund.

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 386

[Docket No. 30512-85]

Foreign Merchandise Exported From a Foreign Trade Zone; Commerce Form 7513 Not Applicable

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This rule amends Part 386 of the Export Administration Regulations by removing a reference to the applicability of Commerce Form 7513 for documentation of exports of foreign merchandise from a Foreign Trade Zone. This change is made in order to conform the Regulations with the Foreign Trade Statistics Regulations of the Bureau of the Census. Exporters must now submit Commerce Form 7525–V (Shipper's Export Declaration) when exporting foreign merchandise from Foreign Trade Zones.

EFFECTIVE DATE: This rule is effective June 7, 1983. Although there is no formal comment period, public comments on this rule are welcome.

FOR FURTHER INFORMATION CONTACT: Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration, Department of Commerce, Washington, D.C. 20230 (Telephone: (202) 377–4811).

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal

comment period, public comments on this regulation are welcome on a continuing basis.

Exports.

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

PART 386—[AMENDED]

Paragraph (p)(1)(ii) of § 386.3 is revised, a paragraph (p)(2) is added, and the current paragraph (p)(2) is redesignated as (p)(3), reading as follows:

§ 386.3 Shipper's export declaration

* * * * *

(p) Declaration for shipments moving in-transit. (1) * * *

(ii) Foreign merchandise exported from a General Order Warehouse. Shipments in bond transiting the United States by means of any carrier other than a vessel may be cleared for export without presenting a Form 7513, unless a validated license is required for the export.

(2) Exports from Foreign Trade Zones. Commerce Form 7513 is not acceptable for any exports from Foreign Trade Zones. Such shipments require the filing of the Shipper's Export Declaration (Form 7525–V), with the applicable zone number reported on the Document.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 170

Registered Futures Associations; Mandatory Membership

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is adopting a rule which will require all futures commission merchants ("FCMs") that must be registered with the Commission to become members of a registered futures association ("RFA"). The Commission finds that adoption of such a rule will further the purposes of the Commodity Exchange Act ("Act") and, in particular, is necessary and appropriate to achieve the objectives of sections 17(m), 17(p) and 17(q) of the Act to implement comprehensive self-regulatory programs as soon as practicable. The Commission has determined that adoption of § 170.15 of its rules will greatly assist the Commission in the regulation of FCMs and other RFA members.

EFFECTIVE DATE: August 8, 1983.

FOR FURTHER INFORMATION CONTACT: Karen Matteson, Attorney Advisor, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, Telephone (202) 254–8955.

SUPPLEMENTARY INFORMATION:

I. Introduction

On November 15, 1982, the National Futures Association ("NFA") submitted a "Petition for Issuance of [a Commission] Rule" (§ 170.15) which would require each person who must be registered with the Commission as an FCM to become and remain a member of at least one futures association registered pursuant to section 17 of the Act and Part 170 of the Commission's regulations.[1] NFA asserts that it is essential for all FCMs to be members of an RFA in order to ensure that industry self-regulation by RFAs is effective. Noting Congress' directive that NFA—currently the only RFA—fully implement its self-regulatory program within two and one-half years[2] and the Commission's expectation that NFA assume certain regulatory functions as soon as possible, NFA asserts that because it does not have jurisdiction over nonmembers, the Commission must require RFA membership of all FCMs for such regulations to be effective. NFA states that "in the absence of a Commission rule mandating RFA membership, the now small number of FCM non-RFA members may grow and present a substantial impediment to achieving the self-regulatory goals of Section 17 of the Act as defined by Congress and the Commission."[3]

On November 24, 1982, the Commission published a notice in the **Federal Register** setting forth proposed Commission rule 170.15, summarizing NFA's arguments in favor of the proposed rule, and requesting comment on the proposed rule.[4] The Commission also requested comment on whether such a rule should be extended to apply to all FCMs registered with the Commission, whether or not they are required to be registered.[5] In addition, the Commission requested suggestions as to any alternatives that would effectively accomplish the same purposes or otherwise address adequately those regulatory problems arising from the refusal of registered persons to join an RFA. The Commission solicited public comment on the proposed rule and the related questions for a period of sixty days.

Of the 50 comments received, 48 favored Commission promulgation of the proposed rule. Those in favor include FCMs, contract markets, commodity pool operators, commodity trading advisors, industry trade associations, banks, former Commissioners of this agency, public members of NFA's Board of Directors and NFA itself.[6] Only two commentators' letters opposed adoption of § 170.15—the Antitrust Division of the United States department of Justice ("Antitrust Division"), and a money management consultant.[7] The Antitrust Division set forth three basic objections: (1) That the proposed rule is of questionable constitutionality; (2) that the Commission lacks authority under the Act to adopt the proposed rule; and (3) that the Commission is compelled to employ other less anticompetitive regulatory alternatives pursuant to section 15 of the Act, since the proposed rule would have serious anticompetitive consequences.

The Commission has considered NFA's reasons for seeking the rule, the legislative history underlying section 17

[2] Section 17(q) of the Act, as amended by the Futures Trading Act of 1982, Pub. L. No. 97–444, section 233, 96 Stat. 2294 (1983), requires NFA to satisfy that requirement "as soon as practicable but not later than September 30, 1985." Other RFAs would be subject to the same implementation requirements within two and one-half years from the date of their registration by the Commission.

[5] FCMs are required to register with the Commission under section 4d of the Act if they solicit or accept orders from customers for the purchase or sale of futures contracts. Some entities register with the Commission as FCMs even though they are not handling any customer business at the time of registration either because they anticipate doing such business for an occasional client or because they want to be able to initiate such business in the future without waiting for a registration application to be processed.

[6] NFA submitted two comment letters, dated January 21, and February 10, 1983. Its first letter analyzed the need for § 170.15, while the second letter responded to comments by the Antitrust Division of the United States Department of Justice.

[7] This commentator opposed the proposed regulation largely on grounds similar to those raised by the Antitrust Division and discussed herein.

of the Act, the evolution of NFA as a self-regulatory organization, and the comments of all interested persons concerning proposed § 170.15. The Commission has evaluated the concerns raised by the Antitrust Division regarding the constitutionality of proposed § 170.15 and the Commission's authority under the Act to adopt § 170.15. In light of these considerations, the Commission has determined under section 8a(5) of the Act that adoption of § 170.15 is reasonably necessary to effectuate the purposes of the Act and, in particular, to provide a means for assuring that the purposes of sections 17(m), 17(p) and 17(q) of the Act are achieved. In reaching this conclusion, the Commission has determined, in accordance with section 15 of the Act, that the purposes and objectives served by the adoption of § 170.15 outweigh anticompetitive effects which may result from the rule. In this regard, the Commission has taken into consideration the public interest to be protected by the antitrust laws, and has endeavored to take the least anticompetitive means of achieving the Act's objectives. Thus, the Commission believes that adoption of § 170.15 will facilitate the implementation of industry self-regulation, further augment protection of the public, and further assist in the application of uniform compliance standards for the industry.

II. Purposes and Objectives of the Rule

Section 8a(5) of the Act authorizes the Commission to promulgate such rules as, in the judgment of the Commission, are reasonably necessary to effectuate any of the provisions or to accomplish any of the purposes of the Act. Comprehensive and effective self-regulation and the avoidance of duplicative regulation are purposes which are inherent in the policies underlying sections 17 (m), (p) and (q) of the Act. The evolution of section 17 of the Act, culminating in the adoption of sections 17 (p) and (q) in the Futures Trading Act of 1982, consistently demonstrates the legislative intent concerning these regulatory objectives and the need for Commission rulemaking to effectuate those objectives.

From the time of its original enactment of section 17 of the Act, authorizing the creation of futures associations, Congress has consistently recognized that the ability of a self-regulatory organization to attract and retain its membership clearly would be essential to such an organization's effectiveness in monitoring and enforcing compliance by members with the organization's regulatory requirements. Unlike trade associations or other nonregulatory group enterprises, whose primary function is the promotion of the membership's mutual self-interests, NFA and other RFAs are charged by Congress with explicit self-regulatory obligations which they must perform with respect to their memberships. Moreover, unlike contract markets, securities exchanges, or the National Association of Securities Dealers ("NASDA"), RFAs do not have the advantage of direct financial, promotional or other benefits such as trading privileges in unique futures contracts or exchange-listed securities to offer either prospective or existing members.[8] Accordingly, the question of how an RFA could successfully operate as a viable membership organization has been addressed at length by Congress in adopting and thereafter amending section 17 of the Act and more recently by the Commission in considering NFA's application for registration under that section of the Act.

During the Congressional deliberations which culminated in the Commodity Futures Trading Act of 1974,[9] a consistent theme of the legislative hearings was a concern that the existing self-regulatory framework no longer adequately served the broad public interests involved in the nation's rapidly expanding futures markets.[10] As a result, the Commission was created and armed with broad oversight and enforcement powers to regulate these markets. In addition, the 1974 amendments brought three classes of commodity professionals under the Commission's regulation for the first time: Commodity Trading Advisors ("CTAs"), Commodity Pool Operators ("CPOs"), and Associated Persons ("APs") of FCMs. Unlike floor brokers and FCMs, most of which were also contract market members and thus subject to self-regulatory oversight of an exchange, the three newly regulated categories of industry participants had not been subject to any self-regulatory oversight.

In addition to these new registration requirements, the 1974 Act also specifically empowered the Commission to impose regulatory requirements on those industry participants that were not contract market members.[11] Congress also envisioned that the Commission's increased regulatory responsibilities would be supplemented by self-regulation to be provided by registered futures associations under Title III of the Act.[12]

In early 1977, NFA's organizing committee presented to the Commission an outline proposal for an RFA in order to facilitate and encourage discussion of certain issues involved in registering futures associations. After the Commission held a public meeting in which the proposal was discussed, Commission staff and NFA representatives conducted further discussions concerning the informal proposal, as reflected in public correspondence between NFA and the Commission. At an open meeting on June 7, 1977, the Commission, recognizing that a formal registration application had not been filed, approved as a matter of policy the concept of "uniform required membership" as proposed by the NFA organizing committee.[13] NFA submitted a revised version of its draft articles of incorporation on July 20, 1977, along with a revised "Points of Agreement" setting forth the organizing committee's intent.[14]

The Antitrust Division subsequently commented on the informal proposal, expressing its opinion that NFA's mandatory membership requirement, in particular, would be an unconstitutional delegation of agency authority and was not the least anticompetitive means available to the Commission to achieve the objectives of the Act.[15] Although NFA's organizers responded to the Antitrust Division's comments,[16] the NFA draft application was not formally submitted to the Commission and, accordingly, the Commission deferred

any further consideration of the NFA's draft proposal.

The concerns which the Antitrust Division raised were addressed explicitly by Congress in 1978. During the Commission's 1978 reauthorization hearings, subcommittees of both the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition and Forestry heard testimony from many witnesses expressing their opinion that a futures association should be created.[17] The House Committee commented that:

> [u]se of the authority of this amendment would be completely discretionary with the Commission. The committee was persuaded that such discretion may be useful to the Commission if it should decide that such a provision is necessary for an effective self-regulation program and is otherwise in the interest of the objectives of section 17.[18]

The Conference Committee of the Senate and House agreed. Congress therefore adopted section 17(m) of the Act, which expressly allows the Commission to approve rules of a futures association that would make membership in at least one futures association mandatory for persons eligible for membership.

Efforts to organize an RFA resumed and, in March of 1981, a formal application for registration of NFA was submitted to the Commission. Pursuant to section 17(a) of the Act, NFA also sought approval of its Bylaws, which included a provision (Bylaw 1101) designed to prohibit NFA members from doing any customer business with firms which are not members of an RFA.[19] In granting NFA's registration, the Commission also approved Bylaw 1101.[20] While Bylaw 1101 may provide a strong incentive for NFA membership through the expectation that industry participants would seek to join NFA in order to do business with other NFA members, Bylaw 1101 cannot independently ensure uniform industry-wide membership in an RFA.[21]

In commencing implementation of its regulatory programs and planning the development of further regulatory initiatives, NFA has become concerned that various Commission registrants may seek to avoid the industry self-regulation scheme envisioned in section 17. Thus, without mandatory membership in NFA or another RFA, effective implementation of the programs required by section 17 and NFA's self-regulatory programs could be seriously impeded. NFA cannot impose and enforce standards upon industry professionals that have not subjected themselves to NFA's jurisdiction or which could terminate NFA jurisdiction at their discretion solely by voluntarily terminating their NFA membership. Bylaw 1101 operating in conjunction with § 170.15, however, would assure essentially complete NFA membership from the universe of commodity professionals: registered FCMs, commodity pool operators, commodity trading advisors, and introducing brokers ("IBs").[22]

Moreover, with the 1982 amendments, Congress has directed that each FRA implement a comprehensive program to impose training standards and proficiency testing for persons involved in the solicitation of transactions subject to the provisions of the Act and for any other person for which an RFA has registration responsibilities.[23] Although contract markets have the ability to prescribe their own standards of training and proficiency for persons who solicit or accept orders for execution on those contract markets and some contract markets have adopted such guidelines, the contract markets would not have jurisdiction over a large number of commodity professionals (*e.g.*, most CPOs, CTAs, IBs and their associated persons) which typically are not contract market members. Further, with eleven futures exchanges designated as contract markets, there is a greater potential for subjecting industry participants to overlapping, if not conflicting, requirements.

Unless industry-wide training, testing, and sales practice requirements can be adopted by an RFA capable of enforcing those standards against all industry participants, certain market participants may operate under lower standards than those imposed by an RFA, at a risk to the public. The Commission belives that mandatory membership in an RFA which carries out the objectives set forth in section 17 of the Act might allay such potential difficulties by assuring that persons soliciting business on all contract markets are within the jurisdiction of an RFA and thus subject to the same comprehensive training standards and proficiency testing requirements.[24]

The Commission believes that not only is mandatory membership essential to an effective industry-wide self-regulatory program but also that an equally compelling basis for adoption of § 170.15 is that without such mandatory membership, it would be necessary for the Commission to continue to maintain extensive (and expensive) direct regulation over those Commission registrants that are not subject to any self-regulatory jurisdiction. The Commission would have to continue to conduct financial, compliance and sales practice audits of FCMs, CPOs, CTAs and IBs that do not join NFA. The need to maintain these extensive programs for the comparatively small number of persons likely to remain subject solely

[19] NFA Bylaw 1101 provides that: No Member may carry an account, accept an order or handle a transaction, in commodity futures contracts, for or on behalf of any non-Member of NFA, or suspended Member, that is required to be registered with the Commission as an FCM, Commodity Pool Operator or Commodity Trading Advisor, or that is an Agent, and that is acting in respect to the account, order or transaction for a customer, a commodity pool or participant therein, a client of a commodity trading advisor, or any other person, unless (a) such non-Member of NFA is a member of another futures association registered with the Commission under Section 17 of the Act, or is exempted from this prohibition by Board resolution, or (b) such suspended Member is exempted from this prohibition by the Appeals Committee.

[20] Order Granting Registration and Approving Rules of the National Futures Association at 77 (September 22, 1981) (hereinafter cited as "Registration Order").

[21] Bylaw 1101 does not prevent non-RFA member FCMs from doing business with other Non-FRA member firms. Before the Commission granted its registration, NFA indicated that it intended to urge all contract markets to require their own members to join NFA (or any RFA), thus assisting the goal of industry-wide membership. Registration Order at 76, n.220. To date no contract market has proposed such a requirement, however.

[22] Because only registered FCMs may be members of the clearing corporations of contract markets, any CPO or CTA which seeks to execute futures orders for customers must clear such trades through an FCM. Thus, the combined effect of § 170.15 and Bylaw 1101 will be to require all CPOs and CTAs to become RFA members, since FCMs, which will be required by § 170.15 to become RFA members, are prohibited by Bylaw 1101 from transacting futures related business with non-RFA member CPOs or CTAs. The Commission expects NFA to amend Bylaw 1101 to include IBs as well as CPOs, CTAs, and FCMs.

[23] Section 17 (p)(1) of the Act, as amended by the Futures Trading Act of 1982, Pub. L. No. 97–444, 233, 96 Stat. 2321 (1983).

[24] In this connection, the Commission previously had taken action to implement a competency examination program by proposing a rule which would have made compulsory a written proficiency examination for all new applicants for registration as associated persons. *See* 46 FR 20679 (April 6, 1981). The Commission deferred action on this proposal, however, based on comments from the public, with which the Commission generally concurred, that a CFTC testing requirement would be redundant in view of the stated intention of NFA to institute its own testing program shortly.

to the Commission's direct regulation would be inefficient and duplicative of the self-regulatory functions for which NFA is responsible.[26]

The Commission has specifically examined the Securities and Exchange Commission's ("SEC") experience with its SECO Broker-Dealer Program, under which broker-dealers who are not NASD members are regulated directly by the SEC. When it considered the SEC's experience in conjunction with review of NFA's application for registration, the Commission concluded that a program of direct Commission regulation of non-RFA members pursuant to sections 17(d) and 17(e) of the Act,[28] would be difficult to administer, and that the Commission lacked sufficient resources to devote to such direct regulation.[27] In this regard, the Commission continues to believe that the experience of the SEC in administering its SECO broker-dealer registration program and the conclusions of the recent study of that program are particularly instructive. In his February 15, 1983 testimony before the Subcommittee on Telecommunications, Consumer Protection, and Finance of the House Committee on Energy and Commerce on behalf of the SEC in favor of H.R. 562, SEC Chairman John S. R. Shad favored elimination of the SECO program through adoption of a requirement that all broker-dealers join a self-regulatory organization.[28] Chairman Shad testified as to the results of a comprehensive management study of the SECO program, which concluded that that program is unnecessarily costly and diverts the SEC's limited resources away from areas of major concern in order to duplicate the functions of the NASD. In addition, the study projected that greater expenditures would be required in the future to ensure that SECO firms are regulated as stringently as NASD firms. Finally, Chairman Shad testified that self-regulatory organizations are better able than the SEC to maintain ethical standards for the industry and to peform certain oversight functions. The Commission believes that the SEC's bases for recommending elimination of its SECO program to Congress further support the Commission's decision to adopt § 170.15.

In light of all of these considerations, the Commission believes that its rulemaking authority provides the most effective means of fulfilling the purposes and objectives of the Act discussed above. In this regard, the Commission observes that the Congressional conferees reporting on the self-regulatory requirements imposed upon RFAs by the Futures Trading Act of 1982 expressed their expectation that the Commission will exercise its rulemaking authority "and *adopt such rules* * * * as it deems to be necessary or appropriate *to insure that persons eligible for membership* in a registered futures association *become and remain members of at least one such association*" [emphasis added].[29] Consistent with that expectation, the Commission has determined to exercise its general rulemaking authority under section 8a(5) of the Act to fulfill the objectives of sections 17(m), 17(p) and 17(q) of the Act by adopting § 170.15.

III. Analysis of Comments Opposing Adoption of § 170.15

The Antitrust Division has questioned both the Commission's authority to adopt this rule and the appropriateness under certain sections of the Act, particularly section 15, of adopting a compulsory RFA membership requirement. The Commission has given careful consideration to the views expressed by the Antitrust Division, and has concluded that the Commission has the authority to adopt § 170.15.[30]

A. Constitutionality of Proposed Rule

1. *Due Process.* The Antitrust Division expresses concern that proposed § 170.15, by requiring a person to become a member and be subject to the discipline of a private self-regulatory organization in order to do business, may be inconsistent with the due process clause of the fifth amendment to the Constitution.[31] In this regard, the Antitrust Division discusses two cases involving compulsory payment of union dues,[32] and one case involving compulsory bar membership.[33] In each of these cases, however, the Supreme Court upheld compulsory membership in a private organization.[34]

In addition, courts have specifically upheld the authority of self-regulatory organizations to exercise disciplinary authority over their members in situations where a federal regulatory agency also had authority to initiate such actions. In *R. H. Johnson & Co. v. SEC*, a broker-dealer sought review of an order of the NASD which expelled the company from NASD membership on the basis that the NASD was unconstitutionally delegated the SEC's authority to discipline securities broker-dealers. The Second Circuit upheld the NADS's disciplinary authority based on the existence of statutory provisions which establish (1) the SEC's authority, according to "reasonably fixed statutory standards" to approve or disapprove NASD rules, and (2) the SEC's authority to review any NASD disciplinary action.[35] The Third and Ninth Circuits

[30] The Commission also notes that the Antitrust Division's statement that the Commission's authority to impose mandatory RFA membership is limited solely to the approval of RFA rules is inconsistent with the Antitrust Division's statement made in March, 1982 that:

In 1978, * * * 17(m) of the Act * * * was amended to permit the CFTC to require membership in an RFA if the CFTC determined that mandatory membership was 'necessary or appropriate' to the purposes and objectives of the Act * * *. The Division's letter acknowledged statutory defeat of its mandatory membership views and sought a legislative "rehearing" by asserting that NFA would not contribute to effective and efficient self-regulation. *Id.* at 319. also have upheld the delegation of disciplinary authority to the NADS, citing *R. H. Johnson & Co.*[36]

Section 17(h) of the Commodity Exchange Act provides that if any RFA takes disciplinary action against any of its members, or denies admission to association membership, the association's action is subject to review by the Commission, either upon application of the person disciplined or denied membership, or upon the Commission's own motion. Section 17(i) sets forth procedural guidelines and standards of review applicable to Commission review of disciplinary actions by RFAs. Sections 17(j) and 17(k) of the Act set forth the Commission's authority and applicable procedures for approving, disapproving, abrogating, altering or supplementing association rules. These statutory provisions authorizing the CFTC to override RFA membership or disciplinary determinations and to approve, disapprove or amend association rules are virtually identical to the statutory provisions cited in the cases above upholding exercise of the NASD's disciplinary authority under SEC oversight, and as such would appear to set forth equally adequate standards upon which to uphold a delegation of disciplinary authority to the NFA.

Furthermore, sections 17(b)(8) and 71(b)(9) outline the procedures the RFA itself must follow in proceeding against members and applicants, including the contents of notice to the member or applicant. Commission rule 170.6 requires that an RFA must demonstrate that in disciplining its members, proceedings will be conducted "in a manner consistent with the fundamental elements of due process" and that the RFA will "impose discipline which is fair and has a reasonable basis in fact." In addition, Section 17(b)(5) of the Act requires that an RFA's rules ensure fair representation of RFA members in the adoption of any association rule, which includes disciplinary rules. Finally, as noted above, the rules and procedures by which any RFA conducts disciplinary or membership denial proceedings are subject to prior Commission approval under section 17(j) of the Act. Hence, the Antitrust Division's concern that compulsory RFA membership may deny due process is more than adequately addressed by the safeguards set forth in section 17 regarding RFA disciplinary procedures, Commission review of RFA proceedings, Commission review of proposed RFA rules, and fair representation of members in the RFA rulemaking and disciplinary processes.

2. *Freedom of Association.* The Antitrust Division never expressly cites the first amendment to the Constitution in its comments, but the three cases it introduces to support its concern that promulgation of § 170.15 may violate the due process clause all raise potential first amendment issues.[37] As explained *supra*, however, the Supreme Court upheld compulsory membership in each of the two union shop cases and the state bar case cited by the Antitrust Division. The Commission's examination of the first amendment analysis which is typically employed by the Court indicates that compulsory RFA membership likewise would be upheld under first amendment scrutiny.

For example, in *Abood* v. *Detroit Board of Education* the Supreme Court held that, although compelling employees to financially support their collective bargaining representative has an impact on the employees' first amendment right of freedom of association "such interference as exists is constitutionally justified by the legislative assessment of the important contribution of the union shop to the system of labor relations established by Congress."[38] Thus, the Supreme Court balanced the degree of infringement of the employees' first amendment rights against the state's interest in requiring payment of union dues. The Supreme Court has employed a similar balancing test in other cases. For example, in *Buckley* v. *Valeo*, the Court examined whether the provisions of the Federal Election Campaign Act of 1971 limiting contributions by individuals and groups to candidates and campaign committees to $1000 were constitutional.[39] The Court determined that the governmental interest in preventing corruption and the appearance of corruption of the Federal elections process was sufficient to overcome any first amendment freedom of association objections to the $1000 contribution limitation.[40]

Thus, in determining whether Commission promulgation of § 170.15 would be constitutional, several factors must be weighed. The right to freely associate, the degree of infringement of that right which would result from adoption of § 170.15, the government's interest in promulgating § 170.15, and whether § 170.15 is a sufficiently narrow means by which to achieve the government's objective, are all relevant factors. The Commission believes that its adoption of § 170.15 reflects a legitimate means of achieving a strong governmental interest in protecting participants in the commodity futures and options markets and does not abridge the constitutional rights of professional market participants.

In this regard, recognition of the Commission's interest in adopting § 170.15 is important. It is clear that requiring membership in an RFA with disciplinary power *does* directly further, and indeed is essential to, the governmental interests expressed in the Commodity Exchange Act and its legislative history in developing an industry self-regulatory system which is adequate to protect the public. The close relationship between requiring membership in an organization with disciplinary powers and achievement of the government's interest in effective self-regulation strongly favors the constitutionality of § 170.15.

The final issue is whether § 170.15 is drafted in a sufficiently narrow fashion consistent with achieving the Act's objectives. The Commission previously has examined the alternative of employing sections 17 (d) and (e) to regulate those who choose not to join an RFA, however, and determined that the cost of such dual regulation would be prohibitive.[41] Moreover, it is unclear that, even if the costs of direct regulation could be justified, this Commission would have available adequate resources to assure comprehensive and effective regulation of the non-RFA member community. Thus, the enhancement of first amendment rights which might be gained by an alternative to § 170.15 would not be sufficiently significant to merit choosing the costly, and perhaps ineffective, alternatives to § 170.15 available to the Commission under sections 17 (d) and (e) of the Act.

B. Statutory Authority To Promulgate Rule

The Commodity Exchange Act provides the Commission with very broad rulemaking authority, enchanced by specific legislative direction in a number of particular areas.[43] Section 8a(5) of the Act authorizes the Commission:

> To make and promulgate such rules and regulations as, in the judgment of the Commission, are reasonably necessary to effectuate any of the provisions or to accomplish any of the purposes of this Act.

The courts have generally allowed federal agencies broad discretion under general rulemaking provisions similar to section 8a(5) to promulgate rules which the agencies deem reasonably related to the purposes of the relevant legislation. For example, in *Mourning v. Family Publications Services, Inc.*[44] the Supreme Court upheld a Federal Reserve Board regulation promulgated pursuant to section 105 of the Truth in Lending Act, which is worded similarly to section 8a(5) of the Commodity Exchange Act:

> The Board shall prescribe regulations to carry out the purposes of [the Act]. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of [the Act]; to prevent circumvention of evasion thereof, or to effectuate compliance therewith.

The regulation promulgated pursuant to this general rulemaking authority set forth circumstances under which sellers who regularly extended credit had to make certain disclosures to customers. Under the regulation, disclosure was required if a finance charge was to be imposed or if payments were to be made in more than four installments. The provision requiring disclosure if payment could be made in more than four installments was challenged. The basis for the challenge was that section 121 of the Truth in Lending Act required only that disclosure be made when there was to be a finance charge. Thus, the regulation was alleged to be "inconsistent" with the statute. The Court disagreed:

> Where the empowering provision of a statute states simply that the agency may "make * * * such rules and regulations as may be necessary to carry out the provisions of this Act" we have held that the validity of a regulation promulgated thereunder will be sustained so long as it is "reasonably related to the purposes of the enabling legislation." [45]

Because the purpose of the challenged provision was to prevent concealment of the finance charge in the price of a product bought in installments, and Congress was clearly aware that such concealment was a means of evading the statute, the regulation was held "reasonably related" to the statute's objective.[46]

The Antitrust Division's argument that section 17(m) provides the exclusive means for achieving compulsory RFA membership is analogous to the argument made by the respondent in *Mourning*. The respondent argued that the regulation was inconsistent with the statute because the statute only required disclosure when a finance charge was imposed, and that this implied a congressional intent to preclude the Board from imposing disclosure requirements on transactions not involving finance charges. The Court responded that:

> To accept respondent's argument would undermine the flexibility sought in vesting broad rulemaking authority in an administrative agency.[46]

Further, while section 8a(5) itself provides sufficient statutory authority for promulgating § 170.15, section 17(m) and its legislative history support the exercise of that authority by providing evidence that the result of a regulation such as § 170.15, compulsory membership, is "reasonably related" to the purposes of the Act.[47]

The Antitrust Division also believes that sections 17(d) and (e) are somehow relevant because they were not repealed when section 17(m) was enacted. The continued existence of sections 17(d) and (e) merely signifies however, that Congress decide to allow the Commission to make the final determination whether to compel RFA membership, or to adopt a program similar to the SECO Broker-Dealer program. As discussed *supra*, the Commission has weighed these alternatives and cannot find that exercise of its authority under sections 17(d) and (e) would achieve as effective results as the adoption of § 170.15.

The Antitrust Division also questions whether recent legislative history which acknowledges Congressional awareness of NFA's petition for adoption of § 170.15 and states that "the conferees recognize that, under the Act, the Commission has authority to adopt such a rule," can be employed as authority to adopt such a rule. The conferees also stated, however, that:

> The conferees understand that the Act gives the Commission authority to adopt rules relating to membership in a registered futures association in order to effectuate fully the specific policies underlying section 17(m) of the Act.[48]

Thus, the conferees recognize that section 17(m) illustrates one of the purposes or policies of the Act which Commission rulemaking under section 8a(5) of the Act may further.

Nonetheless, the Antitrust Division asserts that Congress' statements in 1982 cannot be used to ascertain the intent of Congress in enacting section 17(m). Clearly, however, the 1982 Conference Report is relevant to explaining new section 17(q).[49] If, as the Report implies, Congress intended section 17(q) to give the Commission, in conjunction with its general rulemaking power, the authority to adopt the proposed rule, then unquestionably the

[43] The Antitrust Division questions whether a provision such as § 170.15 can be adopted without explicit statutory authority. Although the Antitrust Division notes the possibility, citing *Railway Employees' Dept.* v. *Hanson* for support, we do not find *Hanson* to instruct that the use of government compulsion to force membership in a private organization requires explicit statutory authority. *See* Antitrust Division comments at 6 n.12.

In *American Trucking Associations*, the Court stated that it did not view it as "a reasonable canon of interpretation that the draftsmen of acts delegating agency powers as a practical and realistic matter, can or do include specific consideration of every evil sought to be corrected. * * * [which is] precisely one of the reasons why regulatory agencies * * * are created." Other cases upholding regulations promulgated pursuant to broad rulemaking authority include *National Association of Pharmaceutical Manufacturers v. FDA*, 637 F.2d 877 (2d Cir. 1981); and *National Petroleum Refiners Association v. FTC*, 482 F.2d 672 (D.C. Cir. 1973), *cert. denied* 415 U.S. 951 (1974). *See also* 2 K. Davis, Administrative Law Treatise section 7:8 (2d Ed. 1979 & Supp. 1982).

[48] The Antitrust Division argues that SEC's request for specific authority in 1963 to make NASD membership mandatory illustrates a similar requirement that the Commission must obtain authority specifically authorizing the Commission to employ its own regulation to achieve RFA membership. The Division cites SEC failure to obtain such authority from Congress and Congress' choice to allow the SEC to implement its SECO Broker-Dealer program as evidence of the need for specific authority. This is of dubious relevance, however, because the Securities Acts Amendments of 1964 and 1975 contain no provision similar to section 17(m). Section 17(m) indicates that Congress has clearly *not* rejected, and in fact has endorsed, compulsory RFA membership.

> The conferees are also aware that unless all persons covered by the regulatory program of a futures association join an association, the self-regulatory purposes of section 17 * * * will not be fulfilled and, in particular, the goal of new section 17(q) may be impossible to achieve.

Commission has statutory authority to adopt the proposed rule. Therefore, interpreting the Conference Report in conjunction with sections 17(m), 17(q), and the Commission's general rulemaking power under section 8a(5), the Commission has statutory authority to promulgate the proposed rule.

C. Section 15 Analysis of Proposed § 170.15

Section 15 of the Act requires the Commission to:

> Take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anticompetitive means of achieving the objectives of this Act, as well as the policies and purposes of this Act, in issuing any order or adopting any Commission rule or regulation, or in requiring or approving any bylaw, rule, or regulation of a contract market or registered futures association established pursuant to section 17 of this Act.

In reviewing the reasons set forth by NFA and other commentators for adopting § 170.15 [50] and in analyzing the objectives, policies and purposes of the Act which § 170.15 would achieve, the Commission gave careful consideration to the potential anticompetitive effects which the rule might have. As noted *supra*, the Commission believes, however, that considerable public policy objectives will be served by § 170.15 and that furtherance of those objectives will outweigh the potential anticompetitive effects which the rule might have.

The Antitrust Division presents several basic reasons why compelling RFA membership may be anticompetitive. First, NFA is the only RFA currently registered and in operation and as such, could impose barriers to entry through fees or other membership requirements. In addition to its oversight of NFA rules and disciplinary actions, however, the Commission has responsibility under section 17(b)(6) of the Act and regulation 170.4 for ensuring that dues and fees are allocated equitably and structured in a manner that does not constitute a barrier to entry into the industry. No such dues or fees may be assessed without the opportunity for prior Commission review. Similarly, NFA membership criteria must be reviewed by the Commission before they may take effect.

The Antitrust Division also suggests that compulsory RFA membership will facilitate collusive behavior and the exchange of information among competitors. The Division does not explain why, however, such behavior would result if RFA membership were compelled. It would seem that those industry participants bent on violating the antitrust laws would have no need to be compelled to join an industry-wide organization before exercising any collusive tendencies which may be present among them. The Commission notes that NFA by its very nature is composed of widely diverse segments of the futures industry whose interests are not necessarily parallel. This very diversity, the representation of these interests on the NFA Board and the Executive Committee, as well as the Commission's oversight authority serve as restraints on the ability of any segment of the commodities industry using NFA as a means of furthering that segment's self interests in an unlawful manner.

The Antitrust Division also notes that NFA could restrict advertising of its members, with anticompetitive results. However, the regulation of members' advertising is a regulatory function compelled by sections 17(p) and 17(q) of the act (NFA is required to establish minimum standards governing the sales practices of its members) and any advertising restrictions would have to be submitted to the Commission for review pursuant to section 17(j) of the Act. The Division's fourth argument, that NFA will impose industry standardization and impede innovation, falls for the same reason. The Commission carefully scrutinizes all proposed NFA rules for their anticompetitive effects. Moreover, rules which ensure prevention of fraud and misinformation are, in many respects, *pro*competitive because such rules help to ensure that information disseminated to customers will be the correct information necessary to the functioning of a competitive market, with all participants competing within an equal regulatory framework.

IV. Expansion of Scope of § 170.15

In its original **Federal Register** Notice setting forth NFA's proposal, the Commission solicited comment on whether § 170.15 should be extended to apply to all FCMs registered with the Commission, or merely those FCMs which are required by statute to be so registered.[51] Of the comments the Commission received, three addressed this issue. One commentator asserted that all FCMs registered with the Commission should be required to belong to an RFA because such FCMs will otherwise reap the benefits of NFA's existence without having any membership responsibilities. The commentator felt, however, that registered FCMs which are not required to be registered should not necessarily have to be full NFA members, but could be conferred "Associate" membership status instead. A second commentator asserted that it is inappropriate to compel membership of those FCMs which do not deal with the public because the regulatory function of RFAs is directed towards dealing with the public and the contract markets. Finally, NFA itself commented that mandatory RFA membership for those FCMs which do not deal with customers is unnecessary, but that such a regulatory requirement would achieve some regulatory efficiency by shifting the financial surveillance function of such FCMs from the Commission to an RFA and by facilitating customer protection should such an FCM begin to deal with customers.

The Commission has determined not to extend the scope of § 170.15 beyond mandatory RFA membership for those FCMs statutorily required to register with the Commission. At this time, it does not appear that expanding the scope of §170.15 to cover all FCMs registered with the Commission is necessary to ensure the effectiveness of NEA's self-regulatory program. The Commission may, however, consider in the future whether any new circumstances or experiences with §170.15 as currently adopted suggest that an expansion of the scope of § 170.15 is necessary.

V. Regulatory Flexibility Act

The Regulatory Flexibility Act [52] requires each Federal agency to consider, in the course of proposing and promulgating substantive rules, the effect of those rules on small entities. The Commission has defined "small entities" for purposes of the Regulatory Flexibility Act as not including

[50] Comments by NFA; the Futures Industry Association; Merrill Lynch Commodities, Inc.; Dunn & Hargitt; and the Commodities Corporation explicitly concluded that a balancing of the public interest and the antitrust objections to the regulation compel adoption of § 170.15. Several other commentators stated that it would be difficult or impossible for NFA to achieve Congress' objective in creating FRAs and in promulgating section 17(m) unless § 170.15 were adopted. registered FCMs.[53] Regulation 170.15 governs registered FCMs only. CPOs, CTAs, and IBs will be affected, however, in that NFA's Bylaw 1101 prohibits NFA members from transacting futures business with nonmembers. Therefore CPOs, CTAs, and IBs will have to join NFA in order to clear trades through FCMs.[54] The Commission has determined that CPOs, like FCMs, are not "small entities" within the meaning of the Regulatory Flexibility Act.[55] In its Proposed Rules governing registration of IBs, the Commission proposed that IBs also not be considered "small entities" for purposes of the Regulatory Flexibility Act in future rulemakings.[56] Although CTAs may be considered "small entities" under the Regulatory Flexibility Act, The Commission has concluded that § 170.15 will not have a significant economic impact on a substantial number of small entities because most CTAs are now members of NFA, and because the primary economic effect of the combination of § 170.15 and NFA Bylaw 1101 will be to require CTAs to pay reasonable dues to NFA. The Commission notes that absent membership in NFA or another RFA, FCMs, CPOs, CTAs and IBs each would be subject to direct Commission regulation in lieu of self-regulation by an RFA and that costs attendant to membership in an RFA are likely to be less than the costs of direct Commission regulation pursuant to section 17(d) of the Act. For these reasons, the Acting Chairman, on behalf of the Commission, certifies that § 170.15 will not have a significant economic impact on a substantial number of small entities.

VI. Modification of Language of § 170.15

The Commission has determined to modify slightly the language of the proposed rule solely for the purpose of clarity. The language of the final rule continues to require each FCM to be a member of a registered futures association which provides for the membership of such FCM unless no such futures association is registered with the Commission. The amended language is not intended to alter the substantive meaning of § 170.15 as proposed.[57]

[56] 48 FR 14933, 14955–56 (April 6, 1983). Even assuming that the Commission determines that IBs may be considered to be small entities in future rulemakings, the primary economic effect of § 170.15 will be to require IBs to pay dues to NFA. This is not an economic effect of "major significance."

[57] The Commission anticipates that should a situation arise where it became necessary for the Commission to suspend or revoke the registration of an RFA, the Commission would address any questions of FCM compliance with §170.15 arising from such a suspension or revocation in the Commission order effecting such suspension or revocation.

Authorities delegations (Government agencies), Commodity futures, Registered futures associations.

For the reasons set forth in this notice, Part 170 of Title 17 of the Code of Federal Regulations is amended by adding a new Subpart C and §170.15 to read as follows:

PART 170—[AMENDED]

Subpart C—Membership in a Registered Futures Association

§170.15 Futures commission merchants.

Each person required to register as a futures commission merchant must become and remain a member of at least one futures association which is registered under section 17 of the Act and which provides for the membership therein of such futures commission merchant, unless no such futures association is so registered.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 5

Delegations of Authority and Organization; Enforcement Activities

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulations for delegations of authority for enforcement activities of FDA credential holders. This amendment redefines the types of records and reports for which special credentials (FDA Form 200c) are required to have access for purposes of copying and verification. That requirement is being modified to provide that special credentials are required only to have access to those records and reports compiled and maintained in the course of research on drugs (human and animal) and devices.

EFFECTIVE DATE: June 7, 1983.

FOR FURTHER INFORMATION CONTACT: Robert L. Miller, Office of Management and Operations (HFA–340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4976.

SUPPLEMENTARY INFORMATION: Section 5.35(b)(2) (21 CFR 5.35(b)(2)) specifies that special credentials are required by FDA officers and employees to request and to have access to and copy and verify certain types of records and reports. That requirement is being modified to provide that special credentials are required only to have access to those records and reports compiled and maintained in the course of research on drugs (human and animal) and devices. Records and reports in other than research activities may be obtained by agency personnel with standard credentials. The delegation is also being revised to delete the reference to "authority to request." This phrase is a meaningless and thus confusing restriction which was never intended to denote anything different from the authority for access.

Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis.

[Docket No. 80F-0359]

Indirect Food Additives; Polymers; Ethylene/4-Methylpentene-1 Copolymers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for an increase in the weight-percent of units derived from 4-methylpentene-1 in ethylene/4-methylpentene-1 copolymers intended for food-contact applications. This action responds to a petition filed by Mitsui Petrochemical Industries, Ltd.

DATES: Effective June 7, 1983; objections by July 7, 1983.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Julia L. Ho, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of October 17, 1980 (45 FR 69044), FDA announced that a food additive petition (FAP 0B3521) had been filed by Mitsui Petrochemical Industries, Ltd., proposing that § 177.1520 (21 CFR 177.1520) be amended to provide for an increase in the weight-percent units derived from 4-methylpentene-1 in ethylene/4-methylpentene-1 copolymers intended for food-contact applications.

FDA has evaluated the data in the petition and other relevant material and concludes that the proposed food additive is safe and that the food additive regulations should be amended as set forth below.

In accordance with § 177.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Bureau of Foods (address above) by appointment with the information contact person listed above. As provided in § 171.1(h)(2), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above), between 9 a.m. and 4 p.m., Monday through Friday.

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Estradiol

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Elanco Products Co. providing for revised labeling for use of an estradiol ear implant for increased rate of weight gain and improved feed efficiency in steers.

EFFECTIVE DATE: June 7, 1983.

FOR FURTHER INFORMATION CONTACT: David N. Scarr, Bureau of Veterinary Medicine (HFV–214), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3183.

SUPPLEMENTARY INFORMATION: Elanco Products Co., a Division of Eli Lilly & Co., 740 South Alabama St., Indianapolis, IN 46206, filed supplemental NADA 118–123 providing for revised labeling for use of an ear implant containing 24 or 45 milligrams of estradiol for increased rate of weight gain in suckling and pastured growing steers, and for improved feed efficiency and increased rate of weight gain in confined steers. Elanco revised the labeling to state that existing implants need not be removed before reimplanting and that no additional effectiveness can be expected from reimplanting in less than 200 days. Existing data demonstrate that edible tissues from animals treated with two implants at the same time do not contain drug residues that exceed levels considered safe for human consumption. Labeling revisions also included instructions for inserting a second implant and cautions concerning increased sexual activity of animals after implantation. These changes do not change the basic safety and effectiveness data that support use of the product. The supplemental NADA is approved and the regulations are amended accordingly.

Approval of this supplement did not require additional safety or effectiveness data or information. Therefore, a freedom of information (FOI) summary as described in 21 CFR 514.11(e)(2)(ii) is not required for approval of this supplement.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

[Docket No. 82N-0138]

Biological Products; Inspection Frequency of All Licensed Biological Establishments and Their Additional Location(s)

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the biologics regulations by changing the required minimum frequency of inspections for all licensed biological establishments and their additional location(s) from at least once every year to at least once every 2 years. This action will provide: (1) Flexibility for the agency to reduce the inspection burden on a specific portion of the regulated industry; (2) greater flexibility for the agency in managing its resources; and (3) uniformity in the frequency of inspection of establishments subject to registration requirements for drugs and certain devices, including those that also are biological products.

EFFECTIVE DATE: July 7, 1983.

FOR FURTHER INFORMATION CONTACT: Rada Proehl, National Center for Drugs and Biologics (HFN–813), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205, 301–443–1306.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 30, 1982 (47 FR 32953), FDA proposed to amend § 600.21 (21 CFR 600.21) to change the required minimum frequency of inspections for all licensed biological establishments and their additional location(s) from at least once every year to at least once every 2 years.

Biological products in interstate commerce are primarily regulated under

the Public Health Service Act (42 U.S.C. 262). Section 351(c) of the Public Health Service Act authorizes the agency to inspect establishments that manufacture biological products. The frequency of such inspections is prescribed in regulations issued under authority of the Public Health Service Act. Specifically, § 600.21 requires that "An inspection of each licensed establishment shall be made at least once each year."

All biological products are also drugs or devices within the meaning of section 201 (g) or (h) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321 (g) or (h)). Therefore, in addition to regulation under the Public Service Act, biological product establishments and their additional location(s) are also subject to the provisions of the Federal Food, Drug, and Cosmetic Act, whether or not the establishments or products are licensed. Section 510 of the act (21 U.S.C. 360) requires that any establishment engaged in the manufacture, preparation, propagation, compounding, or processing of a drug or device be registered with FDA. Section 510(h) of the act requires that every establishment registered with FDA be subject to inspection under section 704 of the act (21 U.S.C. 374) and that every establishment be inspected at least once in each 2-year period beginning with the date of registration. Accordingly, biological product establishments are now required to be inspected more frequently than other drug and device establishments, i.e., at least once every year as a minimum, rather than at least once every 2 years. As stated in the preamble of the proposal, the agency believes that the same flexibility for inspection frequency that is provided for all nonbiological drugs and devices should be extended to biological drugs and devices.

Interested persons were given until September 28, 1982, to file written comments. FDA received six letters of comment on the proposal. All six letters fully supported the proposal and the reasons cited in the preamble for the proposed change. After reviewing these comments, the agency has decided to issue this final rule thus making consistent the minimum required frequency of inspection for biological product establishments and other drug and device establishments. This action will (1) reduce the inspection burden on biological product manufacturers when, in the judgment of the agency, such action is warranted; (2) facilitate efficient management of the agency's resources; and (3) provide a uniform minimum requirement concerning inspection frequency of all drugs and devices. The agency further emphasizes that it will take advantage of its new flexibility to conduct less frequent inspections of biological product establishments only when an establishment's compliance rate has been consistently high and when, in the judgment of the agency, less frequent inspections will have no adverse effect on donor safety or on the manufacture of safe, pure, and potent biological products.

The agency has examined the economic consequences of this rule and has determined that it does not require either regulatory impact analysis, as specified in Executive Order 12291, or a regulatory flexibility analysis, as defined in the Regulatory Flexibility Act (Pub. L. 96–354). Specifically, the rule will reduce the minimum required frequency of inspection of licensed biological establishments and their additional location(s) from at least once every year to at least once every 2 years. Reducing the required minimum frequency of inspection will not change the standards to which these licensed manufacturers of biological products must adhere, but is likely to reduce the frequency of inspection of such licensed manufacturers. This possible reduction in the frequency of inspections should, if anything, reduce the costs associated with inspections. The rule is not a major rule under Executive Order 12291, and the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act.

The agency has determined pursuant to 21 CFR 25.24(b)(12) (proposed December 11, 1979; 44 FR 71742) that this final rule is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

43 CFR Public Land Order 6392

[NM–39993]

New Mexico; Powersite Restoration 772, Partial Revocation of Powersite Reserves 548, 549 and 740, Powersite Cancellation 358, Partial Revocation of Waterpower Designation No. 1 and Powersite Classifications 360, 371 and 393

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This action partially revokes three Executive Orders and four Secretarial orders as they affect 63,849.03 acres withdrawn for powersite purposes in Rio Arriba and Taos Counties. This action will restore the lands to surface entry; however, 6,142.01 acres will contain a reservation subject to provisions of Section 24 of the Federal Power Act. The lands have been and will remain open to mining and mineral leasing.

EFFECTIVE DATE: July 6, 1983.

The areas described contain approximately 6,142.01 acres in Taos County.

3. The State of New Mexico has waived its preference right of application for highway right-of-way or material sites as provided by Section 24 of the Federal Power Act of June 10, 1920, 16 U.S.C. 818.

4. At 8:00 a.m. on July 6, 1983, the public lands shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8:00 a.m. on July 6, 1983, shall be considered as simultaneouly filed at that time. Those received thereafter shall be considered in the order of filing.

The lands have been and continue to be open to the filing of applications and offers under the mineral leasing laws, and to location under the United States mining laws.

Inquiries concerning the lands should be addressed to the Chief, Lands Unit, Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501.

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1175 and 1176

[Ex Parte No. 429]

Elimination and Modification of Certain Securities Regulations

AGENCY: Interstate Commerce Commission.

ACTION: Final rules and application requirements and issuance of final policy statement.

SUMMARY: The Commission has adopted, with one exception,[1] its proposal to eliminate certain securities regulations and modify others.

The proposal as adopted (1) removes as unnecessary the regulations in Part 1176 (formerly 1114), and provides for processing on an *ad hoc* basis any future application for authority to modify the financial structure of a railroad, and (2) relieves motor carriers of the regulations in Part 1175 (formerly 1115), and the offering circular requirement to form OP–F–200 in light of Section 19 of the Bus Regulatory Reform Act of 1982 (Pub. L. No. 97–261), and eliminates restrictions on motor carriers imposed in past proceedings in connection with the issuance of securities, and the assumption of obligations and liability with respect to securities, except with respect to public offerings already authorized but not yet fully implemented. Restrictions imposed by the Commission on motor carriers in past proceedings in connection with the issuance of securities or the assumption of an obligation and liability with respect to the securities of another have no continuing merit considering termination of the Commission's jurisdiction as to future securities issuances. By removing all prior restrictions in this one action, the filing of numerous petitions for relief from past conditions will be avoided, thus resulting in a savings to the motor carriers as well as to the Commission.

EFFECTIVE DATE: July 7, 1983.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245, or John J. Mattras, (202) 275–7677.

SUPPLEMENTARY INFORMATION: The policy statement providing that any future application for authority to modify the financial structure of a railroad will be processed on a case-by-case basis is adopted as proposed at 48 FR 44518, October 7, 1982. Form OP–F–200, Item 7, is amended by eliminating the need for circulars in connection with public offerings of securities by motor carriers.

Additional information is contained in the Commission's full decision. To purchase a copy of the decision write to T. S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

Environmental and Energy Considerations

We adopt our preliminary finding in our notice of proposed rulemaking that this action will not have any significant impact on the quality of the human environment or the conservation of energy resources. No comments have been submitted on any matter indicating that a contrary position is warranted.

Regulatory Flexibility Analysis

We affirm our previous determination that this proceeding will not have a significant impact on a substantial number of small entities, and that this action will further the general regulatory goal of eliminating unneeded regulations.

[1] Part 1113, proposed to be removed by this proceeding was previously removed at 47 FR 49547, November 1, 1982.

Appendix

PART 1175 [AMENDED]

1. 49 CFR Part 1175, *Issuance of Securities, Assumption of Obligations, and Filing of Certificates and Reports,* will be amended by revising §§1175.2, 1175.3, 1175.5, 1175.6, 1175.7, and 1175.10 to read as follows:

§ 1175.2 Application form.

All carriers and other persons subject to 49 U.S.C. 11301, making application for authority to (a) nominally or actually issue securities, (b) sell, pledge, repledge, or otherwise dispose of securities nominally issued or assumed or nominally outstanding, or (c) assume any obligation or liability as lessor, lessee, guarantor, endorser, surety or otherwise in respect of the securities of any other person, natural or artificial, actually outstanding, shall make such application substantially in the form of application designated Form OP–F–200.

1175.3 Definitions.

(a) "Carrier" means a rail or sleeping car carrier providing transportation subject to the jurisdiction of the Interstate Commerce Commission under Subchapter 1 of Chapter 105 of title 49 of the United States Code (except a street, suburban, or interurban electric railroad system of transportation, and a corporation organized to provide transportation by rail carriers subject to the Subchapter).

(b) The term "holding company" means a person which is not a rail carrier but which is authorized by a decision entered under 49 U.S.C. 11343 to control a carrier or carriers and, as provided in 49 U.S.C. 11348, is to be considered a carrier subject to 49 U.S.C. 11301.

(c) The term "securities" is used herein as it is defined in 49 U.S.C. 11301.

§ 1175.5 Disposal of pledged or treasury securities.

(a) Certificates of notification required by 49 U.S.C. 11301(c) to be filed with the Commission within 10 days after the sale, pledge, repledge, or other disposition of securities previously pledged or held unencumbered in the treasury of the carrier, shall be filed substantially in the form designated as Form OP–F–220.

(b) As used in 49 U.S.C. 11301(c), securities described as "pledged or held unencumbered in the treasury of the carrier" are securities previously nominally issued, or reacquired and held in the treasury of the carrier, except securities held by trustee in sinking or other funds. [32 FR 20101, Dec. 20, 1967, as amended at 39 FR 35367, Oct. 1, 1974]

§ 1175.6 Issuance of short-term notes.

(a) A carrier issuing notes referred to in 49 U.S.C. 11301(b)(2) shall file a certificate of notification on Form OP–F–230 with the Commission within 10 days of their issuance.

(b) Short term notes may be issued without authorization as specified in 49 U.S.C. 11301(b)(2).

(c) Removed and reserved.

§ 1175.7 Reports of securities issued or obligations assumed.

(a) Within 30 days after the initial date of issue of any security or assumption of any obligation or liability authorized, a report showing the issue or assumption shall be filed with the Commission on Form OP–F–240, as revised. An interim report shall be made concurrently with any subsequent application for authority filed under 49 U.S.C. 11301, showing the action previously taken, and any balance previously authorized but not disposed of, in the same form; otherwise no interim report is required. A final report shall be made upon completion of the issue or assumption, and may be made in lieu of the initial report within the 30-day period following the initial action.

§ 1175.10 Applications for authority to sell securities without competitive bidding.

(a) Special application for exemption from the competitive bidding requirement shall be made in the form designated as Form OP–F–210 only when it is not practical to include the request for exemption in an application filed in Form OP–F 200 pursuant to the instructions (§§ 1175.1–1175.3) respecting applications filed under 49 U.S.C. 11301.

(b) The requirement that, with certain specified exceptions, all classes of railroad securities other than equipment, issued under authority granted pursuant to the provisions of 49 U.S.C. 11301 be offered for sale at competitive bidding, or its equivalent, set forth in the Commission's report in Ex Parte 158, *In Re Competitive Bidding in the Sale of Securities,* 257 I.C.C. 129 (1944), and modified by findings in *Atlantic Coast Line R. Co. Competitive Bidding Exemption,* 282 I.C.C. 513 (1952), and further modified by supplemental report in Ex Parte 158, *Ibid.,* 307 I.C.C. 1 (1958) with respect to securities issued or proposed to be issued incident to a loan guaranteed under the provisions of part V of the Act, is published in an appendix to this section.

PART 1176—[REMOVED]

2. 49 CFR Part 1176 *Changes in Securities or Instruments and Filing Certificates and Reports,* is removed.

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 13

National Park System Units in Alaska

AGENCY: National Park Service, Interior.

ACTION: Extension of comment period, notice of additional public meetings.

SUMMARY: On April 6, 1983, the National Park Service published in the **Federal Register** (48 FR 14978) a proposed regulation for the permanent closure of certain areas within Denali National Park and Preserve, Glacier Bay National Park and Preserve, and Katmai National Park and Preserve, to snowmachines motorboats, motor vessels and aircraft use. In response to a number of requests for additional time and opportunity to comment on the proposed closures, the National Park Service is extending the comment period from June 6, 1983 to August 6, 1983. Additionally notice is hereby given of seven additional public meetings to discuss and receive public comment on the proposed closures.

DATE: Written comments, suggestions or objections will be accepted until August 6, 1983. See **SUPPLEMENTARY INFORMATION** for the dates and addresses of the meetings.

ADDRESS: Comments should be directed to: Regional Director, Alaska Region, National Park Service, 540 West 5th Avenue, Anchorage, Alaska 99501.

FOR FURTHER INFORMATION CONTACT:
Robert Cunningham, Superintendent, Denali National Park and Preserve, McKinley Park, Alaska 99755, (907) 683-2294
Superintendent, Glacier Bay National Park and Preserve, P.O. Box 1089, Juneau, Alaska 99802, (907) 586-7137
David Morris, Superintendent, Katmai National Park and Preserve, P.O. Box 7, King Salmon, Alaska 99613, (907) 246-3305.

SUPPLEMENTARY INFORMATION: Pursuant to the Alaska National Interest Lands Conservation Act (Pub. L. 96-487, 94 Stat. 2371) and its implementing regulations, 36 CFR 13.30, the National Park Service published on April 6, 1983, in the **Federal Register** (48 FR 14978), a proposed regulation for the permanent closure of certain areas within Denali National Park and Preserve, Glacier Bay National Park and Preserve and Katmai National Park and Preserve, all in Alaska. The closures are intended to prohibit uses detrimental to the resources of the three units, and would restrict the use of one or more of the following: snowmachines, motorboats, motor vessels, aircraft, motor vehicles, all-terrain vehicles, and foot traffic. The April 6, 1983, notice stated that comments on the proposal were to be submitted by June 6, 1983.

The National Park Service has received a number of requests from the Alaska Congressional Delegation, the Governor of Alaska, the Alaska Land Use Council, and citizens and organizations to provide additional opportunities for the submission of public comments. The Service recognizes its responsibility to afford the public every reasonable opportunity to participate in the rulemaking process. The National Park Service also realizes that delays leading up to the April 6 publication of the notice of proposed rulemaking shortened the time available for some interested citizens to prepare for public hearings.

Consequently, the National Park Service is by publication of this notice, extending the comment period from June 6, 1983, to August 6, 1983. The Service will also conduct seven additional public hearings. The schedule of hearings is listed according to affected park unit (hearings in Anchorage and Fairbanks will consider closures in all three areas), and reads as follows:

Glacier Bay National Park and Preserve

July 6, Anchorage Alaska, National Park Service, Regional Office, 540 W. 5th Avenue, 7:00 p.m.
July 7, Fairbanks, Alaska, 201 1st Avenue, 7:00 p.m.
July 7, Juneau, Alaska, Egan Room, New Centennial Hall, 7:00 p.m.
July 9, Gustavus, Alaska, Gustavus School, 1:00 p.m.

Denali National Park and Preserve

July 6, Anchorage, Alaska, National Park Service Regional Office, 540 W. 5th Avenue, 7:00 p.m.
July 7, Fairbanks, Alaska, 201 1st Avenue, 7:00 p.m.
July 21, Healy, Alaska, Tri-Valley Community Center, 7:00 p.m.

Katmai National Park and Preserve

July 6, Anchorage, Alaska, National Park Service, Regional Office, 540 W. 5th Avenue, 7:00 p.m.
July 7, Fairbanks, Alaska 201 1st Avenue, 7:00 p.m.
July 27, King Salmon, Alaska, ComSer Fac, 7:30 p.m.
July 28, Naknek, Alaska, Borough Building, 7:30 p.m.

Dated: June 2, 1983.

Revision

Youth Attitude Tracking Study (YATS); Youth Attitude Tracking Study II (YATS II)

Used to determine and evaluate knowledge of, and attitudes and

motivations toward military Service of young adults (16–29 years of age). Generates cross-sectional time series data on propensity to serve and on other key issues for trend analyses. Used by DoD and Services to develop recruiting strategies and incentive programs including different bonus levels, various types of education assistance, and other enlistment options.

Survey has been revised to increase coverage to the 22 to 29 year old male Non-Prior Service recruiting market and to young adults temporarily residing in group quarters without personal telephones (e.g., in college dormitories, fraternity and sorority bonuses, rooming houses, etc.). YATS II also combines items from Reserve Components Attitude Study (RCAS) concerning attitudes and propensity toward enlisting in National Guard and Reserve Components of the Military Services. YATS II restricts itself to the Non-Prior Service market while RCAS (renamed Veterans Attitude Tracking Study, VATS) surveys the Prior Service market. Thus, the two surveys (YATS and RCAS) have been restructured to reflect Non-Prior Service (YATS II)/Prior Service (VATS) dichotomy.

Target population: 16 to 21 year old males and females and 22 to 29 year old males who are not beyond their second year of college and who have not previously served nor are currently serving in the Military.

Revision requires additional 3500 respondents over 1982 level to ensure acceptable levels of statistical precision: 10,700 respondents and 50 pretest burden hours, for a total of 5400 burden hours.

Record of Decision for the Bonneville Power Administration; Garrison-Spokane 500-kV Transmission Project

AGENCIES: Bonneville Power Administration (BPA), DOE; Forest Service (FS), USDA; and Bureau of Land Management (BLM), Interior.

ACTION: Record of Decision.

DECISION SUMMARY: The Federal agencies have selected the Taft South Route for the Garrison-Spokane Project. This route selection modifies the 1979 corridor decision with respect to transmission line location from Garrison west.

The Federal agencies have adopted the mitigation measures listed in the final Garrison-Spokane 500-kV Transmission Project Environmental Impact Statement (EIS) as "Part of the Proposal." Also included as mitigation for the Taft South route are the following: realining the route south of Maxville (generally following the "AB" routing); adjusting the crossing at Rock Creek about 1300 feet to the north and lowering the conductor wire sag; and determining tower type, placement, and spacing, in consultation with local residents of the Miller Creek area. The State of Montana is continuing to study the Rock Creek and Miller Creek crossings. Their findings will be considered and may be adopted as part of the site-specific measures in the cooperative Federal-State project mitigation/monitoring plan, in the BPA-FS Project Plan, and in project construction specifications. It is the intent of the Federal agencies to prepare a mitigation plan jointly with the State of Montana within a 45-day period following the signing of this Record of Decision. Additional mitigation measures are also prescribed for Maxville, Rock Creek, and Miller Creek, as well as for the St. Regis, Lookout Pass/Mullan, Hayden Creek, and Rathdrum/Pleasant Prairie areas. These will reflect a cooperative interagency effort and will be completed after this Record of Decision. General mitigation measures adopted are summarized below.

The FS and BLM have decided to issue right-of -way permits authorizing the project where it crosses Federal lands.

BPA will proceed with land and right-of-way acquisition, construction, and subsequent operation and maintenance of the proposed facilities on the Taft South route.

SUPPLEMENTARY INFORMATION:

Background:

The Bonneville Power Administration proposed to build a 500-kVB transmission line from Garrison, Montana, to Spokane, Washington. The Forest Service and the Bureau of Land Management proposed to grant right-of-way across their respective public lands for that transmission project. This is the record of the Federal agencies' decisions on those actions.

The need for Colstrip power was decided in July 1976, when the State of Montana granted a Certificate of Environmental Compatibility and Public Need for Colstrip Generating Units 3 and 4. That need is not a subject of this Record of Decision.

In a Record of Decision for the crossing of Federal lands, dated September 21, 1979, the BLM and the Forest Service jointly approved a two-mile-wide transmission line corridor from Colstrip, Montana, to Hot Springs, Montana. Bonneville Power Administration concurred with this decision, stating that it would build a double-circuit 500-kV transmission line in the designated corridor. The line would start at the interconnection, near Townsend, with the facilities built by Montana Power Company; it would extend to a new 500-kV substation in the vicinity of Garrison, Montana, and continue on BPA's existing vacant right-of-way through the Clark Fork Valley to the Missoula area. From there, it would go on to interconnect with the existing Federal grid, either by continuing along the existing corridor to the present Hot Springs Substation, or by proceeding along a new corridor to a new substation near Plains, Montana.

In response to public concerns, including those of the State of Montana, deviations from the designated corridor in the Boulder and Deer Lodge area were evaluated in an EIS Supplement prepared cooperatively by BLM, FS, and BPA, with BLM as lead agency. The Record of Decision adopting alternative locations between Townsend and Garrison, Montana, was then issued on August 18, 1981.

Also at that time, BPA studies identified a new potential route between Garrison Substation and a substation that could be build near Taft, Montana. The Washington Water Power Company

also identified new increasing needs for transmission reinforcement in north Idaho. These technical factors, plus public concerns over developing a line in the federally approved corridor in the Clark Fork Valley, prompted BPA to consider other routing alternatives between Garrison Substation and the main grid of the Federal Columbia River Power System.

Together, the BPA, FS, and BLM completed a route study and both draft and final EIS's for a 500-kV transmission line between Garrison Substation and Bell Substation near Spokane, Washington.[1] The State of Montana also participated in the study process by conducting an independent, parallel review of the project and by working cooperatively to develop mitigation and monitoring plans.

The draft EIS, issued in March 1982, was followed by the final EIS, filed with the Environmental Protection Agency on March 15, 1983. The draft EIS identified the Taft Plan and, in particular, the Taft South Route as the alternative of least environmental impact. The final EIS also concluded that the Taft Plan had the least environmental impact and that it was preferred. Also included in each EIS was an evaluation of the reinforcing of the Washington Water Power transmission system in north Idaho. A separate Record of Decision is being prepared for this independent action.

The draft EIS, issued in march 1982, was followed by the final EIS, filed with the Environmental Proctection Agency on March 15, 1983. The draft EIS identified the Taft Plan and, in particular, the Taft South Route as the alternative of least environmental impact. The final EIS also concluded that the Taft Plan had the least environmental impact and that it was preferred. Also included in each EIS was an evaluation of the reinforcing of the Washington Water Power transmission system in north Idaho. A separate Record of Decision is being prepared for this independent action.

Alternatives and Decision Rationale: Within the framework of three electrical plans-of-service (the Hot Springs, Plains, and Taft Plans), numerous route alternatives were considered. The alternative of No Action was also considered. The decisions were based on the factors of purpose and need, environmental effects, cost considerations, engineering performance, and public concerns.

The alternatives are presented below in order of preference.

[1] In this study, the "routes" meant tentative line locations within a broader corridor. Impacts were evaluated along these routes.

(I) *Alternative C—Talf Plan (Selected Alternative):* On the Taft South route, a 500-kV double-circuit line proceeds southwest from Garrison Substation, across the Fling Creek Valley near Maxville, then northwest across the Sapphire Mountains south of Missoula. It crosses the Bitterroot and Clark Fork Rivers, then heads west near St. Regis to a new 10-acre substation at Taft. The double-circuit portion of the route is 157 miles long. A single-circuit 500-kV line leaves Taft Substation, and enters Idaho near Mullan. It continues through the Coeur d'Alene Mountains, then emerges onto Rathdrum Prairie near Coeur d'Alene, where it joins an existing corridor and continues into Bell Substation at Spokane. The single-circuit portion is 101 miles long. Additional terminal equipment will be installed at Garrison and Bell Substations. The overall cost of this plan is $244 million. This is the environmentally preferred route location.

In selecting the Taft Plan, the agencies considered tradeoffs among the factors discussed below. Review documents used in making this decision included: the *Garrison-Spokane 500-kV Transmission Project Environmental Impact Statement* (Draft anf Final) (available from the BPA Transmission Coordination Office, 1620 Regent, P.O. Box 4327, Missoula, MT 59806); the Montana State DNRC draft and final reports on *Preferred and Alternate Routes: BPA 500-Kilovolt Line From Garrison-West* (available from DNRC Offices, 32 South Ewing, Helena, MT 59620); and the Montana Board of Natural Resources and Conservation recommendations (May 6, 1983). Based on a series of route comparisons made by an interagency, interdisciplinary team (BPA, FS, BLM, Montana DNRC), the agencies decided that the lesser effects of the Taft Plan, particularly on the people-related resources emphasized during public review, outweighed its relative disadvantages in terms of higher cost and greater effects on certain natural resources.

(A) *Taft South route:* This route was selected as the best overall route location. The decision factors considered were:

(1) Overall, this route would minimize environmental impact.[2] The Taft South route would have the least impact on social and economic resources, developed land, future residential development, agriculture, recreation, and visual resources. Although effects on certain natural systems would be higher, the interagency team analysis concluded that these effects generally could be more readily reduced or avoided by mitigation than could social or land use impacts.

(2) The overriding public concern about the effects of transmission lines was to avoid impacts on people and people-related concerns. The Taft South route best meets this concern.

(3) The Taft South route encounters about the same number of environmentally sensitive areas as do the other plans. The Taft South route offers more opportunities to avoid or mitigate effects in such areas than the other plans do. The major sensitive areas encountered by this route are Maxville, Rock Creek, Miller Creek, St. Regis, Lookout Pass/Mullan, Hayden Creek, and Rathdrum/Pleasant Prairie.

(4) Along the Taft South route, mitigation strategies and alternatives were examined at each of these sensitive areas. Measures adopted to reduce or avoid adverse effects are listed under Mitigation. Because of the complexity of issues involved, the decision factors for Maxville, Rock Creek, and Miller Creek are discussed below.

(a) *Maxville:* The Federal agencies and the State of Montana have continued to work with local residents to mitigate those impacts of the proposed route (called Route "A") related to social concern and proximity to people. Numerous route variations between the original proposed route and an area three miles south of Maxville were examined. These were narrowed down to two principal route adjustments: one just north of Maxville (called "AA") and another, and its variation, well to the south (called "AB" and "AB Modified"). A route was selected which generally follows the AB option south of Maxville (and including a site-specific adjustment near Boulder Creek) until it crosses Highway 10A; from the highway west, the route will proceed north and west to rejoin the original route as soon as is practicable. This adjustment reduces social effects and is located farther from developed land uses. The exact location of this adjustment will be worked out to minimize access road construction while still avoiding proximity to residences.

(b) *Rock Creek:* In response to Montana State Aeronautics Division concerns about foul weather aviation

[2] The term "environment" has been used in the project analysis to include its natural, physical, social, and economic aspects, as required by the National Environmental Policy Act (NEPA) under 40 CFR Part 1508.14.

hazards from the proposed line crossing, several alternate crossings were examined between the mouth of Rock Creek and a point several miles up the valley. A proposal to adjust the original crossing about 1300 feet north and lower the sag of the conductor wires was adopted because it meets the aeronautical requirements; minimizes land use, soils, water, and fisheries effects; and provides the least visually intrusive option available through the most heavily used part of the drainage. No other alternative meets all these criteria.

(c) *Miller Creek:* A number of routing variations have been examined. The selected routing is south of Miller Creek along the base of a broad hill. Because of expressed public concern and the potential for high visual impact, tower designs and placement, as well as their spacing, will be coordinated with area residents.

(5) From a technical standpoint, the Taft Plan would reliably integrate electric power supplied by the Colstrip generating units in eastern Montana. Constructing transmission facilities for this plan would allow the Bonneville Power Administration to provide necessary reinforcement to the interconnected regional power system.

(6) This alternative would have the highest total cost, about $20 million more then the lowest-cost Hot Springs Plan.

(B) *Taft North route:* This route was the second-best overall route location. It follows a more northerly course along the Clark Fork River between Garrison Substation and Missoula. This alternative offers a lower-impact option for forestry and for cultural and aquatic resources, but would affect more residences and recreational viewers. It is close to the Taft South route in overall impact. It was not selected because of the emphasis in the project area on avoiding impacts on people and because the impacts would be more difficult to mitigate.

(II) *Alternative B—Plains Plan:* A 500-kV double-circuit line would extend west from Garrison Substation to a new 12-acre substation near Plains, Montana, where these circuits would intersect with existing lines. From there, a 500-kV single-circuit line would be built to Bell Substation. The double-circuit portion is about 153 miles long, and the single-circuit portion is about 111 miles long, for a total of 264 miles. Terminal equipment would be added at Garrison and Bell Substations. Overall cost would be $229 million.

The Plains Plan was the second-best plan. The primary reason for not selecting this plan was that it would affect a greater number of people and offer fewer options for mitigation, particularly in major environmentally sensitive areas. Also, the relatively more severe impact on people are not offset by substantially lower effects on other resources.

(III) *Alternative A—Hot Spring Plan:* A 500-kV double-circuit transmission line would extend from Garrison Substation to Hot Springs Substation and beyond through the Clark Fork Valley to Thompson Falls, a total distance of 57 miles. From Thompson Falls to Bell Substation, 111 miles would be designed for single-circuit construction. The line would be 268 miles long altogether. Substation terminal equipment would be added at Garrison, Hot Springs, and Bell Substations. Estimated overall cost is $225 million.

The Hot Springs Plan was the least-preferred alternative. Even the best route for this plan would create more social, land-use, and other people-related effects than routes of the other plans. The impacts would be slightly counter-balanced by lesser effects on natural resources.

(IV) *No Action Alternative:* Under the No Action alternative, the Colstrip transmission system would be built to Garrison Substation, but the regional transmission system would not be reinforced, and 500-kV transmission facilities would not be built from Garrison west.

The No Action alternative was not selected because it does not meet the purposes and needs to which BPA is responding: that is, to integrate and transmit additional electric power from the Colstrip generating units and to reinforce the regional power system to insure adequate electrical reliability and electrical stability.

Mitigation: Many environmental considerations that have been applied in siting the line can be termed best resource management practices. These considerations are an integral part of the siting and mitigation process. However, they are not repeated here as mitigation measures. Only those actions necessary to reduce residual impacts that cannot otherwise be avoided are included.

The following means of mitigating environmental impacts of the project are adopted. The involved Federal and State agencies are jointly identifying site-specific mitigation measures to incorporate into the cooperative mitigation plan and the Project Plan. Adopting these mitigation measures insures that all practicable means have been used to protect the environment from harm; it also insures that the agencies will follow their respective mandates for land management as set forth in law, regulation, and policy.

(I) *General measures adopted:* Certain mitigation measures listed in the final EIS are standard BPA, FS, and BLM policy. These policies address such things as interference to radio, television, and communication facilities and by audible noise; weed control; restoration and compensation for damage in agricultural areas; protection of wildlife habitat and hunting opportunity; herbicide use; erosion control at stream crossings; protection of cultural resources (procedures for which are also spelled out in 36 CFR 800 and in standard construction specifications); planning for access roads; and coordination of clearing.

Other measures listed in the final EIS are part of BPA's standard construction specifications (Part 1, Chapter 4; Part 2, Chapters 2 and 3; and Part 3, Chapter 1). Those measures covered by standard specifications involve burning of debris; dust control; construction shutdowns to prevent excessive erosion; and cultural resource protection.

Other general measures adopted are to: minimize right-of-way clearing consistent with safe, reliable operation of the line; control access road development; control soil erosion and sedimentation; coordinate both clearing and tower and road locations; schedule construction as necessary to avoid sensitive wildlife habitat and poor soil conditions; otherwise reduce or avoid effects on wildlife or their habitat and impacts on hunting opportunity; avoid effects on honeybees; reduce Visual intrusion; and reduce disturbance of desirable vegetation.

Other measures considered in the final EIS and adopted are:

(A) In areas where WWP and BPA construction are parallel, the tower design, spacing, right-of-way clearing, and access road requirements of the two lines will be coordinated to reduce potential impacts.

(B) Where the right-of-way is near areas with potential for future residential development, BPA will work with city/county planning agencies to establish local policies for reducing future land use conflicts along the right-of-way, especially those that would preclude parallel construction of future lines within existing right-of-way.

(C) BPA will work with landowners to maintain and repair cattle guards, fences, and gates affected by BPA maintenance activity on access roads.

(D) Before the start of construction (at least 30 days if possible), BPA representatives and the construction contractor will meet with officials of

affected communities and with local business representatives to discuss the size and timing of predicted temporary increases in population, provisions for housing workers, and possible demands on local services. This action is intended to reduce community concerns about construction period impacts and to allow time to prepare for stresses on local services.

(II) *Measures adopted in specific areas:* This discussion details resources that could be affected and measures adopted to reduce those effects for certain sensitive areas. Similar measures will be used in other areas as required. The cooperative Federal/State effort on centerline mitigation and monitoring has been established and will continue. This effort is focusing on: identifying additional sites which require specific mitigation (such as managing road closures or reducing amounts of access); adjusting centerline, tower, or access road locations to effect mitigation; and planning monitoring programs to determine the effectiveness of the measures.

(A) Maxville/Flint Creek, Montana

(1) *Potential Effects.* Proximity to people and developed residential lands;

Interference with agricultural practices; loss of agricultural production; proximity to livestock;

Visual intrusion on residents and travelers on Highway 10–A and on scenic landscape.

Reduction of big game (elk) habitat security.

(2) *Adopted Mitigation.* Select routing south of Maxville (generally "AB") to reduce concerns for social and land use impact;

Closely coordinate centerline and tower locations with local residents to avoid residential, agricultural, and grazing land;

Minimize clearing/top trees as necessary at highway crossing to reduce visual effects;

Institute a road use management program to reduce effects on big game;

Use nonspecular conductor wires and darkened towers to reduce visual effects.

(B) Rock Creek, Montana

(1) *Potential Effects.* Conflicts with recreational use of nationally renowned fishing stream and developed recreation sites;

Disturbance of prime fishery resources and bald eagle habitat;

Disturbance of sideslopes sensitive to scarring, erosion/sedimentation;

Conflict with emergency foul-weather flyway.

(2) *Adopted Mitigation.* Limit clearing and/or top trees on valley bottom or on lower or middle slopes to reduce effects on recreational, fish, wildlife, and soils resources;

No access road construction on valley bottom or lower slopes to reduce effects on those resources;

Locate towers high on the side slopes to reduce effects on those resources;

Darken towers and use nonspecular conductor wires to reduce visual effects;

Use long span; use special conductor wire sag to reduce visual effects of cleared right-of-way;

Use marker balls and no overhead groundwires to reduce flyway conflict [3];

Assist Montana State Aeronautics Division in updating state aeronautic charts to show the transmission line location.

(C) Lolo/Miller Creek/Blue Mountain, Montana

(1) *Potential Effects.* Proximity to people and established and proposed residential subdivisions;

Visual effects on highway travelers and developed areas;

Disturbance of unstable soils;

Disturbance of fishery resources and bald eagle habitat.

(2) *Adopted Mitigation.* Adjust location near Cahoot Creek and Deadman Gulch to avoid residential areas and to reduce visual effects;

Use tubular steel towers or darkened lattice towers and use nonspecular conductor wires to reduce visual effects;

Selectively clear; minimize access road construction and overall ground disturbance to reduce visual effects and disturbance of wildlife and fisheries habitat and of soil;

Avoid undercutting steep slopes to minimize soils disturbance;

Top trees at river and highway crossings to reduce visual effects;

Raise tower heights near Deadman Gulch to reduce clearing to reduce visual effects.

(D) St. Regis, Montana

(1) *Potential Effects.* Proximity to people, towns and undeveloped subdivisions;

Intrusion on major planned community park;

Soil and vegetation disturbance on steep slopes, particularly at Clark Fork River crossing;

Visual effects on Highway 461 travelers.

(2) *Adopted Mitigation.* Select the Tamarack Creek alternative alignment to avoid developed areas and a planned park;

Reduce clearing and road construction at the Clark Fork River crossing;

Use nonspecular conductor wires and darkened towers to reduce visual effects.

(E) Lookout Pass, Montana/Mullan, Idaho

(1) *Potential Effects.* Visual intrusion at Lookout Pass and recreation sites and to travelers on I–90;

Visual degradation of highly scenic landscape;

Taft Substation site (effects on water resources, soils).

(2) *Adopted Mitigation.* Clear selectively to reduce visual effects;

Use darkened towers or improved appearance towers and use nonspecular conductor to reduce visual effects;

Adjust Taft Substation site location and design; reconfigure access road system to avoid effects on water resources and soils;

Use special erosion control measures on Taft Substation road system to avoid effects on water resources, fisheries habitat, and soils.

(F) Hayden Creek, Idaho

(1) *Potential Effects.* Conflicts with use of general recreation area and intensive recreation use sites;

Disturbance of fishery resources;

Intrusion on prehistoric camps;

Conflict with forest management plans;

Potential to compound existing erosion and water quality problems;

Visual effects on residents and Highway 95 travelers.

(2) *Adopted Mitigation.* Adjust location out of Hayden Creek drainage to avoid all the above problems;

Use darkened or tubular steel towers and nonspecular conductor wires to reduce visual effects;

Reduce clearing; top trees (as necessary) in vicinity of Highway 95 crossing to minimize visual effects.

(G) Rathdrum Prairie/Pleasant Prairie, Idaho-Washington

(1) *Potential Effects.* Proximity of transmission right-of-way to developed and developing areas;

Conflict with agricultural land;

Intrusion on upland sandpiper habitat.

(2) *Adopted Mitigation.* Use nonspecular conductor and treated towers to reduce visual effects on developed areas;

Place towers to minimize disturbance to farming practices;

[3] Measures to reduce visual intrusion and those to avoid airway hazards may be in direct conflict.

Coordinate timing of construction to avoid disturbance of upland sandpiper habitat;

Limit numbers of towers; do not build permanent access through upland sandpiper habitat.

(III) *Mitigation Not Adopted:* The following measures, listed in the final EIS as "Not Included in the Proposal," have not been adopted:

(A) Helicopter Construction: Construction of parts of the BPA 500–kV transmission line solely by helicopter has not been adopted because the weight of the tower structures exceeds helicopter lifting capacity, particularly at the moderately high (4000–6000+ feet) elevation along the route. Certain phases of construction—such as stringing of sock line—may be done by helicopter.

(B) Underground Construction: Undergrounding of any portion of the transmission line has not been adopted because the following factors heavily outweigh potential mitigation results (which would principally be used to reduce visual impact): Uncertain reliability due to present technological limitational; the risk of a prolonged outage of a major transmission intertie; the significantly increased cost; geologic instability; the risk of negatively affecting steambed hydraulics; the risk of cable damage, resulting in oil spill pollution; possible tradeoffs for impacts on other resources such as residential and agricultural land uses. In summary, the agencies concluded that it is not reasonable to incur the added cost of underground transmission systems in the face of the uncertainly whether systems would meet reliability criteria or would alleviate impacts as intended.

Monitoring and Enforcement: The involved agencies will insure that mitigation measures identified in the final EIS, and adopted in this Record of Decision, are included in the construction contract specifications. The Federal land management agencies will assign project coordinators and field representatives to work with BPA construction coordinators and field representatives on Federal lands. The BPA inspectors who monitor the project will be responsible for insuring that the measures agreed to in this Record of Decision and subsequent Project Plan, right-of-way permit, and BPA construction contract specifications are carried out. BPA will work with the affected States to establish and enforce mitigation measures on State and private lands. The monthly report from the BPA Division of Construction will identify mitigation measures that have been initiated and/or completed as specified in the project contract.

A designated archeologist will be present when digging is being done at cultural sites identified in the contract specifications, at the request of the appropriate land managing agency. The construction contractor will notify BPA one week before beginning work in these areas.

Integration With Other Requirements: The Taft South route crosses portions of five Roadless Area Review and Evaluation (RARE) II inventory areas in Montana (Nos. 424, 790, 791, 795, and 800) and one in Idaho (No. 139). All six of these areas were designated as "nonwilderness" in the Forest Service's RARE II process. As a result of a recent decision by the Court of Appeals for the 9th Circuit regarding the status of RARE II areas in California [*California* v. *Block*, 690 F. 2d 753 (9th Cir. 1982)], the Forest Service will reevaluate all RARE II areas nationwide through the Forest Service forest planning process. Meanwhile, the Forest Service will continue with its land management of these areas, in keeping with their nonwilderness designation under the RARE II process.

Under requirements of the intergovernmental Coordination Act, BPA has notified the Washington, Idaho, and Montana State Clearinghouses of the project by sending them the draft and final EIS's. The Garrison-Spokane Project is consistent and compatible with State and local development plans to the extent possible. Copies of this Record of Decision will be sent to State clearinghouses for notification of the decisions that have been made.

The following historic properties in the study area have been listed on the *National Register of Historic Places* and may be affected by having the project within view:

DeBorgia Schoolhouse—Mineral County, Montana; in DeBorgia,

Murray Courthouse—Shoshone County, Idaho; in Murray,

John C. Feehan House—Shoshone County, Idaho; in Murray,

United States Forest Service Remount Depot (Ninemile Ranger Station)—Missoula County, Montana; northwest of Huson,

Traveler's Rest—Missoula County, Montana; in Lolo.

Other properties listed on or eligible for the *Nation Register* may be susceptible to visual intrusion from the transmission line. However, such intrusion would not be likely to affect adversely the qualities for which the properties are listed or are eligible for inclusion. This is because the properties were recognized for their historical significance or their architectural qualities and integrity, not specifically for the quality of their settings.

Numerous prehistoric sites listed in the Montana State Inventory, and presumed to be eligible for the *National Register*, may be affected by the project. Field evaluations and determinations of eligibility will be made of all sites along the proposed route before construction begins. A memorandum of agreement is being concluded among BPA, the appropriate State Historic Preservation Officer, the FS, the BLM, and the Advisory Council on Historic Preservation; it stipulates mitigation measures to be carried out should any sites be found eligible.

The U.S. Fish and Wildlife Service (USFWS) provided biological opinions on this project in connection with the bald eagle, grizzly bear, gray wolf, and peregrine falcon. These opinions concluded that the project would have "no effect" on these species or their habitats. BPA will send a copy of this Record of Decision to USFWS, informing them of our decision and that the decision complies with the recommendations made in the opinions.

Between 1 and 6 acres of Prime farmland could be occupied by tower bases, thus converting it to other uses. Because the transmission line route must cross or parallel certain valleys where Prime farmland is concentrated, there is no practicable alternative to such conversion. Various measures listed under Mitigation will be used on Prime farmland to minimize the amount taken out of production. These measures basically involve coordination of tower locations with the landowners.

Under requirements of the Clean Air Act, BPA will secure necessary State air quality and open burning permits.

In accordance with the requirements of the Federal Clean Water Act, BPA will obtain necessary State water quality and pollution discharge permits.

Implementation: The following provisions must be met before construction can proceed:

(I) Right-of-way permits across Federal land (Federal Land Policy and Management Act of 1976) will be issued by the FS and BLM. The right-of-way permit granted by the FS will include, by reference, a Project Plan which will specify mitigation measures required to protect the environment of National Forest System lands. The BLM right-of-way permit will include similar stipulations for BLM land.

(II) On National Forest System lands only, this decision is subject to a formal administrative review process, pursuant to 36 CFR 211.18. Under this process, any notice of appeal must be filed

within 45 days from the date of this Record of Decision. Right-of-way permits will be issued following the appeal period.

Copies of this Record of Decision are being sent to agencies, organizations, and individuals who commented on the EIS.

Each Federal decisionmaker, by signing an original copy of this Record of Decision, is making a decision to the extent of the agency's jurisdiction.

Office of Energy Research

Proposed Fiscal Year 1984; Energy Research Instrumentation Program

AGENCY: Department of Energy.

ACTION: Solicitation of comments on proposed program announcement.

SUMMARY: Prior to developing the eligibility requirements and other limitations for its Energy Research Instrumentation Program, the Office of Energy Research is seeking comments on the preliminary program guidelines given below. This program will be initiated in FY 1984, subject to the availability of funds. This program is responsive to the overall national concern about the shortage of state-of-the-art instrumentation available to universities and colleges. The program will support about 30 instrumentation projects ranging from about $100,000 to about $500,000. Eligible institutions will be limited to colleges and universities with demonstrated capabilities to carry out significant energy research in at least one of the selected areas of emphasis.

DATE: Comments must be filed by July 7, 1983.

ADDRESS: Address comments to the Division of University and Industry Programs (ER–44), Department of Energy, 1000 Independence Avenue, S.W., Room 3F–077, Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT: Dr. Israel Warshaw, Division of University and Industry Programs, Office of Field Operations Management, Office of Energy Research Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Telephone Number: (202) 252–6641.

SUPPLEMENTARY INFORMATION:

Background

Subject to the availability of funds in FY 1984, the Department of Energy plans to initiate a new program intended to help reduce the shortage of state-of-the-art instrumentation required for energy-related research in universities and colleges. This program is part of an interagency effort to help decrease the overall shortage, estimated to exceed one billion dollars, of research equipment in universities. Before developing the final program announcement, the Department of Energy is seeking comments on the overall concept and related guidelines which are proposed in this notice. Written comments from interested parties should be sent to the address given in the **ADDRESS** heading, above.

The overall objective of this program is to assist universities and colleges in strenthening their capabilities to conduct long-range research in specific energy research and development areas of interest to DOE through the acquisition of specialized research instrumentation. An ancillary objective of this program is to ensure that graduate students are trained in the use of state-of-the-art equipment. Therefore, the number of graduate students associated with energy research projects which will benefit from this equipment is of particular interest to the Department. The FY 1984 congressional budget request for this program is $6,000,000. It is expected that about 30 grant awards will be made, typically ranging from about $100,000 to about $500,000.

Authority for the Energy Research Instrumentation Program is contained in Section 31 (a) and (b) of the Atomic Energy Act of 1954 (42 U.S.C. 2051, Pub. L. 83–703), Section 209 of the Department of Energy Organization Act of 1977 (42 U.S.C. 7139, Pub. L. 95–91).

Areas of Interest

In the formal program announcement, the Department of Energy will identify specific research areas of interest for which instrumentation support will be considered.

While the equipment requested may be suitable for use for research on other energy-related topics, the need for the equipment must be justified in terms of its value and ability to enhance the institution's capabilities in one or more of the selected areas.

Instrumentation Summary

The program will be intended to assist those institutions with demonstrated capability in designated research areas to obtain the larger instruments (items costing about $100,000 and more) which are required on-campus to strengthen research on the designated areas.

The Department is concerned that the equipment provided through this program should be available for a reasonable life span. Thus, the DOE will be interested not only in how the institution will utilize the funds which the Department provides, but also how the institution plans to meet other related costs (e.g., installation, operation and maintenance, etc.). In addition, the Department will be interested in the institution's plans for obtaining the funds needed to replace this equipment after it becomes "obsolete."

Small research instruments (costing less than about $100,000) that are more likely to be used independently rather than as part of an integrated, campus-based research facility will not be eligible for consideration in this program.

General purpose computing equipment is not eligible under this program. However, laboratory computers and associated peripherals dedicated for use in connection with the instrument(s) requested or for use with existing research instruments in any of the designated areas will be considered.

Eligibility and Limitations

Parties eligible to receive funds under this program will be limited to universities and colleges which have received a minimum of $300,000 during the past two years from DOE for research in at least one of the selected areas for which the equipment will be used. There are two reasons for requiring these minimum eligibility criteria. First, in view of the limited funds available for this program relative to the total need of energy-related research instrumentation, the Department's commitment in FY 1984 will be to help strengthen and expand the research and graduate education capabilities of those university research groups who are already well established and contributing to the Department's longer-range research needs and missions. Universities seeking to

participate in this program must demonstrate their current capabilities to carry out major research programs of direct relevance to the research supported by the Department. Second, types of instrumentation to be supported through this program are complex, are at the state-of-the-art in instrumentation development, and will cost in excess of $100,000. Effective utilization of the full capabilities of these instruments for advanced energy research in a university environment requires significant numbers of scientists, students, and support personnel. DOE believes that only those university research groups with large, on-going scientific research programs will be able to take full advantage of the capabilities of such instrumentation to enhance and expand their energy research programs. Accordingly, DOE has determined that the $300,000 minimum funding level during the past two years is a realistic measure of research capabilities in, and commitment to, one or more of the selected areas for which instrumentation support is requested.

Available Funds

$6,000,000 is included in the Department's FY 1984 congressional budget request for this program. Approximately 30 grants are expected to be awarded; the size of each grant will vary and may range from about $100,000 to about $500,000. This estimate does not bind the Department of Energy to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations. The number of awards to any institution will be limited with most institutions receiving only one grant. However, if a university or college demonstrates unusual scientific merit in a number of the designated areas, DOE may award more than one grant to that institution.

DOE intends to continue this program in FY 1985. If prior to the release of the final program announcement it appears that in FY 1985 the program's eligibility requirements, designated research areas and evaluation criteria will be similar to those for FY 1984, the program announcement may include a statement which will permit universities to request that their proposals, which were received but not funded in fiscal 1984, be retained by DOE and reevaluated along with any new proposals received in response to the FY 1985 program announcement. Such a provision would decrease the amount of effort required of universities to submit proposals for the FY 1985 research instrumentation program.

Invitation to Comment

Interested persons are invited to submit written comments and recommendations regarding the proposed program announcement. Comments and recommendations should be sent to the address given in the ADDRESS heading, above. All comments received on or before July 7, 1983, will be considered in the development of the final program announcement. Comments are specifically invited on: the overall proposed approach of the program; the specific objectives of the program; the proposed minimum eligibility criteria; the evaluation criteria; the page limit of the proposal relative to the information required; the dollar range of the awards.

All comments submitted in response to the proposed program announcement will be available for public inspection, during and after the comment period, in Room 3F-071, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday of each week except Federal holidays.

Issued in Washington, D.C. on June 1, 1983.

I. Program Description

A. Background

The Department of Energy (DOE) announces a new program initiative intended to help alleviate the national shortage of state-of-the-art instrumentation in universities and colleges with major, energy-related research programs. The overall objective of this program is to assist these institutions in strengthening their capabilities to conduct long-range research in specific research and development areas of interest to DOE through the acquisition of specialized research instrumentation. In FY 1984, the Department plans to award approximately $6,000,000 through this program. It is expected that approximately 30 grant awards will be made, ranging from about $100,000 to about $500,000. The program is primarily intended to assist those institutions with demonstrated capability in designated research areas (See Section II) to obtain the larger instruments, items costing about $100,000 or more, which they require on campus to strengthen their research on these areas. DOE will consider funding instruments such as scanning electron microscopes, nuclear magnetic resonance spectrometers, ion microprobes, laser diagnostic systems, etc. This special program is complementary to and does not replace the Department's efforts to provide funds for equipment required on an individual research project supported through the cognizant research programs. Requests for such instrumentation should continue to be included in research proposals which are submitted to DOE's basic and technology research programs.

The Department expects that the equipment provided through this program should be available for a reasonable life span. Thus DOE will be interested not only in how the institution will utilize the funds which the Department provides, but also the institution's plans for meeting related costs such as might be incurred in installing, operating and maintaining the equipment during its effective life span. The institution's plans for meeting these costs and for obtaining the funds required to replace the equipment after it becomes "obsolete" should be discussed in the proposal.

An ancillary objective of this program is to ensure that graduate students are trained in the use of state-of-the-art equipment. Therefore, the number of graduate students associated with energy research projects which will utilize this equipment is of interest to DOE.

B. Eligibility and Limitations

Participation in the Energy Research Instrumentation (ERI) Program is limited to U.S. universities and colleges which are currently conducting research in one or more of the areas to be listed in Section II of the program announcement, and which, during the past two years, have received a minimum of $300,000 from DOE for research in one of the designated areas for which the equipment is requested.

Small research instruments (less than about $100,000 each) will not be eligible for consideration in this program. As noted above, funds for such instruments should continue to be included in

proposals to the Department's cognizant research programs.

General purpose computing equipment is not eligible under this program. However, laboratory computers and associated peripherals dedicated for use in connection with the instrument(s) requested or for use with existing research instruments in any of the designated areas will be considered.

II. Designated Research Areas

A. Eligible Areas of Interest

During FY 1984, DOE's Energy Research Instrumentation (ERI) Program will be concerned primarily with capital equipment needed for research in a limited number of designated energy areas. [The eligible designated research areas will be listed and defined in the program announcement.]

While the equipment requested will be equally suitable and may be used for research on other energy-related topics, the need for the instrument(s) must be justified in terms of its value and ability to enhance the institution's capabilities in one or more of the designated areas.

III. Proposal Preparation and Format

A. Objective

The principal objective of a proposal to DOE under this program is to demonstrate the potential impact of the requested equipment, indicating how it will:

1. Enhance the technical excellence of the institution's research programs in the designate area(s), and

2. Increase the institution's ability to conduct more advanced research in this area(s).

Furthermore, the proposal should demonstrate that the institution's current and/or recent research projects in this area(s):

1. Are of the highest scientific merit;

2. Are contributing to the nation's need for knowledge and data on these topics; and

3. Are contributing to the training of advanced students.

B. Proposal Format

Each proposal submitted to the ERI Program must be signed by the president of the institution or his/her designated officer and submitted by the institution. The proposal should not exceed 30 pages in length, including: resumes, attachments, photographs, tables, illustrations, lists, etc. The proposal should be typed double-spaced on one side of 8½ inch by 11 inch paper and the pages should be numbered consecutively. To facilitate orderly review, the proposals should include the information and be written in the order indicated below.

1. *Cover Sheet:* Photocopy and complete the form in Appendix A as page 1 of each copy of the proposal.

2. *Summary:* This should be a concise description of the proposal, not more than one double-spaced typewritten page long. It should include a brief description of the equipment which will be purchased or fabricated, some comments on the applicable research programs, the impact of the equipment on the institution's research programs in the applicable areas, and indicate the institution's plans for sharing the costs in addition to the amount requested from DOE.

3. *Narrative:*

a. *Technical merit and accomplishments of the institution's research programs in the applicable energy areas, the institution's commitment to energy research in the designated areas, and the potential for expanding/improving these programs with the acquisition of the requested equipment:* This section should discuss the applicable research programs requiring the equipment and should be aimed at persuading reviewers that the institution "historically" has had strong research programs in the designated areas and that the number and quality of such programs are likely to increase in the future. Briefly describe the overall objectives of these programs. Discuss some specific projects, including the title, name of the sponsor, and the amount of funds involved. On another page list all of the institution's research projects in the applicable designated areas during the last five years (including title, sponsor, total funds awarded, the period involved and the approximate number of graduate students associated with each project). Also, list the major accomplishments of the institution's applicable research projects during the last five years.

How do these programs relate to the institution's view of its principal responsibilities in energy research? Discuss the institution's efforts to strengthen research in the applicable designated areas, such as authorizing additional faculty positions, providing institution or state funding for graduate student support, equipment or facilities, or "seed funding," etc. in these areas. Indicate how the institution has fostered the growth of the applicable research areas and its commitment to do so in the future.

Briefly describe the equipment requested and indicate the estimated cost. It is not necessary to describe the operation of the equipment unless it is likely to be unknown to researchers in the applicable field(s). Discuss the need for the equipment and its expected impact on the institution's ability to develop and carry out more effective energy research programs in the designated areas.

b. *The qualifications of the faculty associated with the applicable research areas and the degree of faculty experience with similar equipment:* Briefly discuss the overall experience and capabilities of the faculty to conduct research in the applicable areas. Provide vitae (a maximum of one page per person) for the principal faculty members associated with the research areas described in the proposal.

Briefly discuss the extent to which the faculty whose research projects are described in this proposal have used this or similar equipment on or off campus in recent years.

c. *Institution's plans for sharing the costs, ensuring the operation and maintenance of the equipment, and replacing the equipment at a future date:* The level of cost-sharing will be a factor in the evaluation of the proposals. No specific fraction of cost-sharing is required, but institutions are encouraged to seek funds from all available sources. Although none of the program funds may be used to modify buildings or facilities, such costs as well as other current and future costs which the institution indicates it will provide will be considered as "cost-sharing." Estimate the useable life span of the equipment and discuss the institution's plans for ensuring its continued availability during this period, including some comments on the institution's equipment repair facilities and personnel. If similar equipment is located at the institution or nearby (within 50 to 100 miles), why is the requested equipment required? Describe the institution's plans for obtaining the funds needed to replace this equipment.

d. *Institution's experience in utilizing and sharing other major research equipment and its plans for making the requested equipment available to faculty in other institutions:* Briefly describe some of the major research instruments which are available on campus, particularly those which might be used by faculty and students involved in the applicable energy research programs. What were the sources of funds for these instruments? How has the university ensured their continued operation and maintenance? Are they available to and have they been used by researchers at nearby educational institutions?

Describe the institution's plans for sharing the requested equipment with researchers at nearby universities.

C. Information

For further information about this announcement or to obtain copies of the application, contact: [contracting officer to be designated when announcement is released].

IV. Estimated Cost and Budget

A. Budget Information

A proposed budget should be submitted, detailing the estimated purchase cost of the equipment, as well as installation, operation and maintenance costs *for a period of five years*. The anticipated sources of funds for each category should be indicated. Use the Budget Form provided in Appendix A and append any necessary explanations.

B. Budget Page Comments

If the institution provides the funds for related costs, such as shipping, installation, operation and maintenance costs for the first five years, etc., it may claim credit for them as "cost-sharing."

C. Availability of Funds

Awards under this program will be subject to the appropriation of funds in fiscal year 1984.

D. Cost Principles

The cost principles contained in OMB Circular A–21, "Cost Principles Applicable to Grants, Contracts and Other Agreements with Institutions of Higher Education," will apply to this program.

V. Method of Selection and Evaluation Criteria

A. Introduction

Proposals will be screened first for their relevance to the chosen designated research areas. Those found to be relevant will then be evaluated using the criteria listed in Section V.B. Technical evaluations will be obtained from government and non-government scientists and engineers familiar with the fields of research. Final decisions will be made by the DOE based upon these criteria and consideration of other factors, including possible duplication of similar equipment, research and program balance, and geographic distribution of the awards as geographic distribution is important to achieving program purposes. In the evaluation and handling of a proposal, every effort will be made to protect the confidentiality of the proposal. DOE is under no obligation to pay for any costs associated with the preparation or submission of applications if an award is not made. DOE reserves the right to fund, in whole or in part, any, all, or none of the applications submitted in response to the solicitation. All proposers will be notified in writing of the acceptance or rejection of their proposals. After the comprehensive evaluation has been completed, unsuccessful proposals will be retained by DOE for a period of one year. Proposers may request in writing for copies of the evaluations of their proposal.

B. Evaluation Criteria

The criteria to be used in the review and evaluation of ERI proposals are as follows in declining order of importance. The value of the first criterion will be approximately equal to the total value of the remaining criteria. The subcriteria under each criterion are equal in importance.

1. *Merit/Accomplishments.*

a. Technical merit and accomplishments of the institution's research programs in one or more of the designated energy areas and any other factors which will demonstrate the institution's commitment to energy research in these areas, and

b. The potential for expanding/improving these programs with the acquisition of the requested equipment.

2. *Faculty Qualifications/Experience.*

a. The qualifications of the faculty associated with the applicable research areas; and

b. The degree of faculty experience with similar equipment.

3. *Cost Sharing.*

a. Institution's plans for sharing the costs;

b. The reasonableness of proposed costs compared to anticipated benefits;

c. The institution's financial plans for ensuring the operation and maintenance of the equipment; and

d. Plans for financing as necessary the replacement of the equipment at a future date.

4. *Research Equipment.*

a. Institution's experience in utilizing and sharing its other major research equipment; and

b. Its plans for making the requested equipment available to faculty in other institutions.

VI. Submission of Proposals

A. Address and Number of Copies

One signed original and nine copies of the proposal are to be submitted to: [office to be designated].

B. Number of Proposals Per Institution

Each institution may submit a maximum of three proposals. For this competition, the individual campuses of state systems are considered as separate institutions.

C. Closing Date for Receipt of Proposals

To be eligible, proposals must be received by the Department of Energy by 5:00 p.m. *Month x, 1983* or postmarked by midnight, *Month x, 1983*.

D. Late Proposal Provisions

[The program announcement will include the standard DOE statement regarding the late submission of proposals.]

VII. Other Information

A. Reports

A report which briefly describes the status and use of the equipment, new research projects which have been undertaken as a result of the equipment being available, financial data on operation and maintenance expenses provided by the institution, etc. will be required annually for the five years following installation of the equipment. Five copies be submitted to: [to be designated].

B. Awards

As noted above, the Department anticipates approximately 30 grants awards ranging from about $100,000 to about $500,000. The number of awards to any institution will be limited, with most institutions receiving only one. However, if a university or college demonstrates unusual scientific merit in a number of the designated areas, DOE may award more than one grant to that institution. The awards will be announced on or before April 15, 1984.

High Energy Physics Advisory Panel; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: High Energy Physics Advisory Panel (HEPAP).

Date and Time: Wednesday, June 29, 1983—9:00 a.m.–6:00 p.m. Thursday, June 30, 1983—9:00 a.m.–4:00 p.m.

Place: U.S. Department of Energy, 19901 Germantown Road, Room A–410, Germantown, Maryland.

Contact: Dr. P. K. Williams, Secretary, High Energy Physics Advisory Panel, U.S. Department of Energy, ER–221, Washington, DC 20545, Telephone: 301/353–4829.

Purpose of panel: To provide advice and guidance on a continuing basis with respect to the high energy physics research program.

Tentative Agenda

—Presentation and Discussion of the Report of the 1983 Subpanel on New Facilities and its transmittal to DOE.

—Discussion of FY 1983 and FY 1984 Budgets for DOE High Energy Physics and NSF Elementary Particle Physics.

—Discussion of a Possible Subpanel for Review of U.S. Experiments at Foreign Facilities.

—Discussion of U.S. Non-Accelerator Experiments.

—Discussion of International Collaborations and Bilateral Cooperative Agreements.

—Discussion of New U.S. Representative to IUPAP Commission on Particles and Fields.

—Public Comment (10-minute rule).

Public Participation: This meeting is open to the public. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Panel will be permitted to do so either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact P. K. Williams at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda.

Minutes: Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, S.W., Washington, DC between 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on June 2, 1983.

[Docket No. CI83–233–000]

Natural Gas Companies; Damson Oil Corp. (Successor to Damson Exploration Corp.); Application for Abandonment of Service

June 1, 1983.

Take notice that the Applicant listed herein has filed an application pursuant to Section 7 of the Natural Gas Act for authorization to abandon service as described herein, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 10, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protestants filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protests parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on the application in the event no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

[Docket No. EC83–14–000]

Alabama Power Co.; Filing

June 1, 1983.

The filing Company submits the following:

Take notice that on April 18, 1983, Alabama Power Company (Alabama Power) filed an application, pursuant to Section 203 of the Federal Power Act, for approval of the sale of certain of its facilities to the Utilities Board of the City of Sylacauga, Alabama (Utilities Board).

The facilities are located in and around the City of Sylacauga, Talladega County, Alabama. The total purchase price of the facilities to be sold and conveyed is $237,950.

Alabama Power states that the transaction would result in a reduction in the Utilities Board's electrical demand which in turn would result in a reduction in their purchased power cost.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 10, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP83-254-000]

Montana-Dakota Utilities Co.; Petition

June 1, 1983.

Take notice that on May 13, 1983, Phillips Petroleum Company (Petitioner), 1258 Adams Building, Bartlesville, Oklahoma 74004 filed in Docket No. CP83-254-000 a petition pursuant to § 385.207 of the Commission's Rules of Practice and Procedure (18 CFR 385.207) for an order declaring, for the purposes of Montana-Dakota Utilities Co.'s (MDU) proposed storage and transportation service and gas sales, that the term "delivery" be determined to be the time of actual sales of the natural gas in question, or, in the alternative, pursuant to Sections 104(b)(2), 109(b)(2) and 502(c) of the Natural Gas Policy Act of 1978 (NGPA) for an adjustment providing rate relief equal to the difference between the price applicable to the month of initial delivery to MDU for storage and the actual sale price, so that Paragraph 2(2) of MDU's tariff may operate in accordance with its terms, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Petitioner states that on March 29, 1983, MDU filed an application in Docket No. CP83-254-000 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the storage of natural gas on behalf of certain of MDU's suppliers and the incidental transportation of such gas pursuant to MDU's proposed Rate Schedule S-2. Petitioner states that MDU's proposal contemplates that MDU would, in lieu of currently purchasing certain gas volumes delivered to it by its casinghead and residue gas suppliers, place those volumes in storage on behalf of those suppliers for subsequent sale either to MDU or to other purchasers as market conditions warrant. Petitioner states further that it is expected that suppliers would waive the right to immediate sale of and payment for the gas placed in storage. It is stated that the proposed tariff for MDU's storage service for suppliers (Rate Schedule S-2, *pro forma* Sheet No. A) provides in paragraph 2(2) that "If Seller elects to purchase gas under Section 2(1)(a) of this rate schedule, the price for the storage volume purchased by Seller during any month shall be the price in effect for the month when such purchase occurs, as determined under the applicable gas purchase agreement, or, if such agreement is no longer in effect, the prevailing market price for casinghead and residue gas purchased by Seller during such month."

Petitioner comments that MDU proposes that the price applicable to gas stored when ultimately sold would be the price applicable during the month of actual sale following storage rather than the price applicable to the month of initial production and delivery to MDU for injection into storage. Petitioner refers, however, to Section 2(22) of the NGPA which defines "deliver" to mean "the physical delivery from the Seller." Petitioner alleges that producer-suppliers agreeing to MDU's storage and transportation service proposal are waiving a clear right to receipt of current income in exchange for considerable market risk and potentially lengthy delays in the actual sale of the natural gas stored by MDU on their behalf. Petitioner maintains further that any requirement that an historical month be used would also be very difficult to administer and enforce perhaps years later and that producers and residue gas suppliers would also have little incentive to continue allowing injection of gas into storage if ultimate sales of the gas are to be made at historical prices. Accordingly, Petitioner urges that declaratory or rate relief be granted so that MDU's tariff may operate in accordance with its terms.

The procedures applicable to the conduct of the adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure.

Any person desiring to participate in an adjustment proceeding or in a proceeding on a declaratory order must file a motion to intervene in accordance with the provisions of Subpart K or Subpart B, respectively, of the Commission's Rules of Practice and Procedure. All motions to intervene or protests must be filed within 15 days after publication of this notice in the **Federal Register**.

BILLING CODE 6717-01-M

[Docket No. ER83-438-000]

Montana Power Co.; Order Accepting for Filing and Suspending Rates, Noting Intervention, Denying Request for Deficiency Letter, and Establishing Hearing Procedures

Issued: May 31, 1983.

On March 31, 1983 as completed on April 15, 1983, Montana Power Company (Montana), submitted for filing a proposed increase in rates for firm power service to Big Horn Electric Cooperative and Central Montana Electric Generation and Transmission Cooperative, Inc. (Central).[1] The rates would increase revenues from these customers by approximately $1 million (21.2%) based on a calendar year 1981 test period. Montana has proposed an "effective date" of June 1, 1983, but also requests a one month deferral until July 1, 1983, consistent with a settlement agreement in Montana's prior rate case in Docket No. ER81-282-000.[2]

Notice of Montana's filing was published in the **Federal Register**, with responses due by April 20, 1983. On that date, Central filed a motion to intervene, protest, and request for issuance of a deficiency letter or suspension. Central first requests that the Commission find Montana's filing deficient and withhold a filing date until the alleged deficiencies are remedied. Central lists a number of perceived failures to supply all of the data required by 18 CFR 35.13, as well as inconsistencies in the filing which have purportedly hindered Central's analysis. Alternatively, Central requests a five month suspension, alleging an excessive return on equity, overstated cash working capital allowance, and excessive fuel costs for coal purchased from Montana's subsidiary, Western Energy Company. Central also cites the alleged inconsistencies in Montana's filing in this context.

On May 11, 1983, Montana filed a response to Central's pleading, denying all allegations and submitting additional data. Montana asserts, however, that

[1] The proposed rates are designated as follows: *Montana Power Company*—(1) Supplement No. 11 to Rate Schedule FPC No. 39 (Supersedes Supplement No. 10), Central; (2) Supplement No. 6 to Rate Schedule FPC No. 40 (Supersedes Supplement No. 5), Big Horn.

[2] The settlement which was approved by letter order dated September 16, 1981, provided that in its next wholesale rate filing, Montana would propose an effective date no sooner than 60 days after filing and would expressly request a one month suspension from that date.

the added material is for informational purposes only and that its original submittal was in substantial compliance with our regulations.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely motion to intervene serves to make Central a party to this proceeding.

Central's request for a deficiency letter will be denied. Contrary to Central's assertions, the Commission finds that Montana's filing, as originally submitted, substantially complied with the requirements of § 35.13 of our regulations.[3]

Our preliminary review of Montana's filing and Central's pleading indicates that the rates proposed by Montana have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the proposed rates for filing and suspend them as ordered below.

In *West Texas Utilities Company*, Docket No. ER82-23-000, 18 FERC ¶ 61,189 (1982), we noted that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed increase may be unjust and unreasonable but may not generate substantially excessive revenues, as defined in *West Texas*. In the instant proceeding, our examination suggests that the proposed rates may not result in excessive revenues. However, as noted above, Montana has requested a suspension of one month in accordance with its earlier settlement agreement. As a result, we shall suspend Montana's proposed rates to become effective, subject to refund, on July 1, 1983.

The Commission Orders:

(A) Central's request for issuance of a deficiency letter and deferral of a filing date pending additional submittals is hereby denied.

(B) Montana's proposed rates are hereby accepted for filing and suspended for one month, to become effective, subject to refund, on July 1, 1983.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of Montana's rates.

(E) The Commission staff shall serve top sheets in this proceeding on or before June 10, 1983.

(F) A presiding administrative law judge, to be designated by the Chief Administrative law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(G) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Secretary.

[Docket No. CP83-319-000]

Northern Natural Gas Co., Division of InterNorth, Inc.; Request Under Blanket Authorization

June 1, 1983.

Take notice that on May 12, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-319-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Northern proposes to abandon and remove certain measurement and branchline facilities located in Wayne County, Nebraska, under the authorization issued in Docket No. CP82-401-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is asserted that Northern has been advised by Peoples Natural Gas Company, Division of InterNorth, Inc. (Peoples), that the measuring station identified as the Wayne, Nebraska, Town Border Station No. 2 is no longer needed. It is further stated that the town border station provided service to the Wayne Rendering Company which is no longer in operation.

Northern, therefore, proposes to abandon the town border station and approximately 0.5 mill of 2-inch branchline. It is asserted that right-of-way grantors are served from the 2-inch branchline proposed to be abandoned but the Peoples would continue to provide service to such right-of-way grantors through an extension of its Wayne, Nebraska, distribution facilities. Consequently, it is asserted, there would be no termination of service as a result of the abandonment.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to §157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

BILLING CODE 6717-01-M

[Docket No. ER83-425-000]

Ohio Edison Co.; Order Accepting for Filing and Suspending Rates, Noting Interventions, Denying Motion To Reject, Directing Summary Disposition, and Establishing Hearing and Price Squeeze Procedures

May 31, 1983.

On March 30, 1983, Ohio Edison Company (Edison) tendered for filing increased rates for firm power service to 21 municipal wholesale customers (Cities).[1] The proposed rates would increase revenues by approximately $3,488,000 (6.22%) for the calendar year 1983 test period. Edison requests an effective date of June 1, 1983, for the proposed rates.

Notice of Edison's filing was published in the Federal Register,[2] with comments due on or before April 27, 1983. A timely protest and motion to intervene was filed by the Cities on April 21, 1983. The Cities request (1) rejection in whole or in part of Edison's submittal or, in the alternative, a five month suspension of the proposed rates,

[1] *See* Attachment for customers and rate schedule designations.

[2] 48 FR 15687.

(2) initiation of a hearing, and (3) establishment of a phased price squeeze proceeding. In support of their request for rejection, the Cities state that Edison's submittal lacks sufficient explanation and workpapers to support adjustments relating to the proposed South Georgia method[3] of correcting an alleged deficiency in accumulated deferred income taxes, nuclear fuel disposal costs, and Edison's continued use of a two-step energy charge. The Cities also specifically request rejection of a tax adjustment clause which Edison has continued to include in its filed rates. In support of their alternative request for a five month suspension, the Cities raise numerous cost of service issues.[4] In addition, the Cities allege price squeeze. On May 6, 1983, Edison filed an answer opposing the Cities' request for rejection of its submittal in whole or in part or, in the alternative, maximum suspension of the proposed rate increase.

Discussion

Pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motion to intervene serves to make the Cities parties to this proceeding.

As noted, the Cities request rejection of the instant submittal because of a purported lack of workpapers and sufficient explanation to support certain elements of the filing. In addition, the Cities challenge Edison's two-step energy rate, arguing that it unduly penalizes customers with low load factors. The Commission finds that Edison's submittal substantially complies with our filing regulations.[5] Further, matters involving the design of Edison's energy charge will be more appropriately resolved on the basis of an evidentiary record. Accordingly, the Cities' motion to reject Edison's filing will be denied.

We also note that the Cities have requested summary rejection of Edison's tax adjustment clause,[6] contending that the tax clause (1) does not appear to encompass changes in the income tax rates, (2) is not triggered by decreases in taxes; and (3) provides for a surcharge to correct a purported undercollection of gross receipts taxes for a period of time which is outside the Period II test year. We believe that these challenges present questions of law or fact more appropriately resolved following a hearing. We note, however, that consistent with established Commission practice, implementation of the tax adjustment clause by Edison will require a timely rate change filing under 18 CFR 35.13. *See e.g., Arkansas Power & Light Company,* Docket No. ER83–297–000, 23 FERC ¶61,004 (1983).

Contrary to Commission precedent, Edison has failed to synchronize the test year interest expense used in its income tax calculation with the interest portion of the requested rate of return. In *Gulf States Utilities Company,* Docket No. ER82–375–000, 20 FERC ¶61,039 (1982), we summarily directed the company to compute the long-term debt cost component of the interest expense tax deduction as the product of its allocated rate base and the weighted cost of long-term debt. Edison will be directed to synchronize the interest expense in its compliance cost of service and rates at the conclusion of this proceeding.

Our preliminary examination of Edison's filing and the pleadings indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

The Commission explained its suspension policy in *West Texas Utilities Company,* Docket No. ER82–23–000, 18 FERC ¶61,189 (1982). There we stated that, where preliminary examination indicates that proposed rates may be unjust and unreasonable but may not produce substantially excessive revenues, as defined in *West Texas,* we would ordinarily suspend the rates for one day. In the case at hand, our preliminary review suggests that the proposed rates may not yield substantially excessive revenues. As a result, we shall suspend the rates for one day from sixty days after filing, to become effective, subject to refund, on June 2, 1983.

With respect to the Cities' price squeeze concerns, we shall institute price squeeze procedures and phase those procedures in accordance with the Commission's policy and practice established in *Arkansas Power & Light Company,* Docket No. ER79–339–000, 8 FERC ¶ 61,131 (1979).

The Commission orders:

(A) The Cities' motions to reject Edison's entire filing or, in the alternative, Edison's tax adjustment clause are hereby denied.

(B) Edison's calculation of the interest expense deduction for income tax purposes is rejected. In its compliance cost of service and rates at the conclusion of this proceeding, Edison shall compute the long-term debt cost component of the interest expense tax deduction as the product of Edison's allocated rate base and the weighted cost of long-term debt.

(C) Edison's proposed rates are hereby accepted for filing and suspended for one day, to become effective on June 2, 1983, subject to refund.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of Edison's rates.

(E) The Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

[4] The Cities challenge Edison's: (1) Accrual of AFUDC on pollution control CWIP included in rate base; (2) use of an excessive AFUDC rate; (3) inclusion in plant-in-service of Edison's West Lorain generating unit which was taken out of service in January, 1983; (4) failure to adopt a negative or zero allowance for cash working capital; (5) failure to reduce rate base for (a) deferred Quarto coal costs, (b) amounts collected for spent nuclear fuel, (c) accumulated deferred income taxes, and (d) accumulated deferred income tax credits; (6) treatment of proceeds of "Safe Harbor" sales of tax benefits; (7) failure to adjust capital structure to reflect gains on reacquired debt; (8) claimed amount of O&M expenses, A&G expenses, nuclear fuel disposal costs, depreciation expense, and amortization of abandoned plant costs; (9) calculation of income tax expense; (10) stated level of short-term sales revenues; (11) failure to synchronize interest expense; and (12) use of an allegedly excessive rate of return on common equity and projected cost of long-term debt.

[5] *See Municipal Light Boards of Reading and Wakefield, Massachusetts* v. *FPC,* 450 F. 2d 1341 (D.C. Cir. 1971).

[6] The proposed tax adjustment clause incorporates recent changes in rates which were implemented subject to refund by Edison's filing in Docket No. ER83–21–000.

(G) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modify this schedule for good cause shown. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(H) The Secretary shall promptly publish this order in the Federal Register.

[Docket No. CP70-224-004 and Docket No. CP77-326-004

Sea Robin Pipeline Co. and Columbia Gulf Transmission Co.; Petition To Amend

June 1, 1983.

Take notice that on May 5, 1983, Sea Robin Pipeline Company, P.O. Box 1478, Houston, Texas 77001, and Columbia Gulf Transmission Company, P.O. Box 638 Houston, Texas 77001, filed in Docket Nos. CP70-224-004 and CP77-236-004, a joint petition and amend the orders issued January 22, 1980, and August 5, 1977,[1] as amended, in Docket Nos. CP70-224 and CP77-326 respectively, pursuant to Section 7(c) of the Natural Gas Act so as to authorize a reduction in the daily contract demand level of gas to be transported by Petitioners, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is asserted that Sea Robin would reduce the contract demand it provides for Columbia Gulf in Docket No. CP70-224 under Rate Schedule X-3 from up to 85,000 Mcf per day to 30,000 Mcf per day and that Columbia Gulf would reduce the contract demand it provides for Sea Robin in Docket No. CP77-326 under Rate Schedule X-35 from up to 100,000 Mcf per day to 45,000 Mcf per day effective October 15, 1982, and 15,000 Mcf per day effective January 1, 1983.

The proposed reductions are pursuant to the October 15, 1982, amendment of Sea Robin's October 19, 1979, and Columbia Gulf's March 15, 1977, transportation agreements, it is asserted.

Such reduction is necessitated, it is stated, because of a reduction in deliverability of gas available in the offshore Louisiana area.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 22, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

[Docket No. TA83-2-1-001]

Alabama-Tennessee Natural Gas Co.; Notice of Revised PGA Rate Adjustment

June 2, 1983.

Take notice that on May 20, 1983, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post Office Box 918, Florence, Alabama, 35631, tendered for filing Substitute Fortieth Revised Sheet No. 3-A as part of its FPC Gas Tariff, Third Revised Volume No. 1. This tariff sheet is proposed to become effective May 1, 1983, and Alabama-Tennessee requests that there be granted any necessary waivers of the Commission's Regulations to accomplish this proposed effective date.

Alabama-Tennessee states that the purpose of the revised tariff sheet is to adjust Alabama-Tennessee's SG-1 rate as a result of the correction made to the Base Tariff Rate in Alabama-Tennessee's filing on May 19, 1983, in Docket No. RP83-65-000.

Substitute Fortieth Revised Sheet No. 3-A provides for the following rates:

Rate schedule	Rates after current adjustment
G-1:	
Demand	$6.05
Commodity	371.92
SG-1: Commodity	416.12
I-1: Commodity	391.78

Alabama-Tennessee states that copies of the tariff filing have been mailed to all of its jurisdictional customers and affected State Regulatory Commissions.

Any person desiring to be heard or to protest such filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before June 10, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further pleading. Copies of this filing are on file with the Commission and are available for public inspection.

Third Revised Sheet No. 20–F
Fourth Revised Sheet No. 20–G
Third Revised Sheet No. 20–H
First Revised Sheet No. 20–H.1
Third Revised Sheet No. 20–H.2

Algonquin Gas states that such revised tariff sheets reflect revisions to Rate Schedule SNG–1, made at the request of its customers purchasing gas under that Rate Schedule, to increase the presenlty effective operating flexibility. This expanding operating flexibility reflects a continuation of the evolution of such operating adjustments to meet, more closely, the needs of its customes under changing operating and supply conditions.

Algonquin Gas further states that a copy of this filing is being mailed to each affected party and interest state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Algonquin Gas states that the five tariff sheets provide for the establishing of Rate Schedule I–2 for the sale of surplus gas. Algonquin Gas further states that Texas Eastern Transmission Corporation ("Texas Eastern") has an existing Rate Schedule I–D for the sale of surplus gas. In the event that Texas Eastern makes gas available under its Rate Schedule I–D, Algonquin Gas states that its customers are interested in purchasing such gas, and Rate Schedule I–2 provides the basis for such purchase.

Algonquin Gas states that the tariff sheets are proposed to be effective as of June 17, 1983.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18CPR 385.211, 385.214). BILLING CODE 6717–01–M

[Docket No. EF80–2011–011 (Remand)]

Department of Energy, Bonneville Power Administration; Order Confirming and Approving System Rates on a Final Basis

Issued: June 1, 1983.

Before the Commission for confirmation and approval, or disapproval, are the Bonneville Power Administration's (BPA or Bonneville) 1980 system wholesale power rates. Our review of these rates arises under legislation in effect prior to enactment of the Pacific Northwest Electric Power Planning and Conservation Act, 16 U.S.C. 839e (1980).

On December 3, 1979, the Assistant Secretary for Resource Applications (AS/RA) of the United States Department of Energy submitted to the Commission for consideration BPA's wholesale power rate schedules, the general rate schedule provisions setting forth the terms and conditions of service under the rate schedules, and special contract rates and rate schedule provisions.[1] On November 21, 1980, the Commission remanded Bonneville's rates and rate schedules without prejudice.[2] In its Remand Order, the Commission found that the record, as submitted, did not provide the requisite support to permit the Commission to confirm that the standards set forth in the Bonneville Project Act of 1937[3] and the Flood Control Act of 1944[4] had been met. The Commission therefore could not determine, based on the data and information submitted, whether Bonneville's rate schedules had been drawn:

1. Having regard to the recovery of the cost of generation and transmission of such electric energy;

2. So as to encourage the most widespread use of Bonneville power;

3. To provide the lowest possible rates to consumers consistent with sound business principles; and

4. In a manner which protects the interests of the United States in amortizing its investments in the projects within a reasonable period.[5]

Since the record failed to provide the requisite support, the Commission remanded the record without prejudice in order to provide the Bonneville Administrator and the AS/RA with an additional opportunity to demonstrate that the statutory criteria had been satisfied. The Commission's Remand Order specifically delineated those areas where the record had been found to be deficient.

On July 10, 1981, the Bonneville Administrator, acting by and through the Assistant Secretary for Conservation and Renewable Energy (AS/CE) filed a response to the Commission's Remand Order. Upon review however, the Commission found that Bonneville's response on remand contained

insufficient technical information or data responsive to the Commission's specific inquiries into the rationale used by Bonneville for designing its various classes. The Commission was particularly concerned with the lack of explanation for the differing cost-revenue relationships developed by Bonneville for the H–6, F–7, and IF–2 rate schedules. The Commission also noted that Bonneville had failed to provide the rationale for the elimination of its former practice of providing discounts to wholesale firm customers based upon delivery voltage.

Rather than reject Bonneville's rates, the Commission, in a September 1, 1982 order,[6] directed that an informal conference be held in order to provide Bonneville with a final opportunity to demonstrate that a rational basis existed for its proposed rate schedules. In that order the Commission also disposed of other isses raised by the parties.

On October 19–20, 1982, members of the Commission's staff met with representatives of Bonneville and the parties in Seattle, Washington. At the conference Bonneville provided the Commission staff and attending parties with a seventeen page memorandum purporting to respond to the Commission's order. Additionally, Bonneville was given an unlimited opportunity to address the various issues of concern at the conference, with the attending parties being provided an opportunity to respond. BPA was also called upon to respond to specific questions by the Commission staff.

The following is a summary of Bonneville's response at the conference as well as our findings based upon Bonneville's response.

H–6 Rate Schedule

Bonneville's H–6 rate schedule incorporates a share-the-savings rate for the sale of non-firm energy. The rate schedule also provides for a fixed floor rate which is triggered whenever BPA is in an imminent spill condition.[7] The H–6 rate provision for thermal displacement is priced at 50 percent of the buyer's decremental costs if the buyer purchases the power for use on his system or at 33 percent of the ultimate purchasers' displaced costs if the power is purchases for resale by any Pacific Northwest utility. Revenues under this schedule were estimated to yield $89.2 million in excess of costs allocated by Bonneville for providing this service.

In our September 1, 1982 order, Bonneville was directed to provide:

> The rationale for the development of the H–6 Rate Schedule for Wholesale non-firm energy which was expected to yield an estimated $89.2 million annually in excess of BPA's costs for providing this service; also, how this rate schedule, which applies to one-way sales to other public utilities, comports with the statutory standard of providing the lowest possible rates to consumers consistent with sound business principles.

In responding to this inquiry, Bonneville set forth a number of justifications for using a share-the-savings approach for H–6 non-firm sales. BPA first states that it had two objectives when it fashioned the H–6 rate schedule: (1) to allow BPA the flexibility to react to market and water conditions to permit maximum displacement of thermal resources both inside and outside the Pacific Northwest (PNW); and (2) to create an equitable sharing of benefits from nonfirm energy sales between utilities in the northwest and southwest while complying with Pub. L. 88–552.[8] BPA states that:

> A share-the-savings approach appeared to promote both objectives. The H–6 rate provided operators of NOrthwest thermal plants with sufficient economic incentives to purchase nonfirm energy from BPA while continuing to operate their low-cost thermal plants and use the output from these resources to displace relatively higher-cost Southwest oil-fired thermal.

The response further noted that Bonneville had followed the standard practice of allocating all of its costs to firm power users in its Cost of service Analysis and that no costs other than intertie costs were allocated to non-firm energy sales. Bonneville thus concluded that the $89.2 million was not in excess of BPA's costs of providing service because no attempt had been made to allocate costs to this service.

BPA also states that it was encouraged by the General Accounting Office to adopt a share-the-savings concept for pricing its non-firm energy and that this constitutes justification for the H–6 rate. Additionally, BPA argues that the split-savings type methodology employed by BPA in the H–6 rate schedule has been accepted by the Commission for other power marketing authorities besides Bonneville as well as for investor-owned utilities. Finally, BPA argues that the theory of "joint product pricing" (here, firm and non-firm energy) supports the use of a share-the-savings rate.

In addition to the above explanation, BPA provided data showing the results of its actual sales and revenues under the H–6 rate schedules. BPA's data show that the northwest customers received non-firm energy at an average rate of 7.2 mills/kWh during the locked-in period while, during the same period, the southwest customers received non-firm energy at an average rate of 7.1 mills/kWh. BPA also provided data showing that individual sales were made in the southwest at rates in excess of those for firm service with at least one sale reported at a level of 20 mills/kWh. This information also showed, however, that on the average, no individual customer paid more for non-firm service than the rate charged by Bonneville for firm service.

Upon review of its submittal, we find that Bonneville's response does not explain why one-way sales of a lesser quality product, non-firm energy, should be higher priced than higher quality firm power service sold within the region. The practice of using the income from sales outside the region to offset revenue requirements for sales within the region would appear to require BPA to underprice services within the region, thus providing a price preference between regional and non-regional sales which has no basis in the applicable statutes.

BPA states that the H–6 rate design allows BPA the flexibility to react to market and water conditions to permit non-firm displacement of thermal resources both inside and outside the PNW. This objective was stated by BPA in its original submittal as a justification for its H–6 rate design. BPA, however, has not explained why a variable rate is required in order to achieve this objective. On the contrary, it appears that a fixed rate would better achieve this objective since the fixed non-firm energy rate would still be less than the customer's displaced higher cost thermal generation and would therefore serve the policy objective of encouraging displacement of thermal generation. Indeed, the fixed rate on many occasions may be even less than the variable rate.

BPA noted at the conference that its customers many times withhold their request for non-firm energy until BPA is

[7] The majority of Bonneville's non-firm energy sales under this contract occur in spring and early summer when the Federal Columbia River Power System Reservoirs are filling and the potential loss of energy sales through spilling water is possible. Because system water supply is greater than that required for generation to meet its demands during these periods, the rate at which Bonneville sells non-firm energy is reduced to the floor rate in an effort to sell its excess hydro power that would otherwise be lost through spilling.

[8] Pacific Northwest Consumer Power Preference act, 16 U.S.C. 837.

in a spill condition so as to qualify for the floor rate for non-firm sales. The customers would not be able to do this, however, were all non-firm sales to be priced at a fixed rate. Although this contention is proffered in support of the share-the-savings rate, it is arguable that BPA's non-firm customers would purchase power on a more consistent basis under a fixed, cost-based rate since there would be no tangible benefit to the customers to withhold requests and create a spill condition. BPA's argument that its H–6 rate schedule permits maximum displacement of thermal resources is thus an unsupported proposition which would not specifically justify the need for a non-cost-based variable rate.

BPA also has not shown that a variable rate is needed to provide an equitable sharing of benefits between utilities in the northwest and the southwest. As noted earlier, non-firm power sold directly by BPA to the southwest customers is priced at 50% of the southwest customer's decremental costs while non-firm power sold by BPA to a northwest utility for resale to southwest customers is priced at 33% of the southwest customer's decremental costs. BPA states that the H–6 rate provides operators of northwest thermal plants with an economic incentive to purchase non-firm energy from BPA while continuing to operate low-cost thermal plants and use the output from these resources to displace higher cost southwest oil-fired thermal power. BPA does not state why it cannot make these types of sales directly to the PSW customers without providing a pricing stimulent of a lower rate to the northwest customers who then act as middlemen for southwest sales. BPA also does not state why a fixed, cost-based rate which is less than the purchaser's avoided cost would not similarly provide a sufficient economic incentive for the PSW customers to displace their higher cost thermal resources and at the same time eliminate the H–6 rate revenue subsidy to the PNW customers.

Underlying BPA's "equitable sharing" argument appears to be the assumption that for BPA to price its non-firm energy on a cost basis would require it to charge no more than the energy costs associated with its hydro sales. These costs were approximately 6.57 mills/kWh during the locked-in period. To charge this rate, BPA argues, would result in an unacceptable shift in system cost responsibilities to the northwest customers who are already in a very difficult economic condition. Therefore, a share-the-savings approach must be used to reflect an equitable sharing of the benefits of the inexpensive hydro. This argument assumes that the only allowable costs upon which the H–6 rate can be based are BPA's variable hydro costs and some intertie costs.

To the contrary, Bonneville's underlying assumption that only system hydro costs are incurred to serve non-firm customers appears to have no reasonable basis. Bonneville's operational realities are such that it purchases energy at a higher cost than its own generation costs in order to serve its customers' needs, including the needs of its non-firm customers. Based upon its operational realities, we find that it may be a sound business practice for BPA to offer this energy at a price up to that of its most expensive operating or stored energy. Additionally, in calculating the cost of the non-firm energy it would be reasonable to include the allocated costs of any future power resources which are currently being incurred and are intended to benefit Bonneville's non-firm customers. These costs would include all allocated energy costs (be they fixed or variable), and portions of conservation costs, hydro capacity used almost solely for non-firm power production, etc. Had Bonneville in fact developed an average cost-based rate for non-firm power, including both stored thermal energy costs and hydro power costs, including some reasonably assigned capacity costs, it could have collected a fixed, average cost rate for the locked-in period which was higher than the average rate actually charged by BPA based upon its share-the-savings approach.

We find that a cost-based rate, developed along lines similar to those outlined above, would justify the average rate actually charged by BPA for non-firm service in this case. Thus, despite the fact that Bonneville's H-6 rate schedule was not designed in a manner that would permit the Commisson to "understand the logic of the allocation of cost and revenue requirements among the various rate schedules,"[9] it would appear from the operating statistics for the period during which this schedule was in use that the H-6 rate has produced reasonable results inasmuch as Bonneville's average charge under the schedule was less than the rate charged for higher quality firm service.

The Commission believes that a fixed rate which is less than the purchasing utility's decremental costs would provide an equitable sharing of the benefits of non-firm sales between the northwest and southwest customers and would permit the maximum displacement of more expensive thermal resources both inside and outside Pacific Northwest. In fact, a fixed rate for all non-firm energy would probably have encouraged greater use of the most efficient resources since there would no longer be any tangible benefit to the non-firm customers in delaying purchases until BPA is in a spill condition in order to obtain the lower floor rate under the H-6 rate schedule. Nevertheless, the share-the-savings concept did achieve similar results in this case. Accordingly, in light of the fact that BPA's H-6 rate has provided benefits to both the southwest customers and the northwest customers, and in light of the fact that the rate did not produce an average unit energy cost in excess of the higher quality firm service rates, the Commission finds that Bonneville's H-6 rate should be confirmed and approved.

[9] Remand Order, *supra*, 12 FERC ¶ 61,155, 61,339.

F–7 Rate Schedule

The F–7 firm capacity rate schedule is for the sale of peaking capacity. This schedule separately identifies rates for seasonal and annual capacity and is based on an avoided cost concept. The F-7 rate schedule includes a provision for replacement by the capacity user of energy accompanying the previous delivery of capacity to the capacity user. The rate schedule also includes a penalty charge for capacity usage in excess of six hours per day. The purported reason for this charge is to encourage capacity purchasers to limit their use of the system during specific periods. In our September 1, 1982 order, Bonneville was asked to provide:

> The rationale for use of a customer avoided cost concept in developing the F-7 Rate Schedule for Wholesale Firm Capacity which was expected to result in annual revenues which were $2.3 million in excess of costs; how the avoided cost concept comports with statutory standards and how a penalty charge for extended capacity used longer than 6 hours will achieve the effect proffered as the basis for the rate design.

Responding to the Commission's inquiries into the use of an avoided cost approach to seasonal capacity service, Bonneville states that it made a series of adjustments to a cost-based rate which would have otherwise resulted in an inordinately low seasonal capacity rate had it not then revised this rate upward in the final adjustment by a method which used value-of-service principles. Bonneville further defends the F-7 rate by arguing that Bonneville is not required to use cost-of-service as the basis for its rates.

Regarding the use of a penalty charge for extended capacity use, Bonneville states that it "believed that a substantial financial disincentive would cause firm capacity customers to think twice before requesting sustained peaking service from BPA." Bonneville found that it was necessary to restrict use of its peaking services for extended periods of time under this schedule to avoid jeopardizing Bonneville's ability to meet its firm power requirements and to avoid the return at night of more energy provided with its capacity sales during the day than could be effectively utilized by the BPA system. As proof of these operating difficulties, Bonneville refers to various memoranda developed by its staff which address both of these problems and which indicate that sales under the previously approved rate schedules, which did not contain limits on use of the service offered, where responsible in part for BPA's operating difficulties. Bonneville also provided data which show that the sustained use of Bonneville's peaking capacity was limited in duration to the non-penalty use period provided in the F–7 Rate Schedule except for one instance where one customer inadvertently exceeded the limit and paid a penalty.

Bonneville's response on the use of value-based pricing in the formulation of the F–7 Seasonal Rate continues to be insufficient to persuade us that such a method is justified in this rate. Such methodology, in our opinion, violates the criterion that Bonneville's rates be drawn to provide the lowest possible rates to consumers consistent with sound business principles. The justifications provided by Bonneville which include a need to "better reflect the incremental cost relationships both between capacity and energy and between the seasons," and to send "price signals to its customers" are unsubstantiated. Value-based pricing, as the term has been used by Bonneville, has little rational basis in that it was selected for application only when the value to the purchaser (or in the case of a share-the-savings rate, half the value to the purchaser) resulted in a price which fit the seller's preconceived notion of what should be changed. Bonneville, which has obviously been in a substantially surplus capacity situation for several years, has failed to demonstrate that any net benefit could potentially result to the system from the adjustment made.

We find that other justifications presented by BPA, however, support the $9.73 per kilowatt-seasonal charge. Bonneville has provided information that shows, for example, that simply adding together its equalized demand costs and intertie expenses would produce a rate similar to the proposed rate. The information provided by Bonneville would further lead to the conclusion that a cost-based seasonal capacity rate, based strictly on Bonneville's cost of firm service, which excludes the $89 million revenue credit from its non-firm H–6 sales, would be higher than BPA's actual charge.

Bonneville's determination of the need, conditions, and amount of its penalty clause was made without the benefit of rigorous studies to evaluate the assumptions underlying its use. Bonneville states that all relevant studies used in the preparation of its rate schedules are now on the record. No adequate studies, however, have been submitted which relate to the level of the penalty included in this schedule. No study, for example, has ever been supplied (or apparently performed) which would demonstrate that Bonneville's hydroelectric system would suffer any significant loss of system reliability should unencumbered F–7 capacity sales of expected timing and duration occur. Nor were adequate studies performed by Bonneville to quantify the annual cost of lost energy or peaking capacity in the summer season.

Reasonable judgement calls by Bonneville, however, may occasionally be necessary on issues such as the F–7 penalty clause to avoid studies of dubious benefit or of prohibitive length. The omission of detailed studies by BPA in this instance should not, therefore, directly lead us to reject Bonneville's proposed penalty charge. Particularly in cases where the matter proves to be inconsequential, we may nevertheless approve a specific rate provision. In this case, the issue has become inconsequential since this provision has been replaced in the subsequent Bonneville rate case (Docket No. EF81–2011–000) by another methodology and no significant amounts (only $13,050) were collected under the penalty provision.

In light of our analysis, the Commission will confirm the F–7 rate schedule. We would admonish Bonneville, however, to base future F–7 rates on demonstrable or reasonably approximated costs, to avoid assumptions leading to the undercollection of costs, and to reflect any capacity surplus in rates and in other aspects of its operations.

IF–2 Rate Schedule

Bonneville's proposed IF–2 rate schedule, which is for sales of industrial firm power, includes an adjustment which entitles the purchaser to a credit if the customer load is restricted by Bonneville during the operating year.[10] Under the IF–2 rate, Bonneville can restrict one quarter of the Direct Service Industrial customers' (DSIs) total contract demand at any time, for any reason (first quartile restrictions). The second quarter of the customers' contract demands can also be curtailed to the extent necessary to minimize restrictions of firm power as a result of system stability problems, forced outages, or delays in operation of new generation (second quartile restrictions). Bonneville has the right to interrupt the IF–2 load for other reasons as well. The amount that Bonneville compensates a DSI when load is restricted is called the availability credit. We have asked Bonneville to explain:

> The extent to which the IF–2 Rate Schedule for Industrial Firm Power, which provides an "availability credit" for interruptible service, was set at a level which reflects an appropriate sharing of benefits of these sales between the system firm and the system interruptible customer classes.

Under the IF–2 rate schedule, BPA would provide a credit to the DSIs based on the cost to the DSIs of replacing energy estimated to be restricted by Bonneville. The credit purportedly reflects the fact that the quality of service to industrial customers under this schedule in inferior to the service provided to Bonneville's non-DSI firm customers. BPA's ability to restrict first and second quartile capacity was expected to allow the DSI load to provide capacity reserves for Bonneville's system. The probem arises due to the fact that the reserves were projected to be called upon infrequently since they would be required only when loads are near or above the annual peak and/or some failure occurs on BPA's system. During the locked-in period the actual availability of IF–2 power was approximatley 91 percent. Additionally, *the DSI loads were never curtailed beyond the first quartile.* Moreover, the Federal Columbia River Project System has been operating in a substantial capacity surplus condition for some time. Nonetheless, BPA places a value on the annual replacement cost of the DSI's capacity restrictions of $5 million. The total annual replacement cost of energy restrictions was projected to be $27.3 million. Hence, BPA estimated that the total availability credits would be $32.3 million per year.

To justify its rate design, BPA states that the availability credit was designed

[10] Under this rate schedule, the customer's load is defined as its demand on Bonneville's system.

to equal BPA's total cost of replacing the power associated with DSI restrictions. The revenue deficiency caused by the availability credit was spread among all firm power classes. Of the projected $32 million deficiency resulting from the credits, BPA states that $12 million was allocated to the DSIs, beause the lower three quartiles of their load was firm, and the other firm power classes were allocated the remaining $20 million. BPA states that the above treatment reflects an appropriate sharing of the benefits of interruptible sales and therefore satisfies the statutory requirements.

Our central concern involves the quantification of the value of the reserve provided by the interruptible loads. Bonneville has failed to provide the Commission with any studies that would establish a reasonable value for the reserve credit, and apparently no studies are available. In light of the capacity surplus situation existing on the BPA system and the infrequency of interruptions to the DSI customers, we have serious doubt as to whether the credit level can be justified. However, it appears from our overall review of the firm rates, that BPA may be under-collecting its cost of service from its other firm customers. In light of this factor, we believe there is no remedy in this docket to correct the noted rate schedule deficiencies since there is no group of customers which would qualify for a refund for the payment of excessive rates as a result of the IF-2 schedule.

In conclusion, the Commission finds that BPA has not supported its availability credit level in the IF-2 rate schedule. In light of the fact that there is no remedy available at this point to correct the deficiency given our limited statutory authority, we shall accept the IF-2 rate schedule with the admonishment that any future availability credit formulation should be improved to establish a supportable credit, accompanied by sufficient technical data that would support Bonneville's quantification of the credit.

Transformation Charge

BPA was asked to provide the rationale for elimination of its former practice of providing discounts to wholesale firm customers based on voltage of service in light of the fact that some of BPA's customers had allegedly relied upon this practice and had purchased their own transformation facilities. BPA's 1974 wholesale power rates had included a transformation charge in the EC-6, EC-7, and F-6 rates. This charge was added to the basic monthly demand charge for firm power. Customers with their own transformation facilities were excluded from these charges, and in essence received a "credit" or discount from their rates. In fiscal year 1978, BPA states that it recovered $22 million from the charge. The transformation charge was eliminated from the rates in this docket and succeeding cases after being in effect for a five-year period, 1974-1979. During this period approximately 55 substations were constructed or purchased by Bonneville's customers. Bonneville states that, of those 55 substations, 14 can be identified as having possibly been built or purchased in reliance upon BPA's transformation charge. BPA has responded to the Commission's concerns by citing to a program which it has initiated and is maintaining to mitigate any net adverse impact that can be substantiated for individual customers. BPA informed our staff at the conference that, under this program, the Administrator has already decided to purchase West Burley Substation and to purchase the customer's transformer installed at Boardman Substation. The cost to BPA for these two facilities will be $1 million. BPA states that other negotiations are taking place. If the expenses for all 14 substations were "mitigated," the expected cost to BPA would be $7 million.

In our September 1, 1982 order, we did not question BPA's justification for discontinuing the practice of providing discounts based upon voltage of service. Rather, we sought to ascertain whether those customers who had relied upon BPA's past practice and had purchased or constructed their own transformation facilities were equitably treated. Thus, reinstatement of the charge has neither been sought nor desired by the Commission as a means of answering its concerns on this issue.

It appears that BPA has undertaken action under a program that would respond satisfactorily to our concerns for equitable treatment. There are, however, a number of difficulties in implementing this program. Substations are acquired by customers for numerous reasons. As a result, problems could potentially arise where there is disagreement between BPA and a customer as to whether the customer had in fact incured financial harm by relying upon BPA's past practice of providing a transformation discount, or instead had acquired the facilities for some other reason.

At the present time, the Commission is unaware of any disputes that have arisen with respect to application of the "net adverse impact" or "financial harm" standards being used by BPA in order to ensure equitable treatment for customers who relied upon BPA's past practice in purchasing or constructing their own substations. Accordingly, the Commission believes that BPA's attempt to mitigate any financial harm caused by elimination of the transformation charge provides a satisfactory response to the Commission's concerns and would support a finding that the various rate schedules have been designed, with respect to the transformation charge, in a manner consistent with the applicable statutory standards.

Conclusion

In conclusion, we find that Bonneville's response to our September 1, 1982, order has been less than completed and we further note that the Commission's difficulties in obtaining information from Bonneville has been a major cause of delay in this proceeding. Bonneville has failed to demonstrate that implementation of a value-of-service approach for H-6 sales is needed or even desirable. Bonneville has also provided the Commission with less than a complete response with regard to the F-7 and IF-2 rate schedules. Despite the fact that the Commission remanded these rates to Bonneville on one occasion and ordered an informal conference to resolve these matters on another, Bonneville has failed to adequately respond to this situation within the context of this docket.

For the reasons set forth in the body of this order, however, we find that the results produced by Bonneville's rates would not require a refund since no customer was subject to a net overcharge. In light of these circumstances, and the Commission's limited remedial authority, we shall confirm and approve Bonneville's 1980 wholesale power rates on a final basis.

We would observe that this is the last case to be reviewed by the Commission under the statutory framework in existence prior to passage of the Pacific Northwest Electric Power Planning and Conservation Act (Regional Act), 16 U.S.C. 839e (December 5, 1980). Subsequent review by the Commission will determine whether problems such as those arising under the H-6 rate will be more fully and quickly addressed by Bonneville within the scope of the new Regional Act.

The Commission orders:

(A) Bonneville's wholesale power rate schedules, General Rate Schedule Provisions, special contract rates and rate schedule provisions are hereby confirmed and approved on a final basis, effective December 20, 1979.

(B) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Secretary.

[Docket No. RP83-32-001]

Eastern Shore Natural Gas Co.; Notice of Tariff Filing

June 2, 1983.

Take notice that on May 16, 1983, Eastern Shore Natural Gas Company (Eastern Shore) tendered for filing the following revised tariff sheets for inclusion in its FERC Gas Tariff:

Revised Twenty-Third Revised Sheet No. 5
Revised Twenty-Third Revised Sheet No. 6
Revised Twenty-Third Revised Sheet No. 10
Revised Twenty-Third Revised Sheet No. 11
Revised Twenty-Third Revised Sheet No. 12

The proposed effective date for the above referenced tariff sheets is June 16, 1983.

On December 16, 1982, Eastern Shore filed for a general rate increase under Section 4(e) of the Natural Gas Act. The Commission on January 14, 1983 accepted for filing and suspended the proposed tariff sheets until June 16, 1983.

Eastern Shore states that the purpose of the revised tariff sheets is to reflect various purchased gas adjustments which have occurrred subsequent to the Company's filing of new base tariff rates on December 16, 1982.

Copies of this filing have been mailed to each of Eastern Shore's jurisdictional customers and interested State Commissions.

Any person desiring to be heard or protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E. Washington, D.C., 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 10, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP83-305-000]

El Paso Natural Gas Co.; Notice of Application

June 2, 1983.

Take notice that on May 3, 1983, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP83-305-000 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline replacement facilities and for permission and approval to abandon a segment of its Permian—San Juan Crossover line and loopline located in McKinley County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that during the routine evaluation of its pipeline facilities it discovered that the class location of a segment of its Permian—Juan Crossover line and loopline extending from approximately milepost 366.46 to milepost 367.92 in McKinley County, New Mexico, had changed from Class 2 to Class 3. This change, it is asserted, was precipitated by the introduction of a mobile home park in proximity to said pipelines in McKinley County. Pursuant to the minimum federal safety standard provisions embodied in *Transportation of Natural Gas and Other Gas by Pipeline: Minimum Federal Safety Standards* (49 CFR 192), whenever an increase in population density indicates a change in class location, the operator must conduct a study to determine, among other things, whether or not the hoop stress corresponding to the established maximum allowable operating pressure (MAOP) of the affected segment of the pipeline is commensurate with the new class location. Basesd upon the results of this study, the operator has 18 months from the change in class location to confirm that the segment may be safely operated at the existing MAOP or reduce the MAOP accordingly.

Applicant further states that since the Permian—San Juan Crossover line and loopline consists of approximately 400 miles of intergrated pipeline, Applicant does not believe that it is operationally desirable to alter the throughout capacity of the affected pipeline segments by reducing the existing MAOP.

Therefore, Applicant proposes to remove and salvage the existing segment consisting of two 30-inch O.D. X 0.335-inch w.t., Grade X-52 pipelines and replace such pipelines with a single 36-inch O.D. X 0.469-inch., Grade X-65 pipeline. The application states that under the existing operating paremeters the replacement of that dual 30-inch O.D. pipelinies with a single 36-inch O.D. pipleline results in equivalent throughtout volume even though the pressure drops over the new segment is slightly higher than for the lines proposed to be abandoned by replacement. Additionally, no disruption in service to Applicant's existing customers would occur as a result of the proposed abandonment and replacement activities, it is stated.

The totlal cost of the proposed construction is estimated to be $1,552,071 which cost would be financed by internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commision by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee in this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further

notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

j. Description of Project: The proposed project would utilize the Corps of Engineers Townshend Flood Control Dam and Recreation Pool and would consist of: (1) a trash rack and intake portal; (2) a penstock consisting of a 730-foot-long unlined rock tunnel with an internal diameter of 11 feet and with its last 50 feet lined with steel; (3) a gate shaft and control gate; (4) a powerhouse measuring 41 feet wide, 707 feet long and 40 feet high and containing one 200-kW and one 2.85-MW turbine/generator unit, each operating under an average head of 24.4 feet; (5) a gate hoist; (6) a tailrace; (7) a 46-kV transmission line 1.3 miles long; and (8) appurtenant facilities.

A total of 1,010 acres of U.S. land would be utilized by the project. This application for license was filed during the term of the Applicant's permit for Project No. 2838.

k. Purpose of Project: The average annual ageneration of 7,180,000 kWh would be sold to the West River Basin Energy Authority.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

4a. Type of Application: Application for License (under 5MW).

i. Comment Date: August 4, 1983.

j. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers' North Springfield Dam and would consist of: (1) a short 11-foot diameter penstock to be connected to the outlet works; (2) a powerhouse with a 1,000 kW unit; (3) a tailrace; (4) a 740-foot long transmission line; (5) provisions for the future installation of a second generating unit; and (6) other appurtenances. Applicant estimates an average annual generation of 3,507,000 kWh.

This application was filed during the term of Applicant's preliminary permit for Project No. 2872.

k. Purpose of Project: Project energy would be either delivered to the Town's proposed distribution system or other arrangements for sale of the power would be made by the Applicant.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

5. Type of Application: Exemption (Under 5 MW).

i. Comment Date: July 8, 1983.

j. Description of Project: The proposed project would consist of two developments as follows: (A) The Canal Development which would include: (1) the Lehigh Canal with entrance control gates and lock guards about 150 feet upstream from the south abutment of the Chain Dam; (2) 3 submersible turbine-generator units with a total installed capacity of 900 kW and a switchyard, to be installed in precast concrete chambers at the canal bank, about 2.4 miles downstream from the lock guards; (3) a 100-foot-long tailrace to return the water to the river; and (4) a ¼-mile-long transmission line.

(B) The North Abutment Development which would consist of: (5) the 700-foot-long and 20-foot-high concrete Chain Dam; (6) a reservoir with a storage capacity of 1,400 acre-feet; (7) a 175-foot-long by 50-foot-wide forebay at the north abutment of the dam; (8) a new powerhouse with 2 turbine-generator units with an installed capacity of 1,500 kW; (9) a switchyard; (10) a short tailrace; (11) a 1.2-mile-long transmission line; (12) fish passage facilities; and (13) other appurtenances. Applicants estimate a total average annual generation of 16,100,000 kWh.

k. Purpose of Project: Project energy would be used by the City of Easton for municipal purposes or sold to a local public utility.

l. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

m. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

m. *Proposed Scope of Studies under Permit*—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months. During this time the significant legal, institutional, engineering, environmental, marketing, economic and financial aspects of the project will be defined, investigated, and assessed to support an investment decision. The report of the proposed study will address whether or not a commitment to implementation is warranted, and, if findings are positive, the Applicant intends to submit a license application. The Applicant's estimated total cost for performing these studies is $20,000.

n. *Purpose of Preliminary Permit*—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

20a. Type of Application: Preliminary Permit.

b. Project No.: 7239–000.

c. Date Filed: April 21, 1983.

d. Applicant: Waterfall Electric/Al Peters.

e. Name of Project: South Fork Project.

f. Location: On South Fork John Day River, near Dayville, in Grant County, Oregon.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Al Peters, 3182 SE Timberlake Drive, Hillsboro, Oregon 97123.

i. Comment Date: August 2, 1983.

j. Description of Project: The proposed run-of-river project would consist of: (1) a 5-foot-high, 40-foot-long concrete diversion structure at elevation 3600 feet; (2) a 1000-foot-long, 6-foot-diameter penstock; and (3) a powerhouse containing a single turbine-generator unit with a rated capacity of 1,100 kW and an average annual generation of 3.0 GWh. Project power would be sold to Central Electric Cooperative or Pacific Power & Light Company. The project would be located entirely on Bureau of Land Management lands.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project and estimates the cost of the studies $5,000–$10,000.

f. Location: Bute County, Idaho; Sucker Run Creek.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Richard D. Spight, Television Communications, Inc., P.O. Box 629, Orinda, California 94563.

i. Comment Date: August 8, 1983.

j. Description of Project: The proposed project would consist of: (1) a 4-foot-high diversion dam at elevation 1494 feet; (2) a 30-inch-diameter, 4,280-foot-long pipe; (3) a powerhouse with a total installed capacity of 670 kW; (4) an 840-foot-long, 11–kV transmission line connecting with an existing transmission line serving Applicant's property.

A preliminary permit does not authorize construction. The Applicant seeks a 24-month permit to study the feasibility of constructing and operating the project.

k. Purpose of Project: The estimated 1.97 million kWh generated by the project would be sold to an area utility company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, D2.

22a. Type of Application: Preliminary Permit.

b. Project No.: 7249–000.

c. Date Filed: April 28, 1983.

d. Applicant: China Flat Company.

e. Name of Project: Hawkins Creek Power Project.

f. Location: On Hawkins Creek in Trinity County, near the towns of Willow Creek and Slayer, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Albert E. Hodgson, Chairman, China Flat Company, P.O. Box 269, Willow Creek, CA 95573.

i. Comment Date: August 1, 1983.

j. Description of Project: The proposed project would consist of: (1) a 4-foot-high by 40-foot-long diversion structure on the Hawkins Creek at elevation 2,000 feet msl; (2) a 6,000-foot-long, 24-inch-diameter low pressure conduit; (3) a 1,000-foot-long, 18-inch diameter penstock; (4) a powerhouse to contain one or a combination of impulse-type, turbine-generating units with a total rated capacity of 210 kW; and (5) a 2,000-foot-long, 12.5-kV transmission line to connect to an existing Pacific Gas and Electric Company line. The powerhouse would operate under a head of 500 feet producing about 1.9 million kWh annually. The project would be located within the Six Rivers National Forest.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project. Applicant estimates that the feasibility studies conducted under the permit would cost about $15,000.

k. Purpose of Project: The Applicant proposes to sell the project power to the Pacific Gas and Electric Company.

Competing Applications

A1. Exemptions for Small Hydroelectric Power Project under 5MW Capacity—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before the specific comment date for the particular application, either a competing license application that proposes to develop at least 7.5 megawatts in the project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1982). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d).

A2. Applications for License—Anyone desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either the competing application itself (see 18 CFR 4.33 (a) and (d), and Part 16, where applicable) or a notice of intent (see 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or §§ 4.101 to 4.104 (1982).

A3. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for license, exemption or preliminary permit, or notices of intent to file competing applications, will be accepted for filing in response to this notice (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate). Any application for license or exemption from licensing, or notice of intent to file a license or an exemption application, must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

Preliminary Permits

A4a. Existing Dam or Natural Water Feature Project—Anyone desiring to file a competing application for preliminary permit for a proposed project at an existing dam or natural water feature project, must submit the competing application to the Commission on or before 30-days after the specified comment date for the particular application (see 18 CFR 4.30 to 4.33 (1982)). A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

A4b. No Existing Dam—Anyone desiring to file a competing application for preliminary permit for a proposed project where no dam exists or there are proposed to be major modifications, must submit to the Commission on or before the specified comment date for the particular application, the competing application itself, or a notice of intent to file such an application (see 18 CFR 4.30 to 4.33 (1982)).

A4c. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before the specified comment date for the particular application. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

A4d. Submission of a timely notice of intent to file an application for preliminary permit allows an interested person to file an acceptable competing application for preliminary permit no later than 60 days after the specified comment date for the particular application.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments

D1. License applications (5 MW or less capacity)—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. Preliminary permit applications—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. Exemption applications (5 MW or less capacity)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency (ies) are requested, for the purposes set forth in Section 408 of the Act, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be

included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. Exemption applications (Conduit)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

BILLING CODE 6717-01-M

[Docket No. ER83-520-000]

Kansas Power & Light Co.; Notice of Filing

June 2, 1983.

The filing Company submits the following:

Take notice that Kansas Power and Light Company and Midwest Energy, Inc., on May 23, 1983 tendered for filing proposed changes in its Federal Energy Regulatory Commission Electric Service Tariff No. 123.

Schedule H—Participation Power Service provides for the purchase of Participation Power by Midwest Energy, Inc. for the period June 1, 1983 through September 30, 1983.

Kansas Power and Light Company proposes an effective date of June 1, 1983.

Copies of the filing were served upon the Kansas Corporation Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-416-000]

Kansas Power & Light Co.; Order Accepting for Filing and Suspending Rates, Noting Interventions, Denying Motions To Reject, Ordering Summary Disposition In Part, and Establishing Hearing and Price Squeeze Procedures

Issued: June 2, 1983.

On March 29, 1983, as completed on April 6, 1983, Kansas Power & Light Company (KP&L) tendered for filing increased rates for wholesale service to 17 rural electric cooperative customers and to 38 municipal customers of KP&L located in the State of Kansas.[1] The proposed rates would increase jurisdictional revenues by approximately $10.9 million (29.7%) based on the twelve month period ending June 30, 1984. In addition, KP&L has submitted unexecuted contracts applicable to 16 cooperative customers to supersede existing contracts which expired by their own terms on May 16, 1983. The company states that service will be rendered under the existing contracts until the new filings become effective. KP&L requests an effective date on June 1, 1983, for its proposed rate changes.

Notice of the filing was published in the **Federal Register**, with comments due on or before April 21, 1983. A timely notice of intervention was filed by the Kansas State Corporation Commission. Timely motions to intervene were submitted by 14 of KP&L's cooperative customers [2] that are members of the Kansas Electric Power Cooperative, Inc. (KEPCO); the Kaw Valley Electric Cooperative Company, Inc., Nemaha-Marshall Electric Cooperative Association, Inc., and Doniphan Electric Cooperative Association, Inc. (Cooperatives); and the Kansas municipal customers of KP&L (Municipals).[3] Additional comments were filed on behalf of the City of Elwood, Kansas, which is also represented as one of the Municipals.

KEPCO requests a five month suspension of KP&L's rates on the basis of various cost of service and rate of return issues.[4] In addition, KEPCO requests that the Commission summarily eliminate certain tariff provisions claimed to be anticompetitive [5] and

[2] The KEPCO members include Ark Valley Electric Cooperative Association, Inc.; Brown-Atchison Cooperative Association, Inc.; Butler Rural Electric Cooperative Association, Inc.; C. & W. Rural Electric Cooperative Association, Inc.; Coffey County Rural Electric Cooperative Association, Inc.; D.S. & O. Rural Electric Cooperative Association, Inc.; Flint Hills Rural Electric Cooperative Association, Inc.; Leavenworth-Jefferson Electric Cooperative, Inc.; Lyon County Electric Cooperative Inc.; Ninnescah Rural Electric Cooperative Association, Inc.; P. R. & W. Electric Cooperative Association, Inc.; Smoky Hill Electric Cooperative Association, Inc.; Smoky Valley Electric Cooperative Association, Inc.; and Twin Valley Electric Cooperative, Inc.

[3] The municipal customers include the Cities of Scranton, Wathena, Netawaka, Muscotah, Severance, Altamont, Marion, Enterprise, Chapman, Eudora, DeSoto, Axtell, Robinson, Hillsboro, St. Marys, Vermillion, Alma, Centralia, Elwood, Troy, Toronto, Morrill, Horton, Lindsborg, Seneca, Waterville, Clay Center, Wamego, Sabetha, Minneapolis, Sterling, Holton, Larned, Ellinwood, Stafford, Osage City, St. John, and Herington, Kansas.

[4] The issues include the proposed rate of return on common equity; the proposed demand allocation; the allowance for cash working capital; interest synchronization; the inclusion of allowances for fuel expense take-or-pay contracts; adjustments to operation and maintenance expenses; and a claimed deferred tax deficiency.

[5] KEPCO cites contractual provisions that prohibit certain inter-interconnections, provide for discontinuation of service upon the nonpayment of a bill, limit service at existing delivery points to a specified capacity, and require establishment of all new delivery points adjacent to KP&L's facilities at a minimum voltage.

establish phased priced squeeze procedures. The Cooperatives generally support KEPCO's pleading. They also request a maximum suspension of KP&L's rates on the grounds that the proposed rates are excessive.

The Municipals request rejection of KP&L's filing, arguing that the company has failed to comply with section 35.13 of the Commission's regulations. In particular, the Municipals claim that the filing fails to support KP&L's revised depreciation rates as well as other elements of the company's cost of service. The Municipals also request rejection of the proposed fuel adjustment clause, since it includes estimated costs subject to a true-up mechanism and since the true-up computation is purportedly erroneous. In addition, the Municipals raise other cost of service issues,[6] and allege rate discrimination and price squeeze. If their request for rejection is denied, they request summary disposition of the tariff and cost of service issues discussed in their pleading and a five month suspension of KP&L's rates. Finally, the Municipals seek an investigation of KP&L's existing rates and tariff conditions, pursuant to section 206 of the Federal Power Act, claiming that they are unjust, unreasonable, and unduly discriminatory.[7]

KP&L responded to the intervenors' pleadings by answer filed on May 6, 1983. The company opposes the requests for rejection, summary disposition, or maximum suspension. KP&L also requests that the Commission defer proceedings on the price squeeze questions raised by the intervenors pending a determination as to cost of service, capitalization, and rate of return.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed notice and motions to intervene serve to make the Kansas Commission, KEPCO, the Cooperatives, and the Municipals parties to this proceeding.

As noted, the Municipals seek rejection of KP&L's filing, in part, on the grounds that the company had inadequately supported its proposed depreciation rates. However, KP&L satisfied the filing requirements of section 35.13(h)(10) of the Commission's regulations by its April 6, 1983 supplemental filing, which provides a depreciation study in support of the revised rates. While the Municipals also challenge the adequacy of the support for other aspects of KP&L's filing, we find that the submittal, as completed on April 6, substantially complies with the Commission's filing requirements. Consequently, the motion to reject will be denied.[8]

Similarly, the Municipals' request to reject KP&L's proposed fuel adjustment clause will be denied. We note that KP&L's fuel clause design, which attempts to synchronize fuel expenses and fuel revenues, is not barred by section 35.14 of the Commission's regulations and that similar clauses have been accepted by the Commission in the past.[9] Although the proposed fuel adjustment clause will not be rejected, however, the company's true-up computations and the derivation of its estimates should be evaluated during the coures of the hearing in this docket.

Summary disposition as to the rate schedule provisions objected to by KEPCO as unduly restrictive is also inappropriate. In each instance, we believe that the challenged contract provisions present questions of law or fact which should be resolved following an evidentiary hearing. We note, however, with respect to the rate schedule provision purporting to permit discontinuation of service in the event of nonpayment, that termination of service cannot be accomplished absent a timely filing, pursuant to section 35.15 of the Commission' regulations.

Having reviewed KP&L's filing and the pleadings, we find that summary disposition is warranted as to only one issue. KP&L has failed to synchronize the test year interest expense used in its income tax calculation with the interest portion of the claimed rate of return. Consistent with established Commission precedent,[10] KP&L will be ordered to file revised rates which reflect an interest deduction for tax purposes as the product of the weighted cost of long-term debt and the allocated rate base.

Our preliminary review indicates that the rates proposed by KP&L have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept KP&L's rates for filing, as modified by summary disposition, and we shall suspend the rates as ordered below.

In *West Texas Utilities Company*, Docket No. ER82-23-000, 18 FERC ¶ 61,189 (1982), we noted that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed increase may be unjust and unreasonable but may not generate substantially excessive revenues, as defined in *West Texas*. Our examination suggests that the proposed rates, as modified by summary disposition with respect to interest synchronization, may not yield substantially excessive revenues. Accordingly, we shall suspend the rates for one day, from 60 days after completion of the filing, to become effective on June 7, 1983, subject to refund.

In accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, Docket No. ER79-339, 8 FERC ¶ 61,131 (1979), we shall phase the price squeeze issue raised by the intervenors.

The Commission orders:

(A) The Municipals' motion to reject KP&L's filing, in whole or in part, is hereby denied.

(B) Summary disposition is hereby ordered as noted in the body of this order, with respect to synchronization of interest expense for tax purposes. Within thirty (30) days of the date of this order, KP&L shall refile its rates and supporting cost data to reflect this determination.

(C) All other motions for summary disposition are hereby denied.

(D) KP&L's proposed rates are hereby accepted for filing, as modified by summary disposition, and are suspended for one day, to become effective on June 7, 1983, subject to refund.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of KP&L's rates.

(F) The Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(G) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding

[6] The other cost of service issues include, *inter alia*, the proposed rate of return on common equity, calculation of cash working capital, and the proposed demand allocation.

[7] As evident in Ordering Paragraph (E) below, the hearing in this docket is being initiated pursuant to both sections 205 and 206 of the Act.

to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(H) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modify this schedule for good cause shown.

The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(I) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Secretary.

Louisiana-Nevada Transit Co.; Proposed Changes in FERC Gas Tariff

June 2, 1983.

Take notice that on May 9, 1983, Louisiana-Nevada Transit Company (Louisiana-Nevada) tendered for filing proposed changes in its FERC Gas Tariff Volume I. The proposed changes are to reflect changes in purchased gas cost as provided in Louisiana-Nevada's Purchase Gas Adjustment Clause applicable to its Rate Schedule No. G-1 and X-2. The change provides for a total adjustment of 18.85¢ per Mcf including a deferred gas cost adjustment of (1.67)¢ per Mcf, to amortize a deferred balance, and a cumulative cost of gas adjustment of 20.52¢ per Mcf.

Copies of the filing were served upon Louisiana-Nevada's jurisdictional customer and the Arkansas Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426,, in accordance with Rules 211 and 214 of the Commission Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 15, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Miami Power Corp.; Notice of Filing

June 2, 1983.

The filing Company submits the following:

Take notice that on May 23, 1983, the Miami Power Corporation (Miami) tendered for filing a proposed change in its FERC Electric Service Tariff, Volume No. 3. The proposed change would increase revenues from service by $773 annually based on the 12 months ended December 31, 1982. The proposed change represents only an increase of the rate of return component in the cost of service formula utilized to calculate the monthly rental charge for transmitting electric energy for The Cincinnati Gas & Electric Company (CG&E). This change had been agreed to by Miami and CG&E as evidenced by an Agreement executed and dated May 20, 1983. Miami indicates that this rate schedule supersedes that contained in the Agreement between Miami and CG&E dated March 20, 1979.

Miami proposes an effective date of August 1, 1983.

Copies of this filing were served upon CG&E and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP83-131-001]

Northern Natural Gas Co.; Division of InterNorth, Inc., Notice of Amendment

June 2, 1983.

Take notice that on May 5, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-131-001 an amendment to its pending application filed December 16, 1982, in Docket No. CP83-131-000 pursuant to Section 7(c) of the Natural Gas Act so as to authorize Applicant to construct and operate certain pipeline and appurtenant facilities in the offshore Texas area and to render firm transportation service of up to 45,000 Mcf per day for Amoco Gas Company (Amoco Gas), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that on December 16, 1982, it filed an application in Docket No. CP83-131-000 for authorization to construct and operate approximately 3 miles of 24-inch pipeline extending from the producer's platform in Matagorda Island Area Block 624, offshore Texas, to an interconnection with the proposed Seagull Shoreline System (SSS). Applicant notes that the proposed facilities were designed to transport the 32.5 percent gas of reserves underlying Matagorda Island Area Block 624 which Applicant has contracted to purchase from Mesa Petroleum Company (Mesa) as well as the remaining 76.5 percent of reserves attributable Matagorda Island Area Block 624 which are presently undedicated.

Applicant states that Amoco Gas has contracted to purchase 50 percent of the gas reserves underlying Matagorda Island Area Block 623 and is negotiating to purchase an additional 31 percent interest in the block. It is further stated that Applicant and Amoco Gas have executed a gas transportation and facilities agreement whereby Applicant would transport for Amoco Gas on a firm basis up to 45,000 Mcf per day of Matagorda Island Area Block 623 reserves and additional quantities on a best-efforts basis. Applicant proposes to charge Amoco Gas a monthly demand charge of $43,642 for transportation of quantities up to the maximum daily quantity of 45,000 Mcf per day and 3.19 cents per Mcf for quantities in excess of the maximum daily quantity.

To transport gas reserves dedicated to it in Matagorda Island Area Block 624, reserves dedicated to Amoco Gas in Matagorda Island Area Block 623, as well as reserves in the vicinity which may be dedicated to others in the future, Applicant now proposes to construct and operate approximately 3.5 miles of 24-inch pipeline from the "B" platform in Matagorda Island Area Block 623 to the SSS and 0.42 mile of 10-inch pipeline to connect Mesa's platform in Matagorda Island Area Block 624 to the "B" platform in Matagorda Island Area Block 623. Applicant proposes to commence construction of the facilities by the late summer of 1983 to coincide with the beginning of production in Matagorda Island Area Blocks 623 and 624. Applicant states that the 24-inch facilities would be designed with a maximum capacity of 320,000 Mcf per day.

Applicant estimates that the proposed facilities would cost $6,282,300. Such cost, it is asserted, would be financed from Applicant's funds on hand.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a

party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

[Docket No. SA83-15-000]

Shar-Alan Oil Co.; Application for Adjustment

Issued: June 2, 1983.

On May 13, 1983, Shar-Alan Oil Company (Shar-Alan), 4101 East Louisiana Avenue, Denver, Colorado 80222, filed an "Application for an Adjustment" under section 502(c) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301-3432, (Supp. V 1982), and 18 CFR 385.1101-385.1117 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure.

An adjustment of § 273.204, and any other applicable Commission regulation, is sought so that Shar-Alan may collect retroactively, subject to the agreement of its purchasers, the difference between the maximum lawful price for its new, onshore production wells under section 103 [1] of the NGPA and the otherwise applicable NGPA rate. The request for an adjustment encompasses 24 wells completed in the Sooner Trend of Oklahoma from which deliveries were commenced during the period of May 1980 through June 1981. Each well is similar in that the appropriate filings were not filed until after deliveries were commenced. Thus, retroactive collection of the section 103 rate from the date deliveries were initiated are not allowed for the period before the appropriate filings were filed with the jurisdictional agency, as provided in § 273.204 of the Commission's regulations, unless an adjustment is granted under section 502(c) of the NGPA.

Shar-Alan contends that the application of § 273.204, which prohibits Shar-Alan from making retroactive collections for the period from the date of deliveries to the filing of an application for a well category eligibility determination under NGPA Title I, constitutes an inequity and special hardship under section 502(c) of the NGPA. Further, Shar-Alan asserts that a remedy in the form of an adjustment is within the Commission's discretion, can be allowed consistently with the interests of its purchasers, and the policy objectives of the NGPA.

The inequities asserted arise out of the extenuating circumstances that revolve around the employee whom Shar-Alan charged with the responsibility to make timely applications for NGPA well category determinations. This employee, since deceased, was allegedly suffering from mental dysfunctions due to a malignant brain tumor during the time period at issue. During this time, the employee failed to complete or file the appropriate filings which would allow Shar-Alan to collect the applicable maximum lawful price from the date of initial deliveries. Although Shar-Alan was aware of the fact that the employee had a terminal illness, it was not aware of the employee's mental incapacity caused by that illness. Shar-Alan contends that only after the fact did it become aware of these failings.

Shar-Alan calculated that its loss in revenues totals $209,417.36. Shar-Alan asserts that it will incur special hardship if unable to make retroactive collections. Allegedly, the financial viability of this small non-public producer is uniquely dependent upon the full recovery of revenues available. Shar-Alan urges that the Commission's denial of retroactive collections under § 273.204 of its regulations in this situation would be "an inequity in the administration of the NGPA pricing provisions."

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of Part 385 of the Commission's Rules of Practice and Procedure. Any person desiring to participate in this adjustment proceeding shall file a petition to intervene in accordance within the provisions of such Subpart K. All petitions to intervene must be filed within 15 days after publication of this notice in the **Federal Register.**

Tennessee Natural Gas Lines, Inc. Proposed Changes in FERC Gas Tariff

June 2, 1983.

Take notice that on May 18, 1983, Tennessee Natural Gas Lines, Inc. (TNGL) tendered for filing both Forty-second Revised Sheet No. PGA-1 and Appendix A to First Revised Volume No. 1 of its FERC Gas Tariff to be effective May 1, 1983.

TNGL states that the sole purpose of this filing is to reflect in its rates the reduced rates of its sole supplier Tennessee Gas Pipeline Company, a Division of Tenneco, Inc., which will become effective on May 1, 1983.

TNGL states that copies of the filing were served upon its jurisdictional customer, the interested state regulatory commission, its non-jurisdictional customers estimated to be billed for NGPA incremental pricing surcharges, and are available for public inspection at TNGL's offices in Nashville, Tennessee.

Any person desiring to be heard or to protest said filing should file a petition

to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. [Docket No. CP82-385-002]

Transcontinental Gas Pipe Line Corp.; Amendment

June 2, 1983.

Take notice that on May 2, 1983, Trancontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP82-385-002 an amendment to its application filed in Docket No. CP82-385-000 pursuant to Section 7(c) of the Natural Gas Act so to reflect modifications to its proposal to construct certain pipeline and appurtenant facilities to receive and transport natural gas to be imported from Canada, resulting from a reduction in import quantities, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that the amendment reflects modifications to the proposed facilities resulting from a reduction in the quantity of natural gas allowed by the National Energy Board to be exported from Canada. Applicant now proposes to expand the capacity of its Leidy Line and certain of its market area facilities so as to effecuate delivery to Applicant's customers of 315,000 Mcf per day of Canadian natural gas to be imported for its system supply, and 300,000 Mcf per day of Canadian natural gas available from storage facilities owned by third parties located in Michigan and Ontario.

Applicant indicates that both the quantities purchased for system supply and the storage service would be transported through the proposed Niagara Interstate Pipeline System to a proposed interconnection with Applicant's existing Leidy Line at the Leidy Storage Field near Tamarack, Pennsylvania.

Applicant states that the proposed looping and compression facilities on the Leidy Storage Field near Tamarack, Pennsylvania, to a point of interconnection with market area facilitieis near Centerville, New Jersey, would increase the capacity of such facilities from current level of 970,269 Mcf per day to 1,583,813 Mcf per day thereby providing the increased capacity required to effectuate delivery of the 615,000 Mcf per day of new gas supplies. Applicant proposes the following expansion of its Leidy Line:

(1) Construct 36.42 miles of 30-inch pipeline loop from Leidy Storage Field (Leidy Milepost 194.04) to Station 520;

(2) Construct 60.6 miles of 36-inch pipeline loop from Leidy Milepost 129.51 to Station 515;

(3) Construct 42.78 miles of 36-inch pipeline loop from Leidy Milepost 42.78 to Station 505;

(4) Install an additional 3,900 horsepower of compression at Station 520; and

(5) Construct the Algonquin-Centerville Meter Station at Milepost 0.99.

Applicant proposes the following construction on market area facilities in Pennsylvania and New Jersey:

(1) Construct 20.5 miles of 24-inch pipeline looping the 16-inch and 12-inch Trenton-Wodbury Lateral from Milepost 16.33 to the Mt. Laurel meter station;

(2) Construct 3.98 miles of 16-inch pipeline loop of the 16-inch and 8-inch Oreland and Ashmead Road Laterals between the Oreland meter station and the Ashmead Road meter station;

(3) Construct 2.74 miles of 10-inch pipeline loop of the 6-inch Trenton Lateral from Milepost 4.79 to the Trenton meter station;

(4) Construct 18.05 miles of 36-inch pipeline loop from Milepost 1807.52 to Milepost 1825.57 on the Caldwell Loop; and

(5) Construct 3.62 miles of 12-inch pipeline loop of the 14-inch and 8-inch Camden Lateral from Milepost 5.95 to the Camden meter station.

Applicant states that the estimated cost of the proposed facilities would be $281,000,000 which would be financed initially by short-term loans and funds on hand with permanent financing to be undertaken as part of an overall long-term program at a later date.

Any person desiring to be head or to make any protest with reference to said amendment should on or before June 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Valero Transmission Co.; Petition To Amend

June 2, 1983.

Take notice that on April 28, 1982, Valero Transmission Company (Petitioner), P.O. Box 500, San Antonio, Texas 78292, filed in Docket No. CP83-112-001 a petition to amend the order issued March 4, 1983, in Docket No. CP83-112-000 pursuant to § 284.127 of the Commission's Regulations and Section 311(a)(2) of the Natural Gas Policy Act of 1978 so as to authorize the transportation of additional volumes of natural gas for El Paso Natural Gas Company (El Paso), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is asserted that by order issued March 4, 1983, Petitioner was authorized to transport up to 25,000 Mcf of gas per day for El Paso. Petitioner proposes herein to transport up to 31,250 Mcf of gas per day which volume El Paso has agreed to purchase from Valero Interstate Transmission Company provided the average daily quantity transported each year does not exceed 25,000 Mcf.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed de Novo Nonbank Activities; Barclays Bank PLC, et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays Bank PLC* and its subsidiary, *Barclays Bank International Limited*, each a bank holding company whose principal office is in London, England (consumer finance and insurance activities; Syracuse, New York): To engage through their subsidiaries, BarclaysAmericanCorporation ("BAC"), BarclaysAmerican/Financial, Inc. ("BAF") and BarclaysAmerican/-Retail Services Inc. ("BARS"), in making direct consumer loans, including loans secured by real estate, and purchasing sales finance contracts representing extensions of credit such as would be made or acquired by a consumer finance company, and wholesale financing (floor planning); and acting as agent for the sale of related credit life and credit accident and health insurance. Because Barclays and its subsidiaries, BAC, BAF and BARS, were engaged in insurance activities in New York before May 1, 1982, the insurance restrictions of the Garn- St Germain Depository Institutions Act of 1982 do not apply to this office relocation. Credit life and credit accident and health insurance sold as agent may be underwritten or reinsured by BAC's insurance underwriting subsidiaries. These activities would be conducted from an office of BAF and BARS located in Syracuse, New York, serving customers in Syracuse and surrounding areas in New York. This notification is for the relocation of an existing office in Syracuse, New York. Comments on this application must be received not later than July 1, 1983.

2. *Manufacturers Hanover Corporation*, New York, New York (relocation of office and expansion of service area; South Carolina): To continue to hold the shares of Finance One of South Carolina, Inc. ("Finance One") after Finance One engages in the activities of making or acquiring loans and other extensions of credit, secured or unsecured, such as would be made or acquired by a finance company under South Carolina law; and offering credit related life insurance, credit accident and health insurance, and credit related property insurance in Florence, South Carolina. Finance One presently engages in these activities in Darlington, South Carolina. The application is only to continue to hold the shares of Finance One after Finance One engages in these activities at a different location servicing an expanded service area; the application does not involve the commencement of any new activities at the new location. The office will service customers in Darlington, Marlboro, Lee, Chesterfield, Florence, Dillon, Marion,

Williamsburg, Clarendon, and Sumter Counties. Comments on this application must be received not later than July 1, 1983.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Northwestern Financial Corporation,* North Wilkesboro, North Carolina (originating and servicing mortgage loans; Brunswick and New Hanover Counties, North Carolina): To engage through its subsidiary, Northwestern Mortgage Corporation, in making, acquiring, and servicing first mortgage loans such as would be made by a mortgage banking company from an office to be located in Carolina Beach, North Carolina, serving the counties of Brunswick and New Hanover, North Carolina. Comments on this application must be received not later than July 1, 1983.

2. *South Carolina National Corporation,* Columbia, South Carolina (financing and insurance activities; South Carolina): To engage through its subsidiary, Provident Financial Corporation, in providing consumer finance activities including the extension of direct loans to consumers, the discount of retail and installment notes or contracts, servicing loans and other extensions of credit for the account of others, and acting as agent for sales of life, accident and health, and property casualty insurace directly related to its extensions of credit. Property and casualty insurance will be offered pursuant to section 601 (A) (B) and (D) (i) of the Garn-St Germain Depository Institutions Act. Such activities will be conducted at an office in Clinton, North Carolina, serving the town of Clinton and the surrounding area. Comments on this application must be received not later than July 1, 1983.

C. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Citizens Bancorporation,* Sheboygan, Wisconsin (management consulting and data processing activities; Wisconsin and Michigan): To engage through its subsidiary, Citizens Management Services Corporation in providing management consulting advice to nonaffiliated and non-bank depository institutions; and providing data processing and data transmission services, data bases or facilities for the internal operations of the holding company or its subsidiaries, and for others. These activities would be conducted from an office in Green Bay, Wisconsin, serving the entire State of Wisconsin and the upper peninsula of Michigan. Comments on this application must be received not later than June 21, 1983.

D. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *First City Bancorporation of Texas, Inc.,* Houston, Texas (financing activities; Dallas-Fort Worth area and north Texas): To continue to engage through its subsidiary, First City Financial Corporation in making and acquiring loans and other extensions of credit such as would be made by a commercial finance company. These activities would be conducted from an office in Dallas, Texas serving the Dallas—Forth Worth area and northern Texas. Comments on this application must be received not later than June 21, 1983.

E. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *BankAmerica Corporation, San Francisco, California (consumer and commercial financing and servicing activites; all fifty (50) states and the District of Columbia): To engage through a de novo* office of its indirect subsidiary, BA Business Credit Corporation, Irving, Texas in making or acquiring for its own account loans and other extensions of credit such as would be made or acquired by a finance company, and servicing loans and other extensions or credit. No credit-related insurace will be offered in connection with these activities which will include, but not be limited to, making consumer installment loans and commercial loans to businesses which may be unsecured, or secured by personal assets, residential and commercial real estate. These activities will be conducted from a *de novo* office in Irving, Texas, serving all fifty (50) states and the District of Columbia. Comments on this application must be received not later than June 28, 1983.

Consumer Advisory Council; Solicitation of Nominations for Membership

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Solicitation of nominations for membership on the Board's Consumer Advisory Council.

SUMMARY: The Board is asking the public to nominate qualified individuals for eight appointments to its Consumer Advisory Council. Nominations should include the name, address, and telephone number of the nominee, together with information about past and present positions held, special knowledge, interests, and experience related to consumer credit or other financial services. It is contemplated that the Board will announce its selection of new members by mid-November.

DATE: Nominations should be received by August 5, 1983.

ADDRESS: Nominations should be mailed to Dolores S. Smith, Assistant Director, Division of Consumer and Community Affairs, Board of Governors of the

Federal Reserve System, Washington, D.C. 20551.

FOR FURTHER INFORMATION CONTACT: Ann Marie Bray, Staff Assistant, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, (202) 452–2412.

SUPPLEMENTARY INFORMATION: The Consumer Advisory Council was established by the Congress in 1976 to advise the Board on the exercise of its duties under the Consumer Credit Protection Act and on other consumer-related matters. The Council by law represents the interests both of consumers and of the financial community. Members serve three-year terms that are staggered to provide the Council with continuity.

Eight new members will be selected this fall, to replace members whose terms expire on December 31, 1983. The Board is particularly interested in candidates who are familiar with issues in the area of consumer credit and other financial services. In making the new appointments, the Board also will seek to complement the qualifications of continuing Council members in terms of affiliation and geographic representation. Each year the nominations have numbered in the hundreds. With only eight vacancies, this means that many highly qualified and interested individuals will not have the opportunity to serve and that not every interested group can be represented.

The Council meets three times a year for approximately a day and a half. Council members are paid $100 for each day spent attending or traveling to and from meetings.

Nominations should be submitted in writing to Dolores S. Smith, Assistant Director, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and must be received no later than August 5, 1983. Nominations should include the name, address and telephone number of the nominee, past and present positions held, and special knowledge, interests, or experience relating to consumer financial matters. This information will be made available for public inspection and copying upon request, except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information. The Board expects to announce its selection of new members by mid-November.

City National Bancshares, Inc.; Formation of Bank Holding Company

City National Bancshares, Inc., Greeley, Nebraska, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 per cent of the voting shares of The City National Bank, Greeley, Nebraska. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

City National Bancshares, Inc., Greeley Nebraska, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire the assets of McQuillan Insurance Agency, Greeley, Nebraska.

Applicant states that the proposed subsidiary would engage in the activities of a general insurance agency business in a community with a population of less than 5,000 persons. These activities would be performed from offices of Applicant's subsidiary in Greeley, Nebraska, and the geographic area to be served is an area within 25 miles of Greeley, Nebraska. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be expected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than June 30, 1983.

Proposed Acquisition of First University Service Corporation

First University Corporation, Houston, Texas, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b), (c), for permission to acquire voting shares of First University Service Corporation, Houston, Texas.

Applicant states that the proposed subsidiary would engage in the activities of a trust company, including acting as trustee and fiduciary agent in connection with various church bond issues, and other trust activities complementary to banking. These activities would be performed from offices of Applicant's subsidiary in Houston, Texas, and the geographic area to be served are the United States (with respect to acting as trustee and fiscal agent for various church bond issues), and Houston, Texas (with respect to other trust activities complementary to banking). Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by apporval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than June 29, 1983.
